LOOK Assessment

A Sexual Interest / Attraction Test For iPad

- Spanish & English Versions
- For use on adult & juvenile males and females
- People with intellectual disabilities
- 14 Categories of attractors: Infant to Senior
- Diverse ethnicities
- Supported By Research

"Many of our evaluation instruments are clinically valid but boring to both the user and the clinician. Not so with the LOOK. When I give the LOOK to a client, they quickly become interested, motivated to use a modern tool and easily understand the iPad interface. The images are crisp, clean and contemporary. The data generated is visually easy to interpret while mining deeper into the individual data elements is simple. I'm so glad our agency took this modernization."

Gary Reser, PhD, LPC

Owner, Forensic Evaluation & Treatment Services

- **LOOK Assessment is a cost effective, unlimited use test with an annual subscription.**
- **It is easy to use, includes training and technical support.**
