Bedpan Usage

It is the responsibility of the staff member who places resident on the bedpan to stay with resident until they are ready to come off the bedpan. If this occurs at the end of shift, oncoming staff must relieve you of being with the resident on the bedpan. You do not leave the resident alone.

I have read and understand Bedpan Usage.

Accident Prevention

Resident with Alarms

Policy: Residents with any type of alarm to prevent unassisted ambulation will be monitored by staff when alarm is not in place.

Procedure:

1. Residents with alarm to prevent unassisted ambulation will not be left unattended while in bathroom.
2. Staff member will keep resident in view while resident is on toilet. (Provide as much privacy as possible)
3. If staff member requires assistance, pull bathroom call bell for other staff response. Do not leave resident unattended or out of view.
4. When administering assistance to resident to resident who has alarm order for unassisted ambulation, do not leave resident unattended if alarm is not in place.
5. Upon completion of care or assistance to resident, ensure alarm is in place and functioning prior to leaving resident.
