SHEPHERD-SHAMBURG CHAROLAIS & ANGUS

Private Treaty Bull Sale

OPEN HOUSE & SALE KICK-OFF
SATURDAY, FEBRUARY 26, 2022
NOON | COMPLIMENTARY LUNCH
1:00 PM | BID-OFF

Sale Location:

At the Farm | 1308 Quebec Ave | Stuart, IA 50250

From Stuart exit on I-80 (Exit 93):

3 miles south on Stuart Road. 4 miles west on 130th.

From Menlo exit on I-80 (Exit 88):

3 miles south on Pinewood Ave. 1 mile east on 130th.

How the Bid-Off Works:

All bulls will be listed for sale with a base price. Interested buyers can commit to the base price listed for the bull(s) they are interested in. If more than one buyer is interested in the same bull, a bid-off will take place at 1:00 PM on Saturday, February 26 until a winner is determined. Buyers need not be present to place bids but must be available by phone at 1:00 PM. Bulls with multiple buyers listed will sell first in catalog order. The bid-off will start with the Charolais bulls with Angus immediately following.

We will also have several individuals available sale day to take phone bids during the bid-off. If you purchase sight unseen, we have a 100% satisfaction guarantee.

If any bulls are still available, they will be sold privately on a first come, first serve basis after Kick-Off Day. Bulls are considered sold once payment has been received.

Sale Consultants:

Wes Chism | 281.761.5952

Myron Benes | 402.741.2040

Donnie Leddy | 605.695.0113

Videos:

All the bulls have been videoed. The videos can be found on our website at www.ShepherdCharolais.com or YouTube channel approximately two weeks prior to the Open House and Sale Kick-off.

Trucking and Delivery:

Free Delivery on bulls within 250 miles or credit towards the first 250 miles. \$100 will be deducted from each bull if taken home sale weekend. This applies to purchases over \$3,000.

Health:

Charolais bulls have been semen tested and passed a breeding soundness exam. Angus bulls will be carcass scanned and semen tested mid-March. All bulls are virgin bulls unless otherwise noted. They will sell with proper health certificates and test for intrastate travel issued by Stuart Vet Clinic, Stuart, IA. They have been boosted with ViraShield 6 and poured with Cydectin. All the work has been done. They are ready to turn out and go to work for you.

Feeding & Care:

For your convenience, you can leave your bull here to continue to be developed until April 1st. This service is provided to customers free of charge for the base price listed on each bull. After April 1st, there will be a charge of \$4.00/head/day. We will do everything in our power to keep the bulls safe and healthy. However, once sold, they become the property and risk of the purchaser.

Dear Friends and Fellow Cattlemen,

You are personally invited to our Open House and Private Treaty Bull Sale Kick-off on Saturday, February 26, 2022.

Join us at the farm just outside of Stuart, IA. The bulls will be on display in this relaxed atmosphere for both our customers and the animals. It gives us the opportunity to visit with you and the opportunity for you to see the heart of the operation. Even if you aren't in the market for a bull this year, come join us for lunch. Walk through the bulls and see how the bid-off works.

We are honored that you have chosen to look at and consider the bulls in our sale. Our goal each year is to improve from the year before. That means evaluating what is working and what we can do better. We are excited about both the Charolais and Angus bulls we are offering for sale this year. We feel the quality continues to improve and this year's bulls are better and the offering deeper than previous years.

This past year, we re-evaluated our feeding program. The bulls are still bucket fed and walked through every day. We want the bulls to be calm, used to being around people, and easy to handle. However, we switched to a more ruffage-based feed. We think this is a good switch but want to hear from you how the bulls hold up during breeding season. That is the true test!

One thing that hasn't changed is our commitment to you, our customers. The biggest compliment you can give us is returning to buy a bull or recommending us to others. Your success is our success. The sale doesn't end when we deliver the bulls. The relationships we have with each one of you is what is really important. We enjoy seeing you, chatting about your family; life and cattle; hearing how the bulls and calves are doing; getting pictures and staying in touch.

You are always welcome to stop by to see the bulls. They are penned, tagged and are available to be evaluated at any time. We are always happy to have visitors.

Please don't hesitate to contact either of us if we can be of any help with your bull selection. We look forward to doing business with you.

See you on February 26th!

Sara and Dan

Bull Guarantee:

All bulls are guaranteed to be fertile and come with a one breeding season guarantee. This applies to reproductive soundness and feet. Breeding season is defined as 90 days following the first turn out of the bulls. Please notify us as soon as possible when an injury occurs. Injuries must be examined by a veterinarian. If a suitable bull is available for replacement, we will replace the bull. If there is no replacement available, you will be given sale credit at our next sale towards the purchase of a replacement bull minus salvage value.

Supplement Sheets:

We will have supplement sheets available on our website Thursday before the Kick-Off. Charolais will include scrotal measurements, carcass data, frame scores, and current weights. Angus will include yearling data. This information can also be emailed or faxed upon request.

Base prices will be available upon request in the same time frame.

Charolais Bulls

It's hard to know which one of these bulls to start the catalog with. The first 3 are half-brothers out of M6 Cool Rep and outstanding dams. The other two also have Cool Rep in their pedigrees and go back to the M6 Ms Gain & Grade 552 cow. If you're looking for some consistent genetics and progeny look no further.

Here's a special bull out of a favorite cow who has earned her way into the donor pen. His dam, 5582, has an average weaning weight ratio of 111 on 4 calves. Her first calf, SAS Cool Ledger 8010, was retained for in-herd use on heifers (sire of Lots 10-12), making his mark on the herd. SAS Adair 2110 is a 3/4 brother. He's more impressive in person than his picture shows. Top 10% Mtl; Top 15% WW; Top 25% YW and SC

Using EPDs for Selection:

Cattle Evaluations use the term Expected Progeny Differences (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait relative to other sires in the analysis. The key word is "difference". The EPD itself does not imply "good" or "bad" performance. But rather, the EPD gives a prediction of the average difference to expect in the performance of a sire's progeny relative to other sires in the same analysis.

Charolais Breed Average EPDs:

CE	BW	WW	YW	Milk	MCE	MTL	SC	CW	REA	FAT	MARB	TSI
