**LOAD.
SECURE.
DELIVER.**

Launched in 2006, our journey began with a small Logistic Brokerage business - UAA, SA Freight. Since then, the SAF Group was born and became a well-known and reputable road freight logistics company in South-Africa.

Specialising in bulk and break bulk transport, we provide efficient and reliable transportation services to a diverse group of clients throughout the southern parts of Africa.

Utilising an integrated, multimodal approach, we provide capacity-oriented solutions centred on delivering customer value and industry-leading service.

Since our inception, we have transported millions of tons of cargo to our client's satisfaction.

Our knowledge and understanding of the industry and its requirements, have allowed us to evolve into one of the leading road freight logistics companies in South Africa. Experience has helped us grow a business model that ensures above-average service levels that have resulted in long term relationships with our clients.

Even as a top of the line Road Freight service, our roots for trucking remains the core of our business.

Our drivers are handpicked for experience and efficiency, ensuring that the main priority stays with the cargo. In addition, our freight is monitored remotely, 24-hours a day, 7-days a week – Ensuring security and time efficiency.

Complicated logistics are our specialty.

Our Vision

We will provide the best transport system which is safe, reliable, efficient, environmentally friendly and satisfying to both users and operators. We offer cost effective and problem-solving solutions that assist our customers in achieving their objectives. *We will be the most valued business partner to all our clients*

Our Mission

We forge long-term relationships with key clients, that include supply chain management and logistics, as an integral part of their strategy. *By working together, we strive to drive down costs, add value and function as an extension of our client's core business.*

We know that our company's greatness comes from our employees. We look out for all of our crew. We provide what our crew needs to feel great about going to work.

THE SAF GROUP COMPANIES

SAF CARRIERS (PTY) LTD. | VRT LOGISTICS (PTY) LTD. | KRUGER INVESTMENTS
ROADMAN CARRIERS (PTY) LTD. | SAF LOGISTICS (PTY) LTD.

Logistics. Earthmoving.

Although we specialise in transport within the borders of RSA, we do offer road freight services to neighbouring countries such as Zimbabwe, Zambia, Namibia, Botswana and Mozambique.

With our fleet of Front End Loaders, Bulldozers and ATD's, we offer a wide range of services to our clients should the need arise. These services will typically be on longer term projects, since the units are left at the area of operation.

Services include, but are not limited to:

- * Stacking and Stockpiling
- * On-site moving of cargo over short distances
- * Loading of load trucks
- * Digging and loosening (ripping) of surfaces prior to loading or stacking.
- * Road maintenance.

Our fleet comprises of 36 - to 50 Ton Side Tipper Interlink combinations.

We pride ourselves on making ethical choices the center of our business plan.

We use the latest technology and improve consistently and constantly without neglecting safety.

Apart from our own fleet, we also have affiliated fleets, comprised of the same configurations as SAF Group's.

Insurance.

All our vehicles are comprehensively insured and have Goods in Transit insurance of R500k as standard. Should any customer require higher GIT cover, we adjust this value accordingly.

Satellite Tracking.

We make use of Pointer Satellite Tracking due to their holistic approach to Fleet management services that addresses every aspect of managing our fleet, ensuring that safety is a priority, efficiency is embedded, and vehicle - and driver security is enhanced. Pointer is designed as a solution that is tailor-made to exponentially increase the benefits derived through continuous improvement and maximum technology utilization.

Drivers & Training.

SAF professional drivers follow road laws, are courteous to other drivers and sets a good example on the roads.

From application to truck, a driver needs to complete a literacy test, practical driving test, criminal checks as well as a driver efficiency test to ensure that all criteria are met prior to us entrusting the driver with our vehicles and our clients' cargo.

Maintaining & Caring for our Fleet.

Our main maintenance depot is based in Heidelberg (Gauteng), from where all planning and co-ordination is done regarding the maintenance of our vehicles.

All truck tractors are serviced and maintained by the OEM to ensure the highest standard of effectiveness and reliability. We manage strict preventative maintenance schedules and procedures to ensure maximum vehicle productivity and availability and to minimise downtime due to on-road breakdowns.

Our Standard.

RTMS is an industry-led, voluntary self-regulation scheme that encourages consignees, consignors and transport operators engaged in the road logistics value chain to implement a management system (a set of standards - SANS 10399:2012) with outcomes that contribute to preserving road infrastructure, improving road safety & increasing productivity.

RTMS certified operators have dedicated plans in place to focus on any areas of concern which will ensure continual improvements and enable them to maintain the highest standards in the industry for continued compliance.
