CULTUREEL Hudson Valley

CultureelHV is a print journal in magazine format, dedicated to presenting an ongoing narrative as a circular motif with the Hudson River as its constant.

Vistas of bucolic rolling hills on one side of the river; wooded cliffs and mountains on the other; all punctuated by cascading waterfalls and swimming holes that outline and alternately highlight a quietly addictive spiritual quality, which has drawn generations of creative persons, and inspired layers of Hudson Valley culture over several centuries to the present.
