Description/Address	Sampling Date/Time	Sampled By [✓]	Test Requested											

All samples must be submitted along with the lab request form. All water samples being submitted for Coliforms/E-Coli testing must have the date and time sampled noted. The sampling and handling is out of the laboratory control when the client submits samples they have sampled themselves. All samples should be temperature controlled based upon the testing that is being requested. Samples must be between <10 degrees for bacteria testing or it can affect the quality of results. If the customer chooses to proceed with a deviation, it must be documented. TCE-Q Reference: IDEXX Colilert and Colilert Enzyme Substrate Method. Outsourcing of testing o sub-contracted labs may be required on rare occassions.
