THE ULTIMATE 2K WATER-BASED PRIMER

CENTURION WOOD COATINGS

Introducing the innovative, water-based, 2K, white, acrylic, polyurethane primer you've been looking for!

- Great over MDF, hard and soft woods
- High-build and grain-filling abilities
- Tannin bleed and dye migration encapsulating
- Can be used for new wood or refinishing projects
- Superb chemical and moisture durability
- Resists against burning through edges
- Easy to sand

CW-1107 is a white, acrylic, polyurethane primer designed to be used in interior applications where extreme chemical and moisture resistance is required. Unlike most competitive polyurethanes, this is not a polyurethane dispersion/modified acrylic topcoat. CW-1107 requires a 15% mix with CW-4002 hardener based on aliphatic isocyanate to provide a fully crosslinked film.
