USA – Frederick Schofield and Beach Books Publishing, LLC are proud to announce the release of *A Run to Hell*, a gripping new Literature & Fiction *based on facts* is now available on Amazon and at most booksellers. This bold story based on fact takes readers on a fast and intense journey, where virtue and crime, truth and lies, romance and lethal dangers clash head-on.

This Story Feels as It Is: Inspired by Real Life Events

A Run to Hell is not just another Literature & Fiction novel. It is shaped by real events, real people, and inside knowledge. The story came to the author from close sources.

In the East Falls section of Philadelphia, Frederick Schofield's father grew up next door to same-aged and forever friend Grace Kelly and her brother Kell. He knew the brash young lady before Hollywood created the sophisticated image that carried her to stardom then to royalty as Princess of Monaco.

Grace's fate also fell on her brother: Jack "Kell" Kelly, the prominent Philadelphia City Council person and President of the U.S. Olympic Committee. His long-time companion Rachel Harlow was known by the press as "Philadelphia's famous transsexual." Years

before LGBTQIA+ support, she regularly appeared in print and on nationally broadcast TV. Together they were *the couple* to liven any dinner party.

A different slice of humanity also offered insights: lawyer Frederick Schofield's clientele and mob associates. Some whispered, knowing how fate snuffed Grace and her family members . . . and how drug dealings functioned in dysfunctional dictator Manuel Noriega's Panama.

Then there is Schofield's mentor in the criminal law: Raymond J. Takiff, who defended dictator and drug kingpin Manuel Noriega in U.S. courtrooms for shipping mountains of Medellin Cartel cocaine to the United States through his Panama canal.

The book follows criminal lawyer Lee and FBI special agent Jaime. Both carry deep personal pain from their pasts. They come together in a mission that puts everything, especially their lives at risk.

Race with them from South Philadelphia to Monaco, Miami, the Everglades, Cancun, the Mayan Ruins of Tulum, and Panama. Along the way, enter the dark world of the Philadelphia Mafia family. Tension builds as characters struggle to cast off demons from the past while fighting to stay alive.

A Plot Driven by Mystery and Danger

In *A Run to Hell*, readers explore shocking events tied to the deaths of famous public figures, including Hollywood star and Monaco Princess Grace Kelly and Central American freedom fighter Doctor Hugo Spadafora. The story connects to misery created by a ruthless dictator: Panama's Manuel Noriega. The tyrant engrossed in colossal drug trafficking by partnering with the Medellin Drug Cartel, murderous rule, and global power.

This Literature & Fiction story keeps readers and characters guessing. Is Mafia *capo* Frankie "No Throat" Cinelli protecting you or looking to whack you? Can a man and a woman terminate a dictator's rule where "Battalions of Dignity" arrest, torture, viciously rape and murder political opponents and foreign intruders? Every step forward brings risks. The line between friend and enemy is never clear. And danger is always near.

Readers who enjoy thrillers, crime stories, and real-world history will find this book hard to put down.

Strong Characters with Real Struggles

At the center of this Literature & Fiction story are two strong characters: FBI agent Jaime is motivated by the demise of her step-father, Doctor Hugo Spadafora, a true-to-life Latin American freedom fighter. His tortured last moments alive are preserved on a recording still held in CIA files. Criminal lawyer Lee is haunted by the Kelly murders, particularly the killing of his dear friend Kell.

FBI special agent Jaime and counsellor-at-law Lee's pasts shape their choices and push forward, even as danger nips at their tails on their run to hell
