ECAS CLUB STATEMENT

Incident at Beauchamps: Vandalism and Theft

Dear Members,

The committee wishes to make you aware of a serious incident that took place at Beauchamps over the weekend.

On Monday morning, one of our members contacted us to report that the site had been vandalised. Both of our aerator pumps had been tampered with and thrown into the lakes, and several other items were missing, including our defibrillator. The damage is estimated to run into thousands of pounds.

We believe this may have been a targeted incident, and it has been reported to the police. We are now clearing up the site and attempting to repair the pumps and other equipment.

Security measures

We are arranging for additional CCTV to be installed on site. In the meantime, we suspect that the gate was left open on Sunday night, so we ask all members to take extra care when entering and leaving the site by:

- ensuring the gates are locked behind you.
- scrambling the combination on the lock after use.

Information requested

If you saw anything suspicious over the weekend, please contact the committee as soon as possible so that we can pass the information to the police to assist with their investigation.

Thank you for your support and vigilance.

Kind regards,
ECAS Committee
