Design Engineer

Location	Grand Prairie, TX
Work Arrangement	Full-Time, Worker will Telework < 50%
Clearance	Secret

Grit Government Solutions is currently looking for a Design Engineer for its customer based out of Grand Prairie, TX.

Responsibilities:

- Supporting the production programs by identifying and resolving production issues, defects, and failures.
- Work closely with cross-functional teams to develop and implement viable solutions, often in time-sensitive situations.
- Participate as a key member in the Material Review Board (MRB) process, including reviewing non-conforming hardware for performance impacts, identify appropriate root cause and ensure corrective action is taken to prevent recurrence
- Coordinate effort within the Mechanical, Quality and Manufacturing team
- Support weekly meetings to review status to leadership

Required Experience:

- Candidates must have a Bachelor's Degree from an accredited university, preferably in an Engineering related field.
- Candidates must have at least 2 years of experience with Geometric Dimensioning and Tolerancing in accordance with ASME Y14.5 and ability to perform tolerance analysis.
- Candidates must have at least 2 years of experience with Creo design software
- Candidates must have at least 2 years of experience with Root cause and corrective action experience
- Candidates must have at least 2 years of experience with reading engineering drawings, documents, parts lists and specifications
- Be able to lead investigative effort and report status to interdisciplinary teams
