WWE Bulb Handled Instruments —

World Wide Equine Hardened Tool Grade Stainless Steel Bulb Handled Elevators, Curettes, Osteotomes & Picks

The solid stainless steel handles of these instruments have great weight and feel. They don’t get lost in your hand like some lighter instruments. The cutting blades are made from tool grade stainless steel and hardened creating long lasting edges.

All are made in house at World Wide Equine, Inc., Idaho, USA.

Miniature S/S Poly Gag Double Miniature S/S Poly Gag

Double Jeffrey Mouth Gag

Incisor work may be performed more easily by doubling the Polypropalene Jeffrey Gags. One gag is used for each arcade while they are held in place with a strap over the poll. By using two gags excessive unbalanced TMJ pressure is kept to a minimum. Horses are more receptive to incisor work given the even amount of pressue throughout the jaw and head. This set of double gags comes with an off cheek hook enabling the use of one at a time if needed.

231 7000 09 02 BS	9” 0° Bit Seat Float With Regular Cut Carbide Blade	$217.00	231 7000 09 02 BS FC - Fast Cut Blade	$244.00

231 7000 09 02 CBS	9” 0° Bit Seat Float With Regular Cut Carbide Blade	$217.00	231 7000 09 02 CBS FC - Fast Cut Blade	$244.00

Low profile 7000 Series floats may be ordered with a pistol grip handle (right) or a Ian Wharton handle (left). Ad PG to your part number for Pistol Grip style handle or IW for Ian Wharton style handle. ***Please specify head angle and one of two types of blades, regular or fast cut in fine or medium carbide.*** All handles can be sealed with a plastic coating for an additional charge. The shorter lengths of the 7000 series floats are often ordered for use on small and miniature horses because of their narrow low profile head.

7000 Series Float and Blade Detail —

ONE INCH UPPER BACK 7000 SERIES SLIM-LINE PRO-LITE FLOAT

One Inch Tungsten Carbide Blades

Medium

Fine

Upturned Head Detail

Order #	Description	Price
231 7000 18 01 15 UP	18" 15° Upper Back With Carbide Blade	$217.00
231 7000 01 Fine	7000 Series 1" Fine Tungsten Carbide Replacement Blade	$54.95
231 7000 01 Medium	7000 Series 1" Medium Tungsten Carbide Replacement Blade	$54.95
231 7000 01 Resharp	Resharpened 1" Blade	$27.45
231 7000 Tape	Replacement Tape Per Foot	$11.00

To place your order for the 7000 Series Slim-Line Pro-Lite Floats all of the following information is needed.

Shaft Length
Angle of Head
Blade Type
Fine or Medium
Handle Style
If not ordering straight

Floats are shipped with medium blade if not specified otherwise.

All 7000 Series Floats are available in pistol grip or Ian Wharton style handles in any of the lengths pictured at right.

Please add **PG** for Pistol Grip or **IW** for Ian Wharton style handles to your part number when ordering.

The milled groove in the shaft of the straight handled 7000 series floats aids in determining float head angle when placed within the mouth.

Plastic coating may be applied to foam handles at our factory. They cannot be shipped as replacement handles. They are easy to clean and better for cold weather. Factory Part #: DIP--$14.50

Instructions for Changing 7000 Series Blades

Removal of Old Blade:
1. Heat back side of float head with hot water
2. Pry blade loose with a fine bladed screwdriver or knife
3. Remove left over tape from head channel
4. Clean with acetone; do not touch cleaned surfaces

Attaching New Blade:
1. Remove backing from tape on new head
2. Attach blade to float head
3. Protect cutting surface with cloth and apply even pressure
4. Trim excess tape

Fine Carbide

Medium Carbide

1" by 8" Diamond Incisor and Canine Tooth Files With 4" Blade Coated on Two Sides and Both Edges

Top gnathological practitioners report that these are the finest, fastest and longest lasting stainless steel diamond coated files they have ever used. Many reports state that horses don't seem to mind work performed with these floats as much as other types of instrumentation.

Floats are coated with fine quality diamonds on two sides and both edges.

Plain File: #260 356 8 **Price: $143.67**

Foam Handle: #260 356 8 **Price: $147.67**

S/S Bulb Handle: #260 356 8 **Price: $173.67**

Dipped Foam Handles

Available in Black, Red, Yellow or Blue
Color Coded Dip, $14.50 @ On New Floats
Color Coded Dip & New Handles on Used Floats $19.00
Floats Refurbished or Rebuilt: Normally about 1/2 Price
Please ship floats to our factory with instructions.

Dipped handles are easier to clean, mildew resistant and better to work with in cold weather. They still have their original shape and feel but are longer lived and the color coding lets you find the one you need when working. All handles need to be dipped at the factory. Floats may be returned for new handles and dip at any time.

Capps Floats

225 6000 04 00 14	4” 14 Insert Straight Incisor Float	$349.95

225 6000 07 30 08	7” 8 Insert 30° Premolar Float	$269.97

225 6000 15 00 10	15” 10 Insert Upper and Lower Cattle Float	$296.66

225 6000 15 00 14	15” 14 Insert Straight Lingual and Buccal Float	$349.95

225 6000 17 00 14	17” 14 Insert Straight Lingual and Buccal Float	$349.95

Shaft Lengths Do Not Include 8” Handle Length

All Capps floats come with standard inserts unless others are specified.

You may custom order any float with a pistol grip, Ian Wharton handle or any angle head or shaft length. Custom orders are not normally in stock, taking slightly longer to build and deliver. There may be a slight additional charge depending on the complexity of the request.

All 6000 Series Capps Floats have long life secure three sided, carbide pinned inserts. Straight handled floats have milled shafts to aid in float placement. They include 8” long Pro-Lite handles for better grip and easier handling. The triangle heads allow easier oral access, greater comfort for the horse and less soft tissue damage. Foam handles may be plastic coated for easier cleaning and use in cold weather.

Titanium coated corrosion resistant replacement inserts are available for all Capps Floats.

225 6000 17 15 08	17” 8 Insert 15° (Upturned Head) Upper Back	$269.97

225 6000 15 14 UP/PG	15” 14 Insert Pistol Grip Up Turned Head	$349.95

Low Profile Straight Grip Float With Fast Cut Blade Part Number: 207 LP 17 FC $254.00
Low Profile Pistol Grip Float With Fast Cut Blade Part Number: 207 LP 17 PG FC $254.00

Available in 7”, 9”, 13”, 15”, 17”, 19” and Short 4” Incisor Lengths
Option: Dipped Handle Colors of Red, Yellow, Blue and Black; Add $14.50@

When you want a float to get the work done this is a wise choice. This instrument reduces the (bulk) overall size of the head about 40% over standard slide in blades making it easier to get around sore lacerated cheeks, back ramps and protuberant teeth. Some of the better practitioners report they do 80% of their work with this float and get along well with the horses.

RESHARP 3:	Resharpen 3” Regular Cut Tungsten Blade	**$39.95**

Bitting & Miscellaneous

Order #	Title	Author	Price
100 0107	Bit of Information, a Western Horseman Publication	Darnall, Greg	$5.00
100 0110	Mosby's Dental Dictionary		$66.50
130 0204	Conquerors	Bennett, Deb Phd	$83.25
105 0128	Academy Dental Poster	Mason, Mike	$15.00

Planer Style Correction Hand Piece

735 ICH	Capps Incisor Correction Hand Piece No Vac	$574.00
735 ICH V	Capps Incisor Correction Hand Piece With Vac	$624.00

With Heavier Diamond Disk, With or Without Vacuum Tube
We have been using this planer for incisor corrections for over 5 years, it has a thick heavy diamond disk that really holds up well.
It is meant to be used as an incisor planer and not a cut off wheel.

MMXV and RA-250 Horse Power Conversion Maintenance Guide

Break In:

Clean grease zerk of any debris, using a wire brush or pick. Put one pump of grease in for every horse for the first 50 horses. Our MMXV's and RA-250 Horse Power Conversions have our best hardened steel gears. The gear lash is set very tight for long gear life. The gear heads run pretty warm in the beginning. We run the units at our factory wide open for 1/2 hour in break in oil before shipping. When working on horses don't work too long at a time on individual teeth to avoid instrument overheating and tooth damage. Keep your burrs clean of tooth debris and dip the end of the hand piece in water periodically to cool if needed.

Regular Maintenance:

Clean grease zerk of any debris, using a brush or pick. Put 5 pumps in every 5 or 6 horses. At the end of the day put 10 - 14 pumps in the instrument until grease comes out the relief hole. The small grease guns are low preasure; if the zerk is plugged grease can bypass within the grease gun making you think you are getting grease into the instrument when you are not. Make sure grease is coming out the relief hole by turning the small collar until you see the hole, then pump the grease through the unit until you see clean grease coming out the relief hole. After greasing turn the collar to cover the hole. After every fifty head or once a week lube the bottom end (the hole where you plug in the flex shaft cable) with a few drops of light oil such as sewing machine oil.

Cleaning:

Burr: Hold the burr at the surface of the water against a wire brush. Run the unit until the debris is cleaned from the diamond grit. Be sure to lube directly after to push water out of the gear head. Wipe your instrument with a damp cloth to remove excess water; make sure not to get debris/dirt into the bottom end of your hand piece or drop your cable onto the ground. If you do be sure and clean it thoroughly before pluging it into your hand piece.

Cable Length:

Make sure your cable extends 3/4" beyond the end of the cable housing. If it is too short it will not make a proper connection, if too long it will place excessive preasure on the titanium drive shaft, gears and flex shaft cable.

Notes:

If you run a Super Burr with a soft tissue guard spray WD-40 or equivalent on the guard after cleaning debris from the diamond in a bucket with a stainless steel wire brush, making sure the guard is free and turning easily on the end of the burr before storing.

It is up to you, the customer, to insure the grease zerk is cleaned before greasing the instrument. If there is debris left in the zerk it will become lodged and plug the zerk. If the zerk becomes plugged or damaged the instrument will not take grease and the zerk will need to be replaced. We will not warranty a damaged instrument due to the zerk being plugged. Please pay close attention to this. If you have any questions or need maintenance assistance please contact our staff.
