Road Committee 2023 Road Maintenance Plan

AURORA-Corner of Aurora and Cartwright eroding the road, needs drainage cleaned and material added. Culvert cleaned and drainage improved on West side of Aurora. East side needs drainage cleaned. Aurora needs drainages cleaned and graded. The existing materials need to be compacted.

BARREL SPRINGS- Needs ditches cleaned, sub and surface materials needed. Grade and crown with several inches of materials added. Many deep ruts.

BUCKEYE – Road needs grading and crown. Ditches need cleaning, driveways draining on to road causing erosion - needs material added to low "mud pit" areas

BULLFROG-South Bullfrog needs drainage cleaned, grading and crown with material added. Water has eroded the road to one lane. The corner of Bullfrog and Northstar is not draining correctly.

BULLION- Needs drainages cleaned, the road is narrowed to one lane, Grading and crowned with material added. Many deep mud areas.

CALAVARAS – needs grading and crown, culverts cleaned and drainage cleaned – property owners driveway draining onto road causing erosion (see picture)

CARTWRIGHT-Needs asphalt grindings retrieved from ditches and applied to road to build it up, drainage is blocked by grindings that were placed in the ditches, those areas have overflowed and eroded several sections of the road. Materials should be retrieved from ditches and placed on road to build it up. Culverts cleaned, graded and crowned with material added to all low areas. Upper Cartwright has been reduced to one lane, that lane has several areas of water running down and across the road. The ditches are in bad need of cleaning and possibly creating new ditches and widening the road. Lot 320 needs culvert or possible swale as the water runs right down the road. There are several areas where a vehicle will bottom out.

CASTLE PEAK – needs grading, drainage cleaned, culverts cleaned, material added to "mud pit" areas. Needs a turnaround for emergency vehicles.

COMBINATION-Drainage cleaned, graded, crowned and surface material added

CRESTVIEW CIRCLE – NOT MAINTAINED AT THIS TIME

DRY GULCH-Needs grading, crowned, drainage cleaned and material added.

DRY LAKE-Needs to be widened, it is very narrow, ditches created and existing drainages cleaned. Sub and surface materials added after grading and crowned.

FANDANGO PASS-Ditches cleaned, low area that puddles between Gieger and Bullion graded and material added. Fandango needs a turnaround for emergency vehicles.

FIVE MILE WEST-To muddy to drive safely.

FIVE MILE EAST-Remove brush and debris from ditches. Surface materials, Could use a turnaround for emergency vehicles.

FLATIRON- Many areas of Flat Iron need ditches created, grading, crowned and material applied.

FRYING PAN-Ditches full of rock, debris and native soil. Should be retrieved and placed on road. Grading, crowned and more material added. Check to see if culvert is needed at Palisade.

GLOBE – Needs Grading and crown. Drainage should be cleaned and culverts cleaned

GOLDFIELD-Needs grading and drainage cleaned, check culverts. Goldfield was improved by the resident, most of the road material held up. Needs grading. Many areas washed across the road due to blocked drainage.

GRANDE-Low area that puddles by the furthest north pole near Graves. Check drainages, clean ditches as water drains west through one acre lots at SW corner of Graves and Grande. Grading and crown with materials added.

GULLY-Needs ditches, sub and surface materials added, Turnaround needed for emergency vehicles.

HAMILTON- Areas of Hamilton very muddy and needs to be graded with materials added. One culvert that needs to be cleaned and checked for function.

HANAPAUH-Hanapauh has a lot of excess material on roadway that is not rolled or compacted. Needs drainage cleaned in some areas-has minor mud areas.

HIGHLAND – corner of Highland and Panamint culvert plugged causing drainage to pool and flow over road causing erosion. Road needs grading, crowned, drainage cleaned and culverts cleaned.

LIVERY-Has received many improvements the last three years. Check drainage. From Calavaras to Hanapauh sets a good example of the standard for all HRPOA roads that was achieved with road rebuild of 2018 and 2019 and should be maintained.

LOST BURRO-Very muddy. Ditch cleaning, grading and crown. Surface materials added. Needs turnaround for emergency vehicles.

LOUSETOWN-Water running across road, culverts need to be cleaned, graded and crowned. Drainages should be checked and cleaned.

MUSKET - Musket has rivers running down it, needs drainage cleaned, culverts checked,

graded and materials added. Turnaround needed for emergency vehicles.

NORTHSTAR-Corner of Northstar and Aurora has drainage problems, needs drainage cleaned. Northstar needs culverts installed and the current culverts cleaned. There is an old culvert that is too small for the job that needs to be replaced with the three foot culvert that was purchased four years ago installed. Graded and material added

OVERLAND-Overland from Barrel Springs to Frying Pan needs ditches cleaned. Culvert needs to be checked. Appears to be non-functional. Grading, crowned with surface materials added. Also needs turnaround for emergency vehicles.

PALISADE-Palisade near lot 365 needs ditches created or maintained. Grading, crown and materials added.

PANAMINT- Corner Highland and Panamint culvert plugged causing water to flow over road (see picture) needs grading, crowned and culverts and drainages cleaned. Several driveways drain onto road causing serious damage (see pictures)

PHOENIX – Has no ditches, would need two culverts. NOT MAINTAINED AT THIS TIME

PROSPECT-Needs grading, ditches and materials added

REMINGTON-Needs grading, crowned and ditches cleaned. Sub and surface materials added.

ROCKY- Drainage cleaned, graded, crowned and materials added. Some private culverts run onto road

SCORPION-Road in poor condition, one area of the road is very narrow and not sure if a fire truck could pass. Needs drainage cleaned, graded and crowned with materials added. Mountain side in narrow area cut back to widen road for safe passage.

SHERIDAN – Sheridan needs ditches, grading, crowned with sub and surface materials added. Turnaround also needed for emergency vehicles near lot 301.

STOVEPIPE-Stovepipe has sections that are solid granite, needs drainage cleaned, graded, crowned and materials added. The bottom of Stovepipe where it joins Cartwright is a flood area. Needs drainages cleaned. Turnaround needed near lot 398 for emergency vehicles.

TOLL – upper part needs grading, crowned with materials added and drainage cleaned – lower part near lots 001 and 002 are very dangerous. Also needs turnaround for emergency vehicles.

TYBO-Several areas where water is eroding road. Drainages cleaned, graded, crowned and materials added. Many driveways are draining onto road.

UNION – ROAD NOT MAINTAINED AT THIS TIME – Needs culvert installed at Union intersection. Use at your own risk.

VERMILLION-Water crosses the road in many areas. Possible culvert needed. Drainage checked, grading, crowned, sub and surface materials.

VICTORIA-Ditches cleaned, graded, crowned, sub and surface materials needed.

WHISKEY FLAT-Rutted, needs drainage. Grade, crown and materials added. Clean existing drainage.

WILDROSE – Very muddy, rutted. Ditch work needed. Grade, crown, sub and surface materials needed.

YELLOWJACKET-Water across the road north of the ravine. Ditches cleaned, graded, crowned and sub and surface materials needed.
