Eyelashes

EYELASH EXTENSIONS

Eyelashes appear thicker, fuller, and darker with semi-permanent extensions which are attached to each individual eyelash. Extensions are water resistant and look and feel very natural. Customize your look to acheive desired effect.

CLASSIC EXTENSIONS Natural-looking lash extensions. Applied to each lash with a 1:1 ratio (one extension on one natural lash) Allows you to achieve an understated, natural enhancement.

HYBRID EXTENSIONS A blend of Volume and Classic, Hybrid offers a varied texture and more volume than classic but not as bold and dramatic as Volume.

VOLUME EXTENSIONS Offers you a full, better-than-falsies look that gives you bold, dramatic results.

Body Cavitation & Radio Frequency

CAVITATION & RADIO FREQUENCY

Cavitation uses low-frequency sound waves to burst fat cells, transforming them into free fatty acids which are naturally disposed of by the lymphatic system. Radio Frequency is a technique that is used to tighten the skin can also be used in the reduction of fat.

The combination of these two treatments results in the reduction of visible cellulite, wrinkles and sagging skin. Improves skin's elasticity. Tightens and tones.
