Yayloop.com

Welcome

Welcome to yayloop a one-stop resource hub for all your needs. Whether you are here to start a new life path or to expand your existing network, yayloop offers a myriad of resources to help build a foundation from finding the perfect home to exploring new ways to open the doors to greater growth opportunities on a more stable foundation that sits on a more progressive track for human service and its natural processes..

We are also an organization that see value in human progress not so much on an economic level but rather on a more progressive foundation where mental health and its natural growth processes is the focus so that human relations and its institutions are positioned for growth and channeled more effectively so that there is minimal error in its path and course in history.

Yayloop is also the main service provider for the mink card service network. We are also built with an historical presence and launched under a 50-year window and in its first wave. Therefore, the yayloop service manual is a complete roadmap built with great precision, and every edition will include a more progressive plan as we progress over the years enhancing our purpose.

Best Regards

Ann Helmsberg

01

ELIGIBILITY

This section includes our S1 directive, national population referendum, occupational scaling system,, currency exchange (keros), clearance access cards(CAC), magistrate services, and GCI data.

02

RESOURCES

This section provides a site tour for our service network that serves as a more progressive path to human growth processes that form the basis for functional communities and support systems.

03

FRANCHISES

This section provides information on franchise opportunities in our doullery market (doe'la're) which are service facilities with stopovers and service stations that serve as an anchor for budget travelers.

04

CONTACT US

VMAT is a virtual maintenance and ticketing system with its own proxy web browser for secure communications and 24-hour support by appointment, video call, and emergency response hotline.

Our Mission

“Yayloop mission is to help people live better by changing how the world envisions the world around them.”

The Eureka

The eureka clause is an S1 directive) and clearance certification that set standards on zonal architecture for property developments in our service network, along with UCC codes for zoning plans, GCI data,, and clearance access card requirements for administrators, program participants, and service employees.

Municipals

Municipals are designated areas of land used for emergency aid and medical support.

- ☑ **Medical**
  Ann Harbor are urgent care facilities with special grant programs for low-income families and travelling units.
- ☑ **Housing**
  Supportive housing is a housing division with emergency response services and outreach.
- ☑ **Transport**
  Municipals provide 24-hour emergency transport services and holding stations to locals and migrants.

Bordered

Bordered sites are relief communities with a higher level of security and support.

- ☑ **Quad**
  Quads are fully developed relief sites with housing, services, community food services, and pavilion parks.
- ☑ **Semi**
  Semi-bordered with humanitarian and training sites (Fort Bennington, Fort Hicks, Yellowstone, Soho sites, and Garden City.
- ☑ **Sect**
  A sect is a religious segment with U.S. favelas which are living quarters for practiced members of the genso faith.

Provinced

A city province is an area of land that is designated by postal code in a region or city border.

- ☑ **Agriculture**
  Food services (Machoni meal stops and drop in markets) and manufacturing hubs are in provinced zones.
- ☑ **RMA Sites**
  Reduced mortgage agreements and housing options are designated to provinced city zones.
- ☑ **Gap Travel**
  Gap travel services are comprised of five divisions: bramies, doulleries, stop and drops, Amway bus lines, and yumi stations (uy'me)..

UCC

Reserved – Reserved sites are service zones for clearance access cards that are issued through membership programs, service employment, client services, and special government referrals.

Public- Doulleries (do'la're).) and baus certified stores are public sites with 120 property sites that ere managed by our franchise network and special subsidy meal programs that expands reach to the public.

Green zone- Green zones are special installations (Fort Hicks and Fort Bennington) used for joint training, protective services, and wartime developments that operate under city ordinance and federal law.

Quarantine – Quarantine zones are special housing developments used for monitored living assistance in an intensive care environment for victims of crime, war veterans, and high-risk families.

Temporary – Temporary zoning are areas of land with a low safety index score and demolition codes that serves as a statute of law for temporary zoning that is often used for emergency aid and support.

Militarized – Militarized zones are areas of land that have curfews,24-hour rover services, and a strict code of conduct.. Militarized zones are also used for reconnaissance training and deployment.

UCC

Prohibitions

Transverse activity is journeyed activity into the Earth that interfered with human life and identified as transverse activity or spherical dynamics in human history linking into Earth dimensional spheres and spatial cycles ("resourcing eras") that ultimately disabled human life through ruthless systemization that led to a great capture of these travelling units and a transition into human poverty and their homeless segments for close observation and studies of these travelling units that lived in a spliced dynamic of human anatomy which falsified human existence, strained human history, and played a major role into civil rights issues imposed on intruders of the human land that ultimately lacked in mental focus as the transition carried greater institutional risks that linked into the core of the nation's operations and advancement segments further developing a non-human race that do not carry the cognitive capacity or moral conscious to live under human process and service but rather gravitated towards the conditioned state of their union and reality built in union that later exposed the most infamous and blind attack on the human race using biochemical warfare and high radial activity into Earth that displaced human life and its natural existence and led to mass coverups, political intervention, and a greater loss of human manpower to include their militaries and core operations in their government that required a mobile presence to secure the nations. Additionally, spatial bloodlines have been prominent in our human race for centuries and resulted in a major shift in human DNA and a breach of human ethics and its community building environments where humans continue to place under close observation linked to stem programs on Earth where most human births have been transitioned through the fetal stage or altered and used as an energy source fueling light into transverse planets (spheres on Earth) through a splice in human anatomy and a shift it Earth's solar energy and political environment. Thereby, transverse nations shall not fall under human law when there is no mastery of its mental practice to alleviate vast error in union that have resulted in heavy breaches into the Earth and reconnaissance missions in human history..

Limitations

The canvas is a clear air policy with prohibitions and limitations that set standards on the reduction of air pollutants, and energy consumption, and spatial misalignment to lower transmission levels in our communities and scattered sites.

Under the ordinance of law, we banned certain energy and transmission sources from commercial and residential properties, and the ban includes smart lights, power stations, personal furniture and mattress items, televisions, computerized refrigerators with oversized filters, microwaves, toaster ovens, crockpots, steamers, grills, air fryers, sub network mobile phones (mobile virtual network operator), cable antennas and satellites , landline phones or equipment-based phone services (due to port out scams), HD computer screens and projectors, hotspot devices to include hotspot ports activated on cellphones, and energy sources that use AI technology or remote access control panels such as washers and dryers.

Additionally, all third-party pesticides and chemical cleaners are banned, and property sites provide Waulo™ products which are both free and low-cost to sanitized homes, propertity sites, and chemically layered and coat to minimize chemical induction into Earth air properties. Weakening their air stems making them for susceptible to intrusion and heavy breaches and porting activity into the Earth. If you use a property-owned laundry facility, outside laundry detergent is not permitted inside our washers and dryers except Waulo detergent pods ($0.10 per pod). There is also a ban on comfort and service animals and greenhouse items such as soil, seeds, and chemicals. There are also prohibitions on vehicle parking and inspection requirements for vehicles parked and navigating through our communities and vehicles that fail inspections and identified as porting vehicles into the Earth that is linked to heavy criminal navigation on Earth. And resourcing eras in the Earth. Therefore, porting vehicles are identified by its chemical properties and structural elements and towed and dismounted at city forensic junkyards that are funded and inspected by forensic analysts and their biotechnical warfare division.

GCI PERCEPTION INDEX 2026

GCI perception index aggregates data from adhoc reports and HUMINT data analysis on grand corruption activity to determine the national safety index score for a geographic region.

Cross-Examination

The GCI perception index reflects on the United States historical atmosphere and institutional elements that lived under a political state that shielded private interests and shifted the nation's perceptual realm into a more dire state on security and union.. The Golstone Era also played a major role in a lot of historical positioning and decision making for our institution that led to an independent reconstruction era to restore order and balance in nations with a healthy divisional divide that serves as a model institutional and historical framework for future human generations. Therefore, we divided our cover map into divisional segments called bilateral states and capsule cities, eco-districts (foreign network), grid cities, city provinces and municipals with each division carrying a different segment of care. The key issue is the inability to stabilize the human generations without developing into warring factions or territorial groups associating its growth processes with the wrong. elements of teachings and collaborative segmentation. Moreover, the enormous amount of sitting corruption in the American nation contributed to its influential presence and demarcated structure that continue to be passed on as a natural mental institution and reality state for the nation's growth process and heritage in each state culture that dilapidates its growth processes through a heavy shift in the nation's social apparatus governing both its unionization processes and receptive state in the most crippling way that benefited their institutions that were identified as psychiatric entities and criminal profiling segments derailing the nation's growth through heavy tamper of race, institution, and perceptual identity. The Golstone Era was also a quiet war period that reshaped American values and captured a constant breach of human process that lacked in bearing while shifting the perceptual realm into a political hold on identity and union that favored tradition and the benefits of its unions. Moreover, the internalized racial dynamics and stagnant growth proven to carry a burden of risk to unify the mass human culture into a cohesive structure or hopeful tasking as historical trails has remained disguised and stagnant.

National Population Referendum

The **national population referendum** (NPR) is a census data system that set standards on population, and demographic statistics and NPR data is stored in our HARP database which is our housing administration and record portal and our central record management system with security access levels and an affiliate program.

Minkcard.com

12M

Administrator Accounts

The mink card program is a research foundation that later holds a commission as a subunit of government (referred to as the Astral Government) with its own judicial processes and service network that serve as a security infrastructure for our institution. The bridge population for this segment also includes 3 sponsored accounts per household.

Yayloop.com

55M

Administrator Accounts

Yayloop (.com, net, tv. .org) is the main service provider for our service network featuring a customer service portal (VMAT), reservation system, pivot service for email and private messaging, invoicing and payment portal, general holdings, certifications, appointments, NARC registrations, and special clearance reviews.

Dailyrun.tv

12M

Administrator Accounts

The daily run (,tv, .org or dailyruntv.com or nydailyrun,com) is an online publication syndication network featuring field stories, documentaries, bin marketing, commentary, brand promotions, and an exploratory platform to expand your network. The bridge population for this segment also includes 3 sponsored accounts per household.

Tabanul.org

4M

Administrator Accounts

The tabanul is a fellowship community for the genso faith that offers many avenues for growth.. The genso religion is also :a branch of Christianity that taps into an improved system of thought and inhabits a trajectory that originated in United States in the 21st century and became more of a scientific endeavor into human culture

National Origin Index

"We are innovators of the future and critical thinkers of the past."

The **national origin Index** is used to identify "Native American Polynomics" of Maluko Ancestry which is a polynomic bloodline that bridges race and institution into a unified system. Therefore, all members of our community must have a quantum rating of 93% or higher (or a sponsored party) to designate as a Native American Polynomic.

Polynomics

Polynomics is a political group that trace back to the Golstone Era which was a political era that reshaped American history with a reconstruction era and shared values in its community building efforts to restore balance and civil order in the American nation by bridging race and culture into a unified system that offered a greater human service that sat on a more progressive track with light conservative values that extends one's experience to more knowledgeable insight and gainful experiences that still allow them to stay connected to their own values.

Most important, Polynomics live by a strict moral code and not so much by collective process which enables a polynomic to operate at a higher moral capacity where reasoning and perception are at its best making the human experience less induced by mental intrusion. Polynomics are also less socially induced and more critical of bonding elements when there is no true foundation or inhibitors that question the authenticity and its conditions as the human world and its dynamics continue to be an observational track for their mental institution and learning environment.

The genetic lineage were mostly caucus groups and mixed identities that migrated from parts of Europe, and North America into smaller American communities for a better-quality life while adopting a cultural dynamic that separated union from individualism to offer themselves more opportunities for growth and independence. Moreover, polynomics always place their mental health under constant review to detach from harmful elements that tampers with the natural thought apparatus. For those reasons, Polynomics are also identified as humanitarian stewardess with a greater sense of reality positioning and human service that holds a higher intellectual ranking and thought apparatus.

Additionally, caucus groups were maluko bloodlines that identified as crusaders, and oppositionists of political eras in American history that reshaped the nation's political environments with reconstruction eras that redefined human culture shifting out traditional values and its historical dynamics with evolutionary processes that enabled better growth opportunities and a more dynamic realm of human conditioning and psychological positioning that yield greater results in its directional path and focus.

Proletariats

Proletariats is an ancient political group that traces back nearly five centuries with high conservative values that sits on a less progressive track with a more restrictive thought apparatus and a less experimental path that limits growth and development making the proletariats less developmental and more prone to impaired growth. For that reason, we do not enroll proletariat without a sponsoring party to ensure there is a human element that resembles that of a polynomic. Proletariats are also collectively driven and induced by their own principles of law and discipline and collective process that may embody a higher level of bias through an intense element of belonging to their own institutional values which serves as the main source for emotional support that requires more advanced computing of a proletariat mental state to identify psychological patterns especially when migrating people of poor mental condition.

Additionally, proletariats also appear developmental but lacks in substance and character that reduces its cognitive ability that should sit on a self-directed spectrum with a higher level of moral competence and reduced sensitivity to differences in which proletariats were identified as sural learners subject to a more chronic state of processing and computing that tampers with one's sense of reality and relatability Proletariats are also more prone to forced positioning that leads to higher levels of risk taking that is often disguised in careered patterns of abuse and sociopathic conversational styles and delivery. Additionally, proletariats require extensive psychiatric oversight because of how they associate with reality that resides in a masked state of narcissistic control and functional illiteracy often plagiarizing the work of others or mimicking the path of rivals .

Thereby, we shall order into review critical assessments into mental health to assess integration effectiveness due to how proletariats are induced into human society as an imaged identity and rhetorical figures that reside under a masked state of human identity with a more chronic stage of neurological positioning and psychiatric unification. Proletariats are also more prone to criminal navigation using their role and status as a monumental, controlled element in affairs and navigating political affairs. This is a critical mental health dynamic built into proletariats security realm that remained corralled and silenced in human histories to shield the major of its stake interest.

The Sequester

The sequester is an extension clause that examines the psychological landscape built into modified states of human identity that continue to dilapidate human processes and the natural thought apparatus to acknowledge the traditioned reality built into human dynamics and institutional belonging and psychological positioning.

General Ordinance

The general ordinance examined the mental apparatus built into language-based cultures and their institutions that reside under a strict cultural dynamic on identity and union due to the bonding elements built into race, language, and institution that develops the human psyche into a psychiatric realm on sameness and emotional response that exposed a lack of awareness into the cross integration process of language-based cultures to include intense psychological groups with a more profound element of culturing and language segmentation that continue to sit on a foundation of trust and union linked to comparative processing of outside dynamics associated with one's innate state of existence and the conditioning elements that build upon a reality and mental position that can be quite challenging to override due to the intense psychological attachment to language and institution that promotes sameness.

Thereby, to lift vast error from our historical track and unionization processes, we barred certain work activities that require working long hours or heavy computing that tend to derail mental health into a more challenged state of processing and cognitive accessibility resulting in poor chemical defenses that triggers that often translate to criminal reach and high emotional reactors. These individuals were identified as neurological entities that do not meet the qualifications for employment or entry into college. As a result, we also barred most college education from the review process when there is faulty programming in a candidate's mental apparatus that derails human service and moral consciousness often seen in advancement segments of poor mental condition that develops the mind into a superiority syndrome and a severe stage of mental psychosis and abusive cover.

Thereby, all job candidates, and college admissions and alumni must undergo an extensive review process with the DRB and medical examiners to ensure those seeking college admissions, and leadership positions or a subordinate role as a public servant are within general health standards to include mental health and cognitive capacity. Most important, these identity systems were also considered high-risk integration segments due to a more chemically induced mental apparatus in relation to language and institution and psychological attachment. Thereby, we seek the less psychiatrically induced where the chemical response is fair in and out of union ("identity groups") to place the mental apparatus onto a more progressive track where there is greater moral depth.

Selective Ordinance

The extension clause examines the mental apparatus built into gender institutions. to lift vast error from unionization., therefore, all gender institutions must fall into the following equilibrium class:

- Must embody an independent nature with a self-induced influential mental platform and autodidact capacity that develops the mind in its own learning environment and filtering system with a healthy sense of identity and infused reality

- Must embody a high moral element in both delivery and consciousness to identify consequential actions and human error that should not reside in a psychiatric realm or restrictive chamber that leads to recycled patterns of abuse .

- Must embody a healthy self-esteem where a proper character has been developed rather than a false element or processing environment that disrupt the natural thinking order resulting in personality defects, and character maladjustments.

- Must embody a higher conscience into mental health and its developmental elements and setbacks so that there is a proper developmental chamber and routine that reflects a healthy mental apparatus and psychological positioning.

Moreover, all persons must fall into the following behavioral track: (1) non warring mental state that leads to a low reactive chemical response and a more stable emotional response system. For example, a person with a low reactive chemical response will vent but it will never lead to physical harm or excessive social abuse intensifying its effect and consequences (2) developmentally prone where the mind is more morally induced rather than negatively influenced, and (3) must inhabit a non-fantasy mental realm to avoid false processing of need and comfort and to put the mind on a more progressive track where it is more developmental and aware and less vulnerable. Most important, the historical dynamics built into human conditioning and its institutions is an area of mental health that requires more precision growth rather than an enslavement class of grave psychiatric dynamic.

Geopolitics

The Canberra act is an internal law that examines the psychological landscape of human institutions, and internal processes to make determinations into functional segments and risk factors which also includes articles of consent and behavioral health dynamics to help transition society into its proper developmental chamber.

Empirical Research

Poverty is a state of mind that affects those who are fully engrossed in its institution in a way that develops the mind psychiatrically on identity and union that shifts the perceptual realm into a grave institutional state on security and comfort. The poverty state of mind is mostly identifiable with how people purport reality which often develop the mind psychiatrically on survival mechanisms to the extent of disrupting its character dynamics that keeps the human mind intact and reasonably balanced. This type of poverty is non-remedial and referred to as institutional poverty and supportive services often develops the human psyche into a more advance state of psychiatric computing (survival chamber) and security culturing that falls under a more dire stage of mental psychosis and psychotic disorders. Institutional poverty also requires intensive inpatient psychiatric care and does not sit exclusive with sitting poverty but also employee roles and advancement tracks that often perpetuates the dynamics of poverty and institution. Therefore, all stages of growth should be monitored and diverted to include college admissions if the mind is not in a developmental stage of moral consciousness and diversion into a healthy reality chamber. Most important, persons marked by institutional poverty require intensive psychiatric oversight even when there is an educational factor that improves the quality of life, institutional poverty is a state of mind that truly never dissolves itself but rather mutates often developing into more severe mental health problems (....chronic personality disorders) which is prevalent in all cultures due to the intense cultural dynamic that tampers with self-esteem and even development and one's sense of reality. Moreover, we strive for stricter laws on stagnant poverty to lift vast error from our institution and historical track. Stagnant poverty is an area of mental health that results in grave institutional belonging and security culturing that dilapidates the learning environment shifting it into a more critical stage on material growth and access. Thereby, we shall summon critical assessments into mental health with psychological assessment to assess the chemical apparatus associated with advancement and its natural stages of growth.. A psychological assessment shall also be ordered into review on immigrant cultures that were identified as herd cultural segments and non-remedial groups due to the institutional elements built in language and institution that puts a strain on new learning environments.

Observational Results

There were also psychological tests conducted in U.S. poverty (...an influential platform in many nations) and the institution itself raised great concerns into the psychological apparatus of poverty and its institution. Therefore, it is imperative that poverty is divided based on mental class so that there is minimal error in one's life path because of how institutional poverty (acute stage) purports reality and community building that determines the psychological exchange in their communities that is often dangerously influenced by survival mechanisms (...e.g. financial aspirations and social belonging) to the extent of corroding the nature. That is why it is imperative to divide poverty based on mental class. The psychological landscape of gender disparities was also factored in along with its historical underpinnings to create a more balanced institution that fosters a healthy mental environment.

The Golstone Era (2011- present) was also a quiet period in American history that shifted the political arena into a psychiatric hold on women culture and its traditions favoring the status quo and the rewards that came with deep associative ties and their unions that provided some form of progress for women through heavy tamper of the perceptual realm and idealism that fueled the criminal networks keeping affairs intact and rhetorically bottled. And, silenced in human histories

Thereby, these institutional affairs questions the psychological apparatus of women identity that continues to fall under a fantasy realm with male identities and security culturing due to how women identity is applied in society as a moving vehicle in high criminal networks that stems from a more highly vulnerable mental state that tampers with decision making and their moral compass and nurturing foundation. Moreover, the Golstone Era fell under extreme psychological racism (...both controlled and traditioned) and psychiatric abuse with acute neurological positioning on ideals and security culturing that stemmed from high illiteracy grouping and insecurity trails in white nations fearing change in security and comfort while capitalizing off the historical dynamics of each nation's history and the hidden unions formed during eras in their history.

Articles of Consent

Article I This article of consent examined the historical path of social poverty and its internal processes. Thereby, we reserve the right to divide poverty based on mental health class (low risk, moderate, and high risk). Unfortunately, we integrate and serve the low-risk classification group which are individuals with a low immersion rate which carries a higher human element of moral consciousness that require little to no supervision whereas a moderate classification requires minimal supervision due to the leveling stage and a high-risk classification requires acute intervention.

Article II. This article of consent examined the historical landscape of slavery generations and its historical patterns that warrants greater oversight of the human generations. Moreover, the historical recycling into the human histories has shown a proven track of deceptive institutional measures to sustain political ideals and the major of its stake interests. Thereby, we shall exonerate the historically colored segments that are identified as Asian ancestry, Indian cultures, Hispanic ancestry, and those of colored African ancestry from our research foundation. However, when there is a human element that is integrative, there shall be an honorable service that considers a non-warring comparable so that there is no forced element of psychiatric positioning that further deteriorates mental health and segmentation process. Most important, historical recycling stems from increased political tension and fear of changes to its political structure and unions that have kept the nations intact but yet dehumanized that led to false processing of human growth and its foundation that shifted society into a psychiatric realm on identity and union that captured a more in-depth view into the developmental process of human culture and it's major shift in reality positioning that led to a overgrowth of human error in the that remained in a quiet stage of remedial care with many recovery attempts that created a foundation for human dysfunction, mistrust, and disguised nature.

Article III. This article of consent examined the dynamics of race and institution. Thereby, we reserve the right to ban certain aspects of culture that are deemed a high risk such as herd identities which are persons of high institutional mindsets that are heavily influenced by their history , language, and heritage that shape perception and how they purport reality. This mental state has been reared into the human generations as a functional segment of their growth and security dynamics with the resultant of a more dilapidated historical foundation that appears developmental because its shared approach. growth processes. Additionally, each culture comes with its own distinct elements and foundation that require a more developed stage of human process and mental preparation for high diversity when there is a channel for growth to avoid placing too much judgment on a particular race or culture to where it develops the mind psychiatrically on identity and associative patterns and grave interests. Thereby, we are mindful and rationalize on a more advance stage of computing and consciousness awareness so that human relations are more stable and integrative. Most important, cultural diversity is not for everyone and may come with lots of discomfort especially if there is a language difference such as an English speaker rambling in English to a French speaker that speaks only French. This can be a form of disrespect or social dilapidation. Therefore, it is imperative that cross cultural relations are built with higher levels of considerations and mindfulness to deescalate discomfort or conflict from observing cues such as non-eye contact, identifiable phrases, or uncomfortable body language.. It is also imperative to open the mind to a more advanced stage of awareness which shall not fall under deliberate channels of abuse or intrusion that disorients the learning process with poor rapport building elements and tactics.

Article IV. This article of consent examined the economic track of families and its growth processes. Thereby, the two-child policy was implemented to serve as an economic track for greater independence and to help reduce economic strain.. Under the two-child policy, all registrants into our service network must adhere to the two-child policy.. We also provide a social welfare benefit when available to low-income families to meet basic human needs.. TAPP serves 120 low-income households and include both a housing subsidy and cash subsidy with a term of 18 months and a lapse period of 12 months to reapply for a TAPP subsidy. TAPP stands for temporary assistance program for needy persons and it's a grant-based subsidy program.

Article V. This article of consent examined homeless segments and the historical patterns built into society and its deployability. Thereby, we define homelessness as a higher stage of human growth and travel (rather than a lack thereof) placed upon mankind to serve as a remedial stage for human growth and its dynamics that are seen as an honorable task that also comes with many rewards at varied stages of growth and development which shall not be mistaken as a less productive path or labeled identity that creates a dysfunctional learning environment that derails proper growth and resides in a recycled realm. Therefore, homelessness is not a system of heavy judgment in our institution but rather a trajectory that human life is placed on to assess their life path. It is also not a stagnant stage but rather a movable process that comes with many obstacles and life choices.; And ,indigents in our institution are referred to as gogies which are travelling units with a higher element of human dignity.

Article VI. The article of consent examined transverse activity into the Earth that interfered with human life. Therreby, the greenlight bill is a body of law that examines the historical dynamics of human existence and its journeyed activity into the human Earth which was identified as transverse activity or spherical dynamics in human history linking into Earth dimensional spheres and spatial cycles ("resourcing eras") that ultimately disabled human life through ruthless systemization that always led to a great capture of these travelling units and a transition into human poverty and their homeless segments for close observation and studies of these travelling units that lived in a spliced dynamic of human anatomy which falsified human existence, strained human history, and played a major role into civil rights issues imposed on intruders of the human land that ultimately lacked in mental focus as the transition carried greater institutional risks that linked into the core of the nation's operations and advancement segments. Thereby, we shall order into review cognitive assessments and mobility tests to ensure there is a working and logical memory path and natural chamber that doesn't interfere with human mobility or require streaming from the human apparatus that dilapidates the human's chemical response system placing heavy strains on brain neurons and neurotransmitters, the cornea, and vocal folds. If there is not a matching dynamic, we shall refer to quarantine segments in the most remote locations with basic human comfort that resembles that human life while reducing access to high stimuli. that triggers chemical reactors. And quarantine segments to include wellness homes are funded by the Bowles Foundation and Arcadia Space Program.. Additionally, spatial bloodlines have been prominent in our human race for centuries and resulted in a major shift in human DNA and a breach of human ethics and its community building environments where humans continue to fall under close observation that is linked to stem programs on Earth where most human births have been transitioned through the fetal stage or altered and used as an energy source fueling light into transverse planets (spheres on Earth) through a splice in human anatomy and a shift it Earth's solar energy. Thereby under this article of consent transverse nations shall not fall under human law when there is no mastery of its mental practice to alleviate vast error in union that have resulted in heavy breaches into the Earth atmosphere and reconnaissance missions.

Article VII. This article of consent examined the historical track of cultural dynamics and its generations while placing an additional inquiry and conditional bans on Caucasian generations that held an influential presence in the human generations. Thereby, Caucasian generations must fall into the following equilibrium class (1) greater sense of independence, , and (2) fair conscious that doesn't fall into a psychiatric realm on relapse history and patterns of abuse. to identify consequential actions that do not sit into a psychological realm on recycled patterns of abuse (2) Possess a healthy self-esteem where a proper character has been developed rather than a false element that disrupts the natural thinking order resulting in personality defects , envy trails, and character maladjustments.

Article VIII. This article of consent examined panning activities that interferes with natural judgment and its proper character elements. Thereby, panning is a common psychological condition that often falls into a criminal realm on providing false or misleading information with the intent to devalue or blemish the character of another person. Panning tactics are often developed in people with existing mental health disorders or grave discontent towards another race or cultural identity that disrupts the natural thinking order shifting the mind into a psychiatric realm on emotional response that often tampers with perception and judgment and transition into a false state of processing and reality. Thereby, panning activity are grounds for immediate removal that can result in punitive criminal charges if pursued.. Most important, panning activity shall not be misinterpreted when there is a valid profile that may often be denied to remain in a safe mental space on identity and association which is another with neuropathic mental condition that stems from a faulty thinking apparatus that lies under a false sense of idealism that dictates how their reality is pursued that voids the natural thinking pattern. And, panning activity is common in all cultures due to how society associate with privilege and status that holds a more dire state on mental health and development that requires proper intervention and a remedial track.

Article IX. This article of consent examined the educational tracks of human histories that shaped perception and ideals for the human generations. Thereby, we banned certain segments of identity that staged human society and questions the psychological elements built into the advancement process and historical dynamics of their unions that have set in a critical state of observation on fraudulent process and grave capitalism that exposed a severe stage of mental psychosis and a dilapidated cultural environments as a proper restoration foundation requires careful observation and precision growth so that there is a modeled system that can be entered into human histories as a generational segment of real growth that does not come with an institutional burden that results in a mismatched learning environment that derails human growth in its natural form which also carries some implications on fraudulent process and coverups in human histories building a human nation based on deceitful measures and stagnant progression which were prime intruders into human reality and its natural state that was heavily modified to a lesser human identity and values that dilapidated the human histories and learning environment with many resets in its cycles and more observation into human growth.

Article X This article of consent examined the psychological apparatus of human biological processes that play a major role in segmentation processes that carries a more concerning element of mental health due to its restrictive patterns of impaired growth and cognitive defects. .Thereby, chemical response tests (CBT) shall be ordered upon registration into the mink card service network and on application for sub services to assess for psychological disorders on common stimuli to determine reactive stages and chemical access points. We shall also render interim access to low-risk applicants awaiting an S1 clearance and/or sponsor.

Unfortunately, we do not integrate people with sexual obsession disorder, material possession dysfunction patterns, and envy transitional states with actionable character elements due to its high chemical reactors that carries a higher level of criminal ranking and increased levels of psychoticism and brain dilapidation which are considered dangerous elements of human society that derails growth processes and cognitive reach and sits in high abuse and predatory action often carrying a more severe stage of psychopathy and sadistic nature.

Thereby, the CBT screening shall consist of the following framework: (1) writing assessments, with a short essay (not to exceed 300 words) on a topic of choice to assess logic and reasoning (2) profile data sheet that includes. full legal name, alias, date of birth, gender, native citizenship, dual citizens, spoken languages, visiting countries,, criminal background history and moral statements if there is a character lapse, family and household size, income, living quarters, occupation, educational history, short term and long term goals, and mental health history and statements of indemnity (e.g. self-care plan),, and (3) video prog to assess chemical response with imaging viewing and a reading exercise to assess reading comprehension, body language, and instant responses such as cues and gestures.

Article XI This article of consent examined the security infrastructure in online databases that stores personal data in virtual databases that have resulted in port out scams, phishing activity, and black boxes. Therefore, we shall enforce biometric screening for virtual platforms. Moreover, a black box is a type of blind intrusion that sits on external networks in outside countries that redirects I.P. use and port IDs disguising it as a local server or external threat when in actuality it is an internal threat often managed by MVNE operators or direct service providers transmitting data to databrokers and high capitalistic communities buying and selling personal data that often lead to blind attacks on individuals or rivals such as identity fraud and port out scams that are linked to these external networks working within the domestic market inside a country which is a trend associated with information gathering activity and heavy mob organization in targeted communities with African generations (gifted spatial bloodlines) under extreme threat and conspiratorial segmentation to benefit from their natural talent and high intellectual ranking.

Article XII This article of consent examined the comfort service industries that cater to male clients that warranted greater oversight of its cultural dynamics in our geographic zones to build up a healthy mental health Thereby, the sumi (su'me) industry was implemented to serve as a comfort service community for male clients 32-68 years old and sumi workers (females) ages 43-76 years old that are certified and start their occupational training in a social development specializing in basal massage therapy that consists of light strokes onto the head, keister, and mamilla.

After a sumi worker, has completed their 18 months of training and educational instructional and graduate to a certified sumi worker (CSW) that can work as independent contractors in public marketing, pet sitting, and shopping services and choose their own specialties, work hours, and retain all earnings.. However, sumi workers are closely monitored during training and on graduation into independent roles. Additionally, all independent bookings with male clients are sent to a central reservation portal ("mediators") and the sumi worker's yayloop service account inbox from the daily run service portal where certified sumi workers can publish gig panels and decline or accept offers from their service account. There is also a sumi guideline handbook that all sumi workers and male clients must always carry during services. Please note that sumi workers cannot work as escorts or sex workers, exchange bodily fluids (e.g. no kissing and no sexual activity), accept food or drinks or material gifts, or travel or dine with a male client and can only meet at designated locations to perform services onsite.

To become a certified sumi worker, the candidate must also have a less induced institutional state detached from the male institution where the female psyche is more prone to fantasy induction and misguidance and emotional instability in the comfort service industry. Additionally, all certified sumi workers must be between 43 to 76 years old with very subtle features that will not draw in high sexual chemistry with a male client.

Sumi workers who graduate from our institution are independent contractors that earn $45 per hour plus tips which cannot exceed 30% of the service costs. Sumies are also required to pay self-employment tax (1099 IRS form) and annual registration fees and provide proof of tax filings to maintain their annual registration. It is important to note that sumi workers who are graduates of our institution can only receive pay through recorded mediums and cash payments are not a valid form payment for services or gratuity payments. However, while in training and rotation (2–3-hour shift per day) at a sumi station, all sumies will receive a monthly training stipend of $780 plus a meal allowance each month, and there can only be 23 sumi trainees in training during each training cycle which spans 18 consecutive months with a 9-month probational status.

State of Emergency Bill

"A positive work ethic grows from a healthy foundation."

Introduction

The state of emergency bill is an excise policy that serves as a foundation for domestic peace and civil order when there is a disruption in a nation's security infrastructure and present-day affairs that result in increased political aberration and war bound activity.
The first peace-time order was called the Aqua State of Emergency which was a conditional ban that enforced control over areas of operations that were affected by transverse activity into the human nation that led to a heavy shift in its cultural dynamics and political environment.

To better understand the aqua state of emergency, transverse activity is associated with journeyed activity onto the Earth linked into spatial cycles and lots of indiscretion in political unions that shifts out human life that is often referred to as the big bang theory in human history that was derailed under a different conceptual framework that led to heavy breaches into the Earth atmosphere with low occurrences manifesting prior to year 2021 and a major shift in the dynamics of human culture through heavy tamper of its psychiatric communities and political unions where these events became a part of the human nation's historical track and research foundation with a general focus on distinct spatial bloodlines (and stem programs) that carried a scientific element in medical research and molecular developments that contributed to advance DNA programming and genetic developments that developed into an abusive realm and gravely institutionalized segments of culture and observational tasking into the human nation.

The most active transverse identities were modified bloodlines identifiable through human disorders such as high libidos, mental health disorders, tourette syndrome, cancer, acute autism, attention deficit disorder, and thyroid disorders which made up a vast part of the human race that led to a major shift in human dynamics and reality positioning for the human generations. Most important, the dark brown generations and white transverse generations were prime intruders of the human Earth advancing their species through advance DNA programming that led to the harvesting of human borns (....that were often killed and feared) through heavy sleep induction cycles where human anatomy resides in dimensional spheres.

Moreover, black slavery was a segment of their historical track that led to a major shift in security roles through color grouping and resistance movements that engineered human history into civil rights where native Americans were an extension to these monkey bloodlines and considered the first native habitants of the American nation that linked into white institutional dynamics that extended research into other DNA tracks that favored their genetic similarities such as lighter skin tones and less textured hair which created an acute neurological segment of identity and acceptance in the human generational tracks and natural bonding. Most important, it is imperative for the human world to stay abreast of imported technology into Earth that is also used in human hospitals, and general human industries.

Ordinance

These transverse were also identified as advance monkey bloodlines and experimental bird species mostly farmed in the Southern region of the United States linked into stem programs on Earth that led to a major shift in Earth chemical properties making the human anatomy more susceptible to anatomical shifts through cellularization reduction shifting out the human chemical state of the human and using its physical properties merging it with transverse DNA and anatomical fragments to maintain a presence on Earth that required gravity, cellularization, and skin properties.

These physical elements were identified as human corpse that required electro banding and sometimes a full transfer so that even doctors can function in full brain capacity with the full brain capsule of the human doctor. However, the lower element stream from human brain activity and often causing high chemical imbalance and disorientation into the human brain cavity such as intense headaches and migraines, high irritability, and even acute brain disorders.

These transverse units also carry their own physical properties that dilutes in human air properties and sits in dermis pods inside the human sack often resulting in excessive chiropractic care and bone deformation and even brain surgery and organ support. In the midst of these chemical shifts on Earth, humans were also left with strained vocal cords (...or synthetic vocal strands) which is another extraction component used to stream sound that is often modified to induce a sense of quality and state of presence which is a chemical response element used in certain segments of training to mask corrupt and conspiratorial conditions in their historical track with humans.

Therefore, it is imperative that stem programs are discontinued on Earth to factor in biological differences and the extreme measures required to sustain their institutions which crossed over into an overindulgence in human comfort and a total disregard from human life as time shown that more collaboration was the key to optimal control which led to a major setback in the reality with a great capture and a slow transition out of the Earth into their habitat or euthenization because of their high resistance to exit the Earth in peace which always lead to more tamper into the Earth with more technology and more sitting corruption.

Therefore, security protocols serve as a foundation to restore balance and order in the American nation when there is a major slight it's security dynamics derails peaceful order and civil affairs. The code blue protocol deploys rover services and drills in bilateral states . The alpha protocol deploys rover services and enforces curfews. The code red protocol activates lawless cities (....and good samaritans) disarming law enforcement as human law enforcement was the first core segment to be transferred (...followed by psychiatric services) out which resulted in mass atrocities onto humans to include false medical administration and heavy transporting to slaughterhouses and capsuled jail and prison cells going unseen on human surveillance.

Mental Health Spectrum

"A positive work ethic grows from a healthy foundation."

Introduction

The mental health spectrum division is an extension to mental health care services and was implemented to transition patients onto their proper developmental track with wellness services and comprehensive mental health that develops the cognitive track on a remedial foundation.

Spectrum is an area of psychology that factors in how one purports reality and determine the psychological exchange.. The spectrum exam is a basic psychological assessment designed to assess cognitive capacity, functional status, and moral consciousness and the exam is a timed test set at 20 minutes and administered in a clinical setting with a mental health spectrum evaluator or resident.

Prognostic Scales

The prognostic scale falls into three classifications (referred to as functional disorders) and a DSM sub class if it is determined that a sub class is required for a mental health diagnosis which may be require in some jurisdictions.

Spectrum 1 – Sensory apparatus disorder is a mental health condition that delays learning and cognitive development that often requires acute psychiatric care.

b. Patients that are diagnosed with sensory apparatus disorder suffers from mental psychosis which is a neurodegenerative disorder where people loss some form of contact with reality due to developmental problems that disrupts the natural thinking order and sensory apparatus that associates patterns and a sensory response (i.e. reactive and non-reactive).

Spectrum 2 – Acute neuropathic disorder is a mental health condition that is caused by traumatic experiences that affect how one thinks and form perceptions and ideals.

- Patients that are diagnosed with acute neuropathic disorder often experience constant flashbacks of traumatic events or experiences that may cause emotional triggering, high rumination (revisiting), or a lack of emotion or distorted thought patterns, and acute paranoia that affects perception, and one's sense of reality that sits on a psychosis spectrum track due to the high emotional attachments to the traumatic event.

Spectrum 3 – Behavioral disposition disorder is a mental health condition that is caused by cognitive defects and destructive patterns of behavioral actions that result in a deep decline in cognitive functions and learning capacity.

- Patients that are diagnosed with behavioral disposition disorder often suffer from high irritability, character maladjustments, chronic personality disorders, distorted thought patterns, acute paranoia, high insecurity, delusional episodes, and chronic sociopathic traits that develops the mind psychiatrically tampering with reasoning, perception, and moral dynamic.

Broadmoor

Broadmoor is an infirmary campus and central hub for diagnostic testing, placement services, clearance reviews, treatment services. The spectrum division is chaired by a shaimi which is an experienced neuropsychiatrist.

General Evaluator

- Mental health spectrum evaluators must complete a 12-hour certification course each year and possess a Bachelor of Science or higher and all training is facilitated by the mental health spectrum division.

- There are also other registration requirements to include passing a criminal background check, dissertation screening, and board interview and meet all the requirements for a spectrum certification.

- The dissertation is a mandatory submission that projects a learning capacity in a candidate screening for a mental health spectrum certification that sits on an unmatched foundation of trust and ethical practice.

Clearance Review

The clearance review board (CRB) conducts revaluations and adjudicate treatment plans when there is a filed motion that raises concerns into the ethical foundation of a medical professional practice. The CRB will also determine if a preexisting diagnosis require further screening and/or services or a revocation and self-managed care plan.

Infirmary Program

Broadmoor has five different infirmary programs provides that include inpatient care, wellness centers, wellness homes, quarantine, and diversion and reentry programs.

- Inpatient care – This is a court mandate for insanity pleas that require greater psychiatric oversight. This program comes with a term of 12 years than the patient is transferred to a retention home and probational status.

- Wellness centers- This is a paid membership program that provide emergency beds as needed in 72-hour intervals and include three meals per day and wellness classes and transitional support into a wellness home.

- Reentry program – The diversion and reentry program is a court mandate that diverts a prison term to a mental health diversion program and infirmary for 3 years to rehabilitate an inmate diagnosed with a mental disorder.

- Quarantine sites – Quarantine sites are used for behavioral disposition disorders such as high-profile criminals that require a reduced chemical exchange and lower access points to properly rehabilitate.

The Matrix

The matrix is an excise policy that consists of behavioral tracks that examine lifestyle habits in relation to economic factors to make determinations into risk factors and support systems. Additionally, poverty is a common economic track that affects mental health and shifts society into a more dire state on computing making the developmental track less progressive and more prone to error and institutional abuse.

Empirical Research

.The main problem society continue to face is the lack of awareness that went into poverty segmentation that raised great concerns into the psychological wellbeing of its institution and the inability to achieve a healthy stage of growth and development outside of homogeneity which is a type of cultural segment that live under its own cultural dynamic that often parallels an abusive segment of culturing and ideals.. It is also an institution that tampers with one's sense of reality that often leads to higher risk taking and a false processing environment. This type of cultural apparatus develops the mind psychiatrically with a higher sensitivity level to, differences that often carries a high chemical reactive that leads to higher levels of abuse and risk taking that stems from poor mental conditioning and a lack of emotional intelligence that is often developed in individuals with undiagnosed mental disorders that carries a mobility factor that remains unmediated.

For that reason, we do not integrate people with an intense element of belonging to their race or culture that tampers with one's sense of reality which serves as the main source to high functional abuse that requires more advanced computing of mental health to identify integration challenges especially when migrating people of poor mental condition. Most important, the psychological ramifications are often seen when migrating herd identities into more complex communities where you will notice an adoption style that often carries a disguised nature that appear developmental but lacks in substance and moral consciousness.

The reason why we have become more critical of serving people with a history of substance abuse because the chemical reactor often develops into acute psychiatric conditions (... and often permanent) and acute neurological positioning that transitions the human psyche into an intense security realm that tampers with thought and perception and the sensory apparatus that disorients the developmental process to a phantom state of growth and functional addictive patterns disguised and staged in the advancement process (...imaged persona) and security segmentation. Therefore, an addendum is an extra stage of care in the event an administrative action leads to a judicial hearing and removal from a service network.

Self-Managed Care

Self-managed care serves as a path to healthy cognitive growth that promotes good mental health habits that sits on a more progressive track and thought apparatus:. Therefore, all service clients must fall into one of the following functional statuses that may sit in a remedial realm for better mental health care:

- **F1 Status** – A gogy lifestyle comes with a higher level of dignity and consciousness, Gogy lifestyles do not bear a high security mindset on a material ground. And the lifestyle is synonymous with a nomadic lifestyle. A gogy can also have a fixed home and live nomadically to broaden one's experience and escape the cultural and environmental risk factors that come with stagnant living.

- **F2 Status** – A minot is a precision minimalist that possess under twelve wardrobe outfits, no more than four footwear choices (e.g. slippers and sneakers), basic essentials and gear, and 1 or 2 comfort items. However, a minot lives at the basic human level and outside of a material ground. Minots also extends their experience to a level of comfort that still allow them to stay connected to their own values.

- **F3 Status** – A utorian is an experimental track for those with no experience at the poverty level in the last 12 years. This track offers an independent view into its past and current cultural dynamics to serve as a platform for awareness and a healthy thought apparatus that doesn't sit in a psychiatric realm on identity but rather in a fair processing environment that expands on thought and perception.

Occupational Scaling System

"A positive work ethic grows from a healthy foundation."

The **occupational scaling system** set standards on salaries, and patronage, allowances and service benefits which includes a health insurance premium, split living allowance (SLA), cafeteria meal plan, health club membership (in-network) and patronage allowances (i.e. commission, bonuses, special pay, and overtime), and a rollover pension (exigent fund). The scaling system also includes hiring procedures and board selection review criteria ,

Employees

180K

www.yayloop.com

General employes are assigned an OS rating (entry-level, mid-level, or executive level) based on merit-based score.. General employees are eligible for general service benefits, and the rollover pension is activated after 18 months of consecutive employment in a non—dispositional status.. The annual salary ranges from $42,565-$74.643 with a COLA adjustment each year.

Volunteers

1.2M

www.yayloop.com

The national reserves component (NARC) is a volunteer service that splits time between actual flagship duty (prime occupation), and service time (volunteer duty) that ranges from 25-55 hours per year.. There are two branches of service: constable and taskforce, and three enlistment contracts. National reservists are eligible for per diem, and service benefits.

Contractors

320

www.yayloop.com

The daily run is the only service provider that recruits contractors that are identified as news runners" that are recruited through a field office and deployed to service states (12). News runners earn a $45 commission per field story with a continency review score of 12 or higher and a $25 commission for a TSI filing in our HARP database which is tier sensitive information with a non-disclosure classification which restricts public access.

Monseirs

12

www.tabanul.org

Monseirs (mon'se'ir) are divine leaders of the genso faith that work in union to ensure the genso faith is viable source to human life and its developmental processes. The tabanul is a fellowship community for the genso faith which is :a branch of Christianity that taps into an improved system of thought and originated in the United States in the 21st century... The monthly patronage is $4,873 with a family and subsistence allowance of $1,200 per month.

Yayloop.com is the main service provider for our service network featuring a customer service portal (VMAT), backup reservation system, pivot service for email and messaging, invoicing and payment portal, proxy service, general holdings, baus certifications, emergency response services, and clearance reviews.

Hiring Procedures

For employees, volunteers, contractors, and monseirs

"A positive work ethic grows from a healthy foundation."

General Eligibility

The following are general requirements for candidates:

- **For employees** To meet general eligibility, you must be at least 43 years old, pass the CREP battery test and complete a prog assessment, and have no public record of criminal activity in the last 60 months.
- **For volunteers -** To meet general eligibility, you must be at least 43 years old, pass the CREP battery test and complete a prog assessment, and have no public record of criminal activity in the last 36 months.
- **For contractors -** To meet general eligibility, you must be at least 43 years old, pass the CREP battery test and complete a prog assessment, and have no public record of criminal activity in the last 18 months.
- **For patronage -** To meet general eligibility, you must be at least 43 years old, pass the CREP battery test and complete a prog assessment, and have no public record of criminal activity in the last 72 months.

Interim Clearance

The following are interim clearance (S2) requirements:

- **For employees -** To obtain an interim clearance, you must meet general eligibility requirements, schedule a mental health spectrum evaluation date, and complete the document checklist (and upload to portal).
- **For volunteers -** To obtain an interim clearance, you must meet general eligibility requirements, schedule a mental health spectrum evaluation date, and complete the document checklist (and upload to portal).
- **For contractors -** To obtain an interim clearance, you must meet general eligibility requirements, schedule a mental health spectrum evaluation date, and complete the document checklist (and upload to portal)..
- **For patronage -** To obtain an interim clearance, you must meet general eligibility requirements, schedule a mental health spectrum evaluation date, and complete the document checklist (and upload to portal).

Board Review Criteria

The following is the board review criteria for selection:

- **For employees -** To be considered for employment, you must submit a board review packet with a bridge report which includes your test scores and a 500-word essay on ethical foundations and consumerism.
- **For volunteers -** To be considered for employment, you must submit a board review packet with a bridge report which includes your test scores and a 500-word essay on ethical foundations and consumerism
- **For contractors -** To be considered for employment, you must submit a board review packet with a bridge report which includes your test scores and a 500-word essay on ethical foundations and consumerism
- **For patronage -** To be considered for employment, you must submit a board review packet with a bridge report which includes your test scores and a 500-word essay on ethical foundations and consumerism.

Diversity and Inclusion

For employees, volunteers, contractors, and monseirs

"A positive work ethic grows from a healthy foundation."

Fair Game Act

...We are an institution that serves as a path to proper human growth and its natural processes.

The fair game act (FAGA) is an ordinance of law that assists with the development of DEI policies to ensure diversity is a complementary feature of our community and not just a security attachment to the laws and the comfort they create. This method of growth gives us the freedom to address issues and create optimal solutions that set standards on diversity segmentation and its community building blocks.

.....Thereby, we placed human identity under close examination along with its institutions and past traditions that carried an influential presence for the generations and standardized the psychological apparatus of their communities and its diversity segments that relied heavily on tradition to mold society and their communities further building upon a reality that carried the greatest rewards in service to include areas of mental health that remained corralled through collaborative efforts and criminal segregation that ultimately led to destructive patterns of abuse and a shift in its security roles hidden in the dynamics of race and institution that remained in a psychiatric realm that developed the human nations psychiatrically on identity and traditioned patterns that recycled in a natural form.

...We are also a peace-time organization that serves as an intermediary during human crises.

The armistice is an ordinance of law that imposes security sanctions on employees that were on occupational duty in a GCI state (...California, Florida, Georgia, Nevada, New Jersey, New York, and Washington) during the Golstone Era (2011- to a date set by congress) where the American nation was under sieged by high transverse activity that led to false employment and high aberrant activity throughout the nation that were associated with eras in their history that remained rhetorically bottled and silenced.

.....Thereby, we imposed conditional bans on staffing roles that were active in the United States during the Golstone era where American business industries were placed under high scrutiny for psychiatric consumerism that expressed a serious concern into the mental health of their nation's cultural environments which led to a grand study into the chemical apparatus of American culture and their historical dynamics that exposed a psychiatric dynamic in their growth processes that devalued their sense of reality and community to a troubled mental institution which also placed greater concerns on their poverty institutions that carried a burden of risk in their growth processes..

Civil Union Act

...The key issue is the inability to stabilize the human nation without developing into warring factions or territorial groups associating its growth processes with the wrong elements of teachings and collaborative segmentation.

The civil union act is a peace-time ordinance with three ordinances of law (1) The national origin index is a unified system that bridges heritage into a unified system to restore balance in the human generations (2) equilibrium assessments were implemented to serves as an evaluative and measurable scale to healthy integration models, and (3) Geographic zoning serves as a quarantine segment for the human generations with a more defined segment of geographic positioning. Thereby, our service zones were divided into divisional segments referred to as bilateral states, capsule cities, city provinces, eco-districts, and municipals.

The historical dynamics built into race and institution have led to irreconcilable paths to growth and greater understanding of the human condition that shall carry an individual presence rather than sit in an observation class of stereotypes and harsher judgments on a colored race based on superficial elements such as skin dynamics, hair texture, and other characteristics that have been plagiarized onto the human race as a fragment of its natural identity which created an insecurity trail into many transverse cultures that carried the weight of their insecurities and deformity and used them as a weapon to disguise their emotional defenses on their own non-accepting identity looking at the human condition as a lower class or lesser quality because of a shift in their mental apparatus and engineering that led to a psychosis trail that lived under an authoritative structure and fraternal element that remained rhetorically bottled and silence throughout the human histories. This type of mental processing is often seen in individuals with high comparative natures that shifts the mental apparatus into a less developmental state and cognitive realm.

We also highlight white heritage in this context to refer to a fanatical historical foundation linked into the cultural dynamics and identity systems of the human generations that lacks proper growth patterns and cognitive reach due to heavy psychological positioning and trained identities. White in this context is also in reference to a phrase called "the voluntary slave of high rewards and poor action and mastery of its own slavey practice " that remains in an acute stage of mental psychosis and blind action onto others that derailed human progress infusing the human societies with a false element of human value and institutional belonging hinged on a very faulty area of perceptual ideals that is often seen as a security element and capitalistic trail that shift society into a stale state of progression and unionization that hinders growth and development in the human generations.

Knowledgebase

For employees, volunteers, contractors, and monseirs

"A positive work ethic grows from a healthy foundation."

For Applicants

The following are general application terms for job candidates:

- **Prog assessment-** A prog assessment is a type of interview where a job candidate answers a series of question that appears on a video prompt and used to assess communication, organization, and presentation skills.
- **Spectrum exam –** The spectrum exam is a basic psychological assessment used to assess cognitive functions and behavioral disposition to determine employability rating (full duty, limited, or exempt) and/or placement.
- **CREP –** The career readiness and employment program (CREP) is an assessment period that consists of a timed battery test to assess basic literacy skills and a contract to hire period to assess work ethic and proficiency level.
- **Interim clearance –** An interim clearance (S2 clearance) is an access level clearance that allows new employees to work in limited capacity until their S3 clearance is adjudicated and submitted for signing.
- **Probational -** A probational status is an assessment period with training posts and intervention therapy. for job candidates that would like to be reassessed for a higher spectrum rating. This is a non-wage position.
- **Merit-based score –** A merit-based score is a rating that consists of experiential evaluations, assessment tests, and honorary credentials. A score of 40 (cap score is 70) or higher is a hiring candidate.
- **Bridge report –** A bridge report is a information release authorization that consist of profile data that can be used to determine employability or placement or used as supporting evidence in a criminal case.

For Personnel

The following are general terms and definitions for new hires:

- **In- network -** An in-network service is any service within the mink card network that is also available to general employees without a standard mink card membership as employees are issued a clearance access card (CAC).
- **Biometrics –** Biometrics is an annual security screening that consists of fingerprint scanning and facial recognition and a soft criminal background inquiry to check for warrants and behavioral disposition reports.
- **Rollover pension** – A rollover pension is an exigent fund and stimulus program that provides financial aid to general employees with a qualifying hardship condition. The annualized cap ranges from $2,300--$3,800 per year.
- **Intervention therapy –** Intervention therapy is a part of a behavioral disposition contract for personnel with low performance scores that are given an opportunity to restore mental balance.
- **Behavioral disposition reports –** A behavioral disposition report (BDR) is supporting evidence of a misconduct that has been reported and determined to be a valid entry of evidence to summon a behavioral disposition hearing.
- **Insurance premium –** A health insurance premium (HIP) is a healthcare stipend program that pays 70% of an employee's monthly healthcare insurance premium (up to $340 per month) at any healthcare service provider.
- **SLA benefit –** A split living allowance is a subsidized program for general employees that consists of split living quarters of two or more occupants in a stop and drop, and the SLA ranges from $25-$45 per week.
- **Cafeteria meal plan –** The cafeteria meal plan is a subsidized meal program for general employees and national reservists offering reduced meal prices at Machoni food buffets and drop-n markets.

Volunteer Component

"A positive work ethic grows from a healthy foundation."

Introduction

The national reserves component (NARC) is a volunteer service that splits time between actual flagship duty (prime occupation), and service time (volunteer duty) that ranges from 25-55 hours per year. When you enlist into the national reserves, you are enlisting into the national reserves OCS program and assigned an occupational specialty.

All service roles are non-salary based with full-service benefits. Commissioned officers possess a bachelor's degree or higher, non-commissioned officer has 3 or more years of relevant work experience and cadets are trainees 16-23 years old. Service grades range from GS-1-GS-4 and determines a national reservist's service time. The designation "GS" stands for genil service ("the divine") which is a biblical term that belong to the genso faith.

There are two branches of service:

The constable is chaired by the corporal who oversees civil affairs and holds residency. The following are the occupational specialties assigned to the constable:

- *Foremen* – This occupational specialty consists of site managers that fill high priority roles and receive full-service benefits with shifts starting at 2-3 hours of service time each month with service time increases up 4-5 hours per month.

- *Civil workers* – This occupational specialty consists of a range of duties and access levels to include grievances, civil arrests, rover services, judicial services, advocacy, children services, discharges, restrictions, summaries, and reinstatements.

The Taskforce

The taskforce is chaired by the brigadier who oversees core operations and holds residency. The following are the occupational specialties assigned to the taskforce

- *JAG* – The joint air to ground combat unit is comprised of pilots, copilots, cadets, guards, infantry workers, and support staff.

- *Rovers* – This occupational specialty covers walk throughs, threat assessments, investigations, red notices, yellow cards, bridge reports, and patrol.

- *Tradesmen* – This occupational segment includes builders, welders, machinists, evaluators, horticulturists, technicians, culinary specialists, food servers, and wood workers.

- *Relief workers* – This occupational segment includes the medical profession, aides, adjuncts, storekeepers, peer specialists, facilitators, and marine workers (to include fishermen).

Code of Conduct

The national reserves dress code set standards on dress and appearance and code of conduct that is seen as a form of etiquette and mental health benefit that promotes healthy esteem building and aligned character.

Core Values

- Bravery is an element of honor that plays a major role in the life of a national reservist and its service roles as a public servant to ensure greater strength in union and public service.

- *Integrity* embodies both honor and virtue of character and the path on which the national reservist is unionized creates a more dynamic view of human integrity and moral duty.

- Growth is the natural stages development that are placed into one's life path so that real growth can take place in its proper developmental chamber that resides outside of a material ground.

Dress Code

- *Uniforms* – Work uniforms consist of BDUs, jag suit, and national reserves PT gear, Formal dress is worn by the General, Corporal, Lance,, and Deputy and consist of khakis uniforms with formal cover or formal blues with an aiguillette and formal cover.

- *Grooming* – Hair must neat and professional and not be of faddish element and all hair must be of a natural color (i.e. solid browns, solid black, or naturally mixed) and all hair below the shoulder must be pinned up and worn professionally.

  Both men and women with excessive facial hair must keep a well shaved surface to alleviate the nesting of bugs. The shaving policy only applies to national reservists that require specialized removal of facial hair due to medical conditions.

- *Accessories* – Accessories are not to be worn in uniform, and makeup must be identified as a non-faddish element. Eyelash extensions, blush, artificial fingernails, lipstick, contour, abnormal piercings, and visible tattoos are prohibited.

Citation Medals

- Green Beret – The green beret is a letter of commendation issued by the "General" to honor service members for their meritorious duty.

- National Armistice – A NAM is worn on service unforms to honor war veterans who have served honorably during a war period or service era.

Baus Certifications

"We are innovators of the future and critical thinkers of the past."

Biannual

Pallet companies only require a general certification by questionnaire each time a pallet is advertised in the pallet search engine as a resource. The term resource refers to any company or organization that can provide a resource or basic human necessity that falls under healthy routine such as budget travel, lodging discounts, budget meal services, affordable housing, and bargain shopping, and services that provide discounts to pallet customers searching for a resource that can be used for immediate aid or support.

Pallet Search

Pallets are short ads that are used to promote a product or service and consist of 50- 200 characters and up to 7 visuals to highlight a product feature or draw attention to a product

- General – A pallet is 30-day ad that cannot be modified However, there is a mandatory preview function and content removal procedures.
- Optimize – Pallets are optimized through constant contact that requires a click through to the display page to increase the ranking score and position.
- Fairness – Pallet companies must embody a fair pricing model that promotes healthy consumerism rather than a psychiatric dynamic of its appearance.

Additionally, black market segments are quite common in human societies, and they have become more of a moving vehicle to economic growth in a very dark area of consumerism where crime is an element of security and security is an element of sustained comfort. Therefore. the mink card service network is a backup economy and quarantine segment that serves as a purported version of human society and its natural growth process while providing both a foundation of support and a remedial track that enhances its growth processes and historical patterns.

Certifications

All pallet companies must have no more than 18 months of market experience at the time of registration and no more than 25 employees and come with a business ethic that's meet the following business health standards:

- *Pricing*- All pricing must meet DRB standards and are subject to review annually and at random to ensure fair pricing and healthy consumerism.
- *Quality* – All products and services must meet regulatory and safety standards and have the required licensing and certificate of inspection.
- *Service* – All companies must have a customer contact line with a live person during normal business hours and a business email for support.

Annually

BAUS is a business association and unified system and a certification program for Baus stores that removes the psychiatric dynamic of consumerism with fair market price and healthy consumerism that also include vouchered goods under a special loss prevention program that provides an extra layer security to our baus retailers.

The special loss prevention fund provides vouchers and store credit to individuals and families with proof of hardship. Additionally, the baus certification program is limited to 23 convenient shops with a food source and essential needs items. There is also a monthly voucher cap of $62 per household. and a store credit cap of $94 per household that must be repaid within a 30-day period.

There are also laws pertaining to shoplifting and law enforcement is informed of baus store procedures. For example, a patron cannot be arrested for stealing in a baus store if the patron returns all the items with no threatening element of abuse. However, a customer can be permanently banned from all baus stores if there is a theft attempt such as a non-check out or a misconduct violation.

.Certifications

All baus stores are owned and operated by the mink card service network under a management trainee program for first-time entrepreneurs with a business ethic that's meet the following business health standards:

- Pricing- All pricing must meet DRB standards and are subject to review annually and at random to ensure fair pricing and healthy consumerism.
- Quality – All products and services must meet regulatory and safety standards and have the required licensing and certificate of inspection.
- Service – All companies must have a customer contact line with a live person during normal business hours and a business email for support.

Rollover Credit

To qualify for rollover credit, you must not have an outstanding baus debt exceeding $50 and meet the following FARR guideless for rollover credit:

- *Income*- All baus applicants must have a monthly gross income of at least $1,400 and with a minimum of five pay or disbursement cycles.
- *FARR* – All baus applicants must have a FARR score of 720 or higher and must have been enrolled in the FARR system for at least 18 consecutive months.
- *Credit* – All approved applicants will receive a rollover credit of $150 which can be repaid in installments of $25 and reused at any time.

Currency Exchange

"We are innovators of the future and critical thinkers of the past."

Currency Exchange Model

- **Digital currency-** Keros (U.S. Yen) is a digital .that holds the same monetary value as the U.S. dollar and registered in 10 cent increments (1 Kero - $0.10) that is rounded to the nearest 10th and the highest factor..
- **Gap spending rate –** The gap spending rate is the excess funds remaining after a purchase.. For example, a $0.99 candy bar will require 10 keros and generate a shopping credit of $0.01 or a chumi coin.
- **Chumi coin –** A chumi coin is a 10% discount that can be used for a product or service that is managed by the mink card service network. However, a chumi coin is valid for 30 days from the date of issue.
- **Merchant services –** The mink card service network uses its own merchant platform to process transactions online that are transferred to a financial services institution in our service network
- **Instant wire transfers –** Instant wire transfers is processed online through our financial services institution and include pick up locations owned and operated by the mink card service network.
- **Relief payment –** A relief payment waives a billing cycle and limited to two cycles in an 18-month period and can only be used for =extended stay accommodations that are designated as an emergency housing unit.
- **General holdings –** General holdings is a service account with funding limitations and issued to all yayloop customers and used to pay for in-network services using our invoicing and payment portal.
- **Baron fee –** A baron fee is a fee waiver credit that waives standard processing fees and replace those fees with an annual baron fee. For example, a wire transfer is$9 per transfer and an annual baron fee is $25..
- **Fast market –** The fast market is a n online discount funnel for rehab homes with livable structures that are purchased through the mink card service network that also provides a home improvement stipend .
- **Low ball –** A low ball is a deferring billing price that is factored in when a consumer does not have enough funds to purchase an item and low ball with a lower payment that has a value of 90% of the product cost.
- **Token –** A token is a paper currency that covers admission fees at recreational sites and campgrounds in our service network. Tokens are reserved for practiced members of the genso faith and reservists.
- **Short lending-** Short lending is a relief fund that provides personal loans up to $100, Short lending has an annual startup fund of $2.5m and uses the FARR model to determine eligibility and funding amount..
- **Tenant credit –** A tenant credit is a tier allowance ($900-1,600) that is earned every year and issued to tenants in our housing network .A tier allowance can be applied to rental costs on a monthly or quarterly, basis.
- **Bridge account –** A bridge account are general holdings that are unclaimed during the hold period and transferred to a treasury fund in our financial services institution until the funds are claimed and disbursed..

Financial Services Institution

Please note that all visitors and personnel accessing centuriat service branches are subject to full body scans , photo imaging, fingerprinting, and must store all electronics and bags in a secure locker. This policy is in response to journeyed activity into the Earth that led to a high rate of criminal asset theft, and moving corruption into other countries,

Centuriat.com is a financial services institution with 43 service locations and a central branch that founds as a member association for our service network and include a treasury division that manages all financial ledgers in our service network to include security accounts (general holdings, and binary trusts). Additionally, all centuriat customers are enrolled in their credit builder program (FARR) that aggregates credit history from internal billing cycles.. FARR stands for financial accessibility and responsibility rating and even considers applicants with excessive debt and factor in a responsibility gap rating where no additional debt has been incurred over a certain time period to determine residual income and time in service..

Unfortunately, centurial do not utilize credit bureaus but rather an applicant's FARR score and financial health assessment to determine loan amount and terms.. Additionally, credit bureaus were identified as high profile segments that affects mental health and its growth process on a vast level often resulting in higher financial obligations and psychological burdens that carry greater institutional risks Therefore, to qualify for special lending programs the loan applicant must meet residual income requirements and have a peak FARR score (average score (in the last 18 months) of 720 or higher. The FARR point system factors in on-time payments which increase a consumer's FARR score by 9 points and late payments decrease a FARR score by 21 points. A collection notice is a -25 points and unpaid debt that exceeds 180 days (per interval) is -50 points.

Directorate

The chambers is a discretionary review board (DRB) that governs procedural law in the excise system and consists of three judicial chambers that are governed by a body of law which is referred to as a directorate and legal guide for the excise system and in the excise body of law prime directors are senior advisors that proposes ordinances of law that are affixed to adhoc proceedings and an election process that determines the clearance level or process of law..

1st Chamber

The judiciary delegate orders, holding hearings, enter adhocs into review, file omissions, and enforce ordnances of law.

- ☑ **Magistrate**
  Appointed by senate
- ☑ **Stewards**
  Appointed by judge
- ☑ **Wardens**
  Appointed by judge
- ☑ **Adjuncts**
  Appointed by RCB

2nd Chamber

The council mediate bills for discretionary review, adjudicate bills, submit omissions, and notarized statements.

- ☑ **Foreman**
  Appointed by voting panel
- ☑ **Steward**
  Appointed by voting panel
- ☑ **Omissions**
  Appointed by voting panel
- ☑ **Adjudication**
  Appointed by voting panel

3rd Chamber

The review committee propose bills, escalate adhocs, write summaries, arbitrate civil cases, and appoint adjuncts.

- ☑ **Senior Advisor**
  Appointed by trustee panel
- ☑ **Review Board**
  Appointed by trustee panel
- ☑ **Adjutants**
  Appointed by review board
- ☑ **Examiners**
  Appointed by review board

Definitions

Motion – A motion is the filing of a case by a petitioner for a judicial proceeding and outcome that can only be determined by a magistrate of the court or an acting interim office.

Orders – An order is a civil order or termed policy that is delegated to limited parties in a judicial proceeding that creates equitable protection for all parties and outlines general restraints.

Adhocs – Adhocs are briefings that are presented in digital and written format and provide an introductory statement or preliminary review that is often made public.

Ordinance- An ordinance is a legal statute that can only be delegated by a magistrate of a court and imperial orders must be signed by the President of the United States or acting official.

Omissions- An omission is a :"statement" that is entered into review by a voting panel and often to mediate a law, expand a statute, restrict its capacity, or exonerate its presence or legal foundation.

Interim Office - An interim office is a 3-year term which is a transitional period where judicial proceedings are underway for elections . However, the first term of office is assigned by directors.

Civil Arrests- Civil arrests are judicial proceedings that do not carry a confined sentence but rather an investigative process with a judicial officer to assist with the evidentiary process of a case.

Summaries- A summary is a judicial underwriting by an adjutant that summarizes a case that is filed in a motion and provides an addendum that consists of the full motion and signatures.

Migration Guidelines

"We are innovators of the future and critical thinkers of the past."

Domestic

The following are basic eligibility requirements for asylum in a bilateral state:

1. **Age Requirements.** Must be between 43-76 years old at the time of registration and independent with no more than two dependent children and no more than three household members under an administrator account.

2. **Location Requirements.** Must be a native-born U.S. citizen of a bilateral state or qualify for an itinerary which is a relocation addendum for natural-born U.S. citizens born to parents who are native born citizens of a bilateral state..

3. **Health Assessment.** Must complete an online health assessment and profile sheet and must not have any medical conditions that require acute care or specialized treatment such as chemotherapy or heart respirators.

4. **Protected Grounds.** Unfortunately, all U.S. citizens that meet naturalization requirements must be eligible for a NAM to register under asylum status which is a quarantine segment for a higher level of aid and support due to high political aberration in the nation's history,

5. **How to Apply.** To apply for asylum, log into your yayloop service account and select services and click on asylum to begin the application process which can take anywhere from 3 months to 1 full year for a PBI screening to determine eligibility.

Foreign

The following are eligibility requirements for immigration sponsorship:.

1. **Age Requirements.** Must be between 43-76 years old at the time of registration and independent with no more than two dependent children and no more than three household members under an administrator account..

2. **Location Requirements.** Must be physically present in an emergency response region and there are 17 foreign nations that qualify for immigration sponsorship to assist with migration into a bilateral state (there are 5)..

3. **Health Assessment.** Must complete an online health assessment and profile sheet and must not have any medical conditions that require acute care or specialized treatment such as chemotherapy or heart respirators.

4. **Protected Grounds.** All candidates must complete a mental health spectrum evaluation to determine an eligibility rating (low, medium, or high risk) and priority classification (low or high) and all applicants must clear a security screening and background check.

5. **How to Apply.** To apply for immigration, log into your yayloop account and select services and click on immigration to begin the application process which can take anywhere from 3 months to 1 full year for a PBI screening.

The indemnity clause defines the relationship between the participant and the sponsored country to ensure there is a compatible element in the integration process as migration from one's native land or domicile to another environmental habitat that carries a different psychological landscape that sits in a more deep-rooted and permanent state of unionization such as language-based cultures with a particular dialectal expression that creates a more familiar space in the emotional realm of sameness that shifts the human psyche into a neuropathic habitat that inhibits new growth experiences and exposure to an acceptable level of compatibility that requires more advance computing of the psychological inhibitors built into each nation's historical track and territorial segments. Thereby, migration requires more knowledge into one's mental state and sense of identity to lift the homogeneous state ("sameness") of conditioning and its bonding elements to an independent state of growth so that migration is more of a human service.

Additionally, we have placed stricter requirements on American citizens due to the historical dynamics of their nation that did not carry a foundation of trust or proper historical landscape but rather sat in a covert state of political unionization, rhetorical dynamics, and cultural dilapidation ("the addictive mind and high abuser") that recycled the nation's inhibitors to proper growth that still remains in a covered state of psychiatric unification exposing a nation that requires extensive psychiatric care and oversight. Therefore, consider our human service in their nation to be a noble cause and rescue of the well which is estimated at 2 million viables. Moreover, the historical dynamics of their nation have shown patterns of grave deformation of character and intent that have shattered the nation's sense of culturing and reality positioning into a homegrown terrorist foundation rigged under its psychological inhibitors linked into historical eras in their history and political unions that require removal from its position and transition into a segment of psychiatric diversion devoid of the common trails to recovery through a faulty area of occupational tasking and trained identities that proved to carry a disguised element of work activity and human service.

Resources

MACHONI

1

Machoni.com

Machoni is a convenient stop (located at yumi stations) with drop-in markets and meal stops with cafeteria meal plans and a pay as you go service. Machoni also manufacture and deliver its own products that are specially grown, cleansed, and prepared at special factories, food hubs, and manufacturing plants. Machoni also employes their own marine workers, horticulturists, food inspectors, chemists , and transport workers.

1 Introduction

Daily Run

The daily run service guide is a tutorial for beginners that provides a step-by-step instructional guide for the registration process and guidelines while also making it easier to navigate the daily run's service platform.

The daily run is an online publication and syndication network featuring field stories, documentaries, bin marketing, commentary, brand promotions, and an exploratory platform to expand your network.

Getting Started

The dailyrun.tv also requires a yayloop service account to retrieve passcode and to access services. The following are step-by-step instructions on how to apply for a yayloop service account:

Step-by-Step Instructions

- Invitation – To create a yayloop service account, go to www.yayloop.com or visit the daily run marketplace and create a new publication and click on create pivot account.

- Registrar – When you register to the yayloop service, you will be required to disclose your legal name, date of birth, gender, home country, visiting country (if applicable), and telephone number,.

- Premium – During the registration process, you will have the option to upgrade to a premium account with additional services to include a short messaging system and special services.

- Registry – When your registry to the yayloop service, you will be issued an NRI which is a national registration identification number for census registry along with a digital IAP card.

- Password – If you forget your password,, you can create a support ticket or call in through VMAT to reset your passcode. The VMAT associate will also provide a reset code.

What is a site badge?

A site badge is an information panel with the publisher's display name , location data, visiting URL, special note (max 100 characters) and contact information that cannot contain links or alternate numbers or email addresses linked to friends or family or other businesses or institutions. And. if you visit a circulation listing, your site badge will have a inquire button to view the site badge for that circulation listing.

Additionally, the location data is by region. In region 1, the bilateral states (there are 4) are service zones that consists of 12 capsule cities by state category. In region 2, the grid states (3) are service zones that consists of 23 capsule cities by state category. Additionally, grid states are extended service areas that provide a gateway into our institution and consist of a service contract and itinerary. In region 3, our eco-districts will consist of service zones that spans 11 foreign nations.

Checkpoint

When you submit a publication you will be required to enter your yayloop email id and password to retrieve a one-time passcode.

Expiration Date

Premium listings can only be listed for up to 30 days and there is a removal link at the bottom of each confirmation email. Free listings such as Nordics do not have an expiration date and require a content removal request Please note that pivot emails cannot be manually deleted and are removed from our database after 90 days.

Content Removal

To takedown content , each listing will have a report tab that links to a landing page to submit a takedown request by category. There are three categories for infringement, unlawful solicitation, or inappropriate content. If a publication is placed under review with our review division it will generate a yellow notice that is sent to the daily run's review division for a disposition review and the publisher will receive rebuttal instructions by email.

However, a yellow disclosure panel will also display on the publication page during the review process and all publications that are placed under review will remain active until a red notice is issued or the review panel determine no valid entry of violation existed to remove the review status. If the review panel determined the takedown request carries a violation, the publication will be removed from the daily runs' database and filed with HARP and the account will be issued a red notice .Three red notices will disable the yayloop service account for 30 days and five or more red notices is a civil arrest suspending the account until a PBI screening is scheduled through VMAT to determine a disposition or revocation of services..

System Checkup

We conduct system maintenance and disposition reviews every Sunday from 12 am – 9 am (EST) where a review panel randomly select publications for review to ensure they are in compliance with laws and general policy.

2 Circulation

Daily Run

Circulation is an advertising medium that consists of marketplace publications and in-network services and a broadcast network that offer a channel to network and build connections faster.

The daily run' circulation segment is also a great addition to the online marketplace that provides both an element of comfort and convenience and a resource hub that can be tapped into at anytime.

Marketplace

When you create a marketplace publication there will be generic sections for the desired expiration date, category, descriptive information, headline, and site badge data. You can also upload up to 12 images..

The following are descriptive information for marketplace panels:

- ☑ **Clip n go** – This is a bin marketplace with bin prices that ranges from $10-$45 and vehicles under $4,999. This is an ecommerce platform with bargain prices and a pickup delivery service.
- ☑ **Pings** – Pings are special requests that provide an element of support and can consist of experiences or a more profound element of care that enhances learning.
- ☑ **Nordics –** The Nordic music industry offer a space for inventive music and expression that showcases a musician's creative side and passion for music and its foundation.
- ☑ **Pallets** – These are short ads that are used to promote a product or service. Pallets are designed to serve as a resource and a basic human necessity that promotes healthy routine.
- ☑ **Showcase** – This is an artistry board showcasing design talent in culinary arts, architect, and fashion providing both an outlet to expand one's social circle and networking opportunities.
- ☑ **Spreads** - Berlusconi is a digital magazine featuring interests' profiles and endorsed ads that appear in Berlusconi which is also a founding partner of the Hollywood Grand Summit.

Billboard Forum

The billboard forum is a central social network forum that functions as a central forum for hosting, commentary, and general announcements. Hosting is a 24-hour rotation on the daily run's billboard with a social networking profile (i.e. anchored name, bio, and up to 12 photos) and visiting URL that can be used to promote a brand or image.

The billboard forum also consists of recommended links for pallet ads, bin marketplace, and spreads and a central messaging board that are divided into special requests (pings), rave reviews (blasts(, and shouts (emotional outlet). Additionally, all interactive activity is linked to a user's service account. However, the billboard forum is a public board that is accessible to the general public and filtered with censorship tags.

Checkpoint

VMAT is a proprietary system used in the mink card network and prelaunch on the daily run as a service provider to provide a robust customer service portal to the daily run platform.

For Complaints

- By Email – To file a complaint by email, please visit the support page on the daily run and click on email support to activate the support section with a selfie and data profile sheet.
- By Portal – To file a complaint using our portal, please visit the support services page by logging into your yayloop service account and follow the instructions on the screen.

Please note that the daily run does not use traditional phone lines due to port out scams and heavy security breaches of the nation's communication hubs. Additionally, all VMAT sessions are stored in our HARP database and available to access level employees.

General Health

The following are general health requirements:

- Must be able to distinguish between a pseudo reality and a natural reality (pure) that creates a healthier mental environment.
- Must be able to unwind when there is vast error in judgment or collaboration that affects one's moral compass.
- Must not meet the definition of a criminal where crime is a fragment of who you are rather than a rare instance.
- Must always place your mental health under constant review and detach from harmful elements that tampers with judgment.
- Must find a redemptive path when there is vast error in one's life path. Redemption fails when it is not a natural route (pure cycle).

Additionally, you must be able to think with a critical eye to expand on thought and perception to enhance one's emotional, mental, and psychological wellbeing so that the mind does not sit in a psychiatric realm disorienting the learning process and perceptual realm.

In Production

YAYLOOP

4

Yayloop.com

Annual service fee	**$25**

The annual service fee is a resource fee that allows us to lower the cost of travel per trip and offer an affordable service.

The annual resource fee also includes a courtesy ride once a year in the event a passenger does not have sufficient funds to cover the cost of travel. RELCO vehicles also have charging ports for mobile devices and surveillance technology installed in all cars

RELIABLE CAR OPTIONS (RELCO)

REGISTRY

How to Register

RELCO auto insurance offer bridge insurance which is a type of auto insurance policy that service vehicles that are purchased through the daily run's bin marketplace and provides emergency auto insurance for drivers with a high-risk factor score. RELCO policies offer comprehensive auto insurance at a flat rate, and all RELCO policies are serviced under an 18-month term than the policyholder is referred to other insurance providers for coverage or enroll in RELCO safe drivers' program to extend policy benefits and increase eligibility rating.

BENEFITS

Tier Allowances

Tier allowances are benefits provided to RELCO customers and include discounts at partner organizations. RELCO customers also receive reduced fare when they book RELCO private car service that is stationed at all Amway bus depots. RELCO private car service can travel up to 62 miles from an Amway pickup and drop off point. RELCO also charges a flat rate $1.25 per mile plus a $5 gratuity per trip. The first 5 miles are free for trips that range from 38=62 miles and RELCO also offers an annual rate card under their riders plus program.

PRICING

Insurance Rates

RELCO offers comprehensive auto insurance at a flat rate of $189 per month which also includes a high-risk driver fee of $34 per month for drivers with a higher risk factor score.. RELCO policies also have a maximum pay out allowance of $3,800 for the life of the insurance policy which is an 18-month term from the date of purchase or during the 30-day extension window than the policyholder is referred to other insurance providers for coverage or enroll in RELCO safe driver's program which is a 12-mont program that provides additional support to high-risk drivers.

CLAIMS

Claim Processing

To file a claim, you must provide proof of purchase with a transaction statement from a banking institution. Unfortunately, credit cards and cash payments are not acceptable forms of payment due to high levels of fraud. If a claim is approved, a post option letter (POL) is issued with a payout allowance (POA) that is covered under RELCO bridge insurance.. It is important to note that bin vehicles are priced under $7,999 and must have at least 7,000 miles remaining on the odometer which is identified as a operational vehicle that require general maintenance that do not exceed the market value of the vehicle or the cost of a new transmission or engine.

AMWAY

7

Amwaybus.com

Amway (alternate; amwaybuslines.com) is an express bus service that operates on 12 circulating routes and service stops (yumi stations only). Unlike, traditional bus services, Amway offers a more accommodating travel experience with safer travel, custom accommodations, and a cost reduction model that makes travelling with Amway budget friendly. Amway also has its own depots and onboard security that includes a rover and surveillance technology.

HOBBIT

12

Yayloop.org

The hobbit outreach program (short name: hobbit) phases out the old developments built in homeless communities with a more developed foundation for homeless clients (with an existing service account) migrating into bilateral states with minimal to no resources. The hobbit outreach program also has an emergency response center with emergency beds and ADL services and provides referrals to holding stations that offer transitional housing and voucher services to homeless clients.

Accomodations

- ☑ **Indoctrination–** The indoctrination period is the first 90 days which provide a cost-free living accommodation in an emergency bed or holding station with free meals.
- ☑ **Programming –** The programing period is where clients are required to participate in ADL services and cover the costs of their stay with a monthly program fee.

Rent Assistance

- ☑ **TAPP –** TAPP units are affordable apartments that offer a faster reentry into housing with 6-18-month leases and fully furnished units based on a monthly rental ratio.
- ☑ **Ratio -** The monthly rental ration is based a financial health assessment that factors in monthly income, debt, and residual income ((see ICP assessment).

Additional Support

- ☑ **Nebula –** All holding stations have a community center equipped with a sitting lounge, televisions (....news), microwaves, coffee/cappuccino, and restrooms.
- ☑ **Shuttle –** All holding stations operate a 24- hour shuttle service to permitted metro stops every 1 -2 hours to a holding station security transport lot for clearance.

Please note that when a TAPP lease expires, tenants can apply for rollover time to occupy a TAPP unit at another site. A single person without a disability rating is eligible for a 6-month lease and families and persons with disabilities are eligible for a 12-month lease.

HOBBIT OUTREACH PROGRAM

DIVISION 1

VMAT Screening

VMAT is a virtual maintenance and accessibility ticket system and security infrastructure that operates video telephony services for our customer service division..VMAT is used for intake assessments, password resets and authentications, mediation services, benefits and claims, grievances, emergency response services (hobbit outreach program), mental health spectrum, financial health assessments, proxy service, and clearance reviews. VMAT also require biometric screening (i.e. video prog, and/or a data profile sheet) to perform certain functions and activate the VMAT platform for appointment scheduling, chat support, or direct call in service and to verify identity to prevent fraudulent activity and unauthorized access.

DIVISION 2

General Support

Hobbit offers case management services to low-income families that meet income and family household requirements.. The services that are offered through case management includes voucher assistance for food and reentry services to include family reunification services to assist with housing and court mandates to reunify families with an open family court case. Hobbit clients are also required to complete ADL assessments each time that are serviced and digitally sign a service agreement and a behavioral health contract to reinforce the importance of proper conduct and moral eptitude in our community that enables peaceful exchange.

DIVISION 3

ICP Assessment

Individual care plans is a top-up service that calculates monthly rental ratios using the following model: The monthly rental ratio is based on a financial health assessment that factors in monthly income and debt cap to determine monthly rental ratio and subsidy allowance. For example, to live in a TAPP unit with a market rental cost of $1,820 per month, an applicant must have a gross monthly income of $900 to qualify for the debt cap of $750 (if there is debt on record) and monthly housing subsidiary of $300 for singles and $400 for families . in this case, the applicant will be required to pay a monthly rental ratio of $670-$770 and persons of exigent circumstances can also apply for up to 2 relief payments in a 36-month cycle.

DIVISION 4

Rate Reduction

Per diem is a rate reduction program for migrant travelers and national reservists, and disabled persons. Per diem covers the first 90 days in an emergency housing status in our service network.. Thereafter, per diem clients that still need services, will receive a rate reduction at stop 'n' drops with a per diem rate of $75 per week on a standard weekly accommodation. Additionally, per diem clients are still required to pay all fees that are associated with an accommodation such as the utility fee as stop n' drops provide a budget-friendly living quarter and stop 'n' drops are rooming houses that offer all the essentials to feel at home.

Emergency Response

TABANUL

13

Tabanul.org

The genso religion (refer to gensofaith.org) originated in United States in the 21st century and became more of a scientific endeavor into human culture. Genso is a prescribed identity characterized by ascetic lifestyles, high morals, and light conservatism (balanced mental state). Genso is God's final order for mankind that promotes good mental habits and serves as an occupation with the greatest healing power and wisdom for mankind. Genso is also a biblical reference to an educational foundation.

Denominations

- ☑ **Theology–** The kalaus is the genso bible which is a branch of Christianity that taps into an improved system of thought that regenerates the human mind.
- ☑ **Doctrinal –** This is a segment of law that governs the genso religion and forms the basis for code of conduct and consists of common law an mano (ma'no) tradition.

Fellowship Roles

- ☑ **Clergy –** Monseirs are divine leaders of the genso faith that work in union to ensure the genso faith is viable source to human life and its developmental processes.
- ☑ **Support -** A primal is an ordained status that participate in outreach support. A genil assists with religious preparation and yausies assist with wellness services

Additional Support

- ☑ **General–** The tabanul is a religious space where practiced members of the genso faith go for religious service and fellowship. The tabanul is open 24 hours.
- ☑ **Favelas –** Favelas are gated communities and an for practiced members of the genso faith and family members that are supporting participants of the faith.

ASWAN

www.gensofaith.org

PASSAGE 1:1

A Shakra will meet all guests at the main entrance and deliver the bill of passage which is a general admission into the tabanul and a screening to ensure guests meet standards (i.e. proper dress and manner). The tauja also contains five apostles which are written laws that outline conduct and behavior.

When you enter the tabanul, you must remove your shoes and place it inside the banglo in sequence then go before the habulah which is a (sacred mural with Jesus Christ removed from the Cross denoting the end of suffering for mankind. Before kneeling before the habulah, the guest must sign the tauja.

The nine apostles are (1) Anger must be diverted to a peaceful state (2) The spirit shall remain free of harmful intent (3) The body shall be cloth in proper dress and manner (4) Always show a system of kindness., and (5). Speak low to respect the weary at rest.

PASSAGE 1:2

The majah is a religious space where genso people pray before the ulman (ulmon). To pray before the Ulman, you must ask for permission in which the genil will provide a baron to sit on, a cup of red wine and unleavened bread. The genil will also set the daihli (clock) as the majah can only be occupied by 1 person for 5-minutes. When you receive your baron, you must place it in the center of the majah facing the Ulman portrait (aged to 120 years).

The candles represent light, the dim room represents darkness, and the majah represents a gateway to heaven.

Proper prayer is performed by sitting in a cross-legged position that is most comfortable for you and clamping the palms of your hands together in a prayer position reciting the prayer of the day followed by a silent prayer of choice. After prayer, you must return the baron to the genil which lets the genil know that you are at peace, and you are cleansed of all sins. The Christian bible is a sacred element of the tabanul that is held in safekeeping, but it is never read or prayed over to wash away sin. The holy bible is said to have its own mystical state that does not require man to tamper to prove his faith or to grant blessings.

PASSAGE 2:1

Jongh is the prayer schedule for the majah. The majah is open daily from 7am-4pm and every Sunday where genils go out in the field handing out cheulettas Cheulettas are giftboxes with white ribbons that denote good fortune. Inside each cheulettas, is a cash gift of $25-$50 and serve as a source of aid for the weary.

PASSAGE 2:2

Dahma is the meal schedule. At 12pm, Sasuke is served which is stripped peppered steak with roasted apparatus, white rice, mineral water, and cream of mushroom soup with bread chips. At 7pm, a meal snack is served (fulashe,tauki bread, or Jalupo). Fulashe is a vegetable blend mixed with light cream and brown sugar, Jalupo is sauteed chicken over white rice. Tauki bread is a soft dough wrapped in spinach and beef and mineral water is also served for meal snacks.

PASSAGE 2:3

Lamah is the schedule for mentorship in the manza. This is a wellness session aimed at improving one's life path with light instruction and transitional support whether that is lifting the weary into safe quarters or providing an outlet to seek out a mentor. In genso culture, material wealth is non-existent because of its nature and poisoned effect on the human mind and money that is earned in excess is always reinvested into society in the form of charity.

Genso people are not permitted to side hustle because of the psychological elements and poor exchange that promotes crime and high immorality Penny pinching is also a huge part of their culture because it refocuses the mind on self-discipline. Genso people are also careful calculators even if they cannot afford to pay their bills, they will still make appropriate decisions that is still responsible in nature. However, when there are large amounts of debt that affects one's ability to meet basic human needs, this kind of debt must be registered with the duwah who will proceed with an individual resource plan or counseling.

PASSAGE 2:4

Duwah is an office in the tabanul that officiates marriages and manages relief funds. Genso people who live astray, can call the duwah for living assistance in which the duwah will provide a voucher for up to 9 days at a lodging facility or 3-6 months of rental assistance. This accommodation is available to the first 50 callers each month as this is a relief fund. After their stay, they are required to register with the duwah for housing resources Housing resources are based on funding availability.

PASSAGE 3:1

Shavets are religious spaces inside private homes that practice man (ma'no) traditions. Mano (ma'no) traditions are customs that are written by genso people and restricted to the home. However, in shavets that are sponsored by the tabanul are required to receive approval for all mano traditions to ensure proper use of custom and fair treatment.

When resources are scarce genso people rely on shavets for food and shelter and shavets cannot charge a fee. All shavets are registered with the duwah and shavets can only be occupied for 14 days in a one-year period and no more than 3 days each month. And sponsored shavets receive a monthly stipend of $500 to care for dwellers.

PASSAGE 3:2

Ann Harbor is the observance of our national holiday and grand feast observed January 24 in commemoration of the genso founder. On Ann Harbor Day, genso people gather at a shavet which is a home of a practiced member to celebrate the resurrection of mankind which is the internal being that exists within the redeeming human spirit. To sanctify the home, each shavet must have a cross with Jesus Christ removed from the cross which denotes the end of suffering for man and the resurrection of mankind.

Before entering a shavet, every attendee must hand a gift to the head of the shavet who will greet them at the door. The gift must be for the home and not a personal item. The gift is said to be a token of appreciation for being welcomed into the shavet. During the grand feast, attendees will also calm the spirit with a 2x 4 oz glasses of red wine which is a symbol of God's sacrifice for mankind.

PASSAGE 3:3

The genso religion is practiced based on remedial status or self-application which means you are given the freedom to make decisions that are conducive to your life and mental health but also to be mindful that trying something new may prove to be a benefit. when there is a dynamic path for growth that may require a receptive mind and a critical eye to examine its risks and benefits onto your life path and growth process.

All humans are gifted with the light of God and live under a scientific order with one another and any interruption in that order can lead to catastrophe for all. That is why it is important to not tamper with human science (God's order) because the chemistry of humans is interconnected and a slight variation can change the energy source putting God on a path of destruction to rid the human Earth of further catastrophe.

Processing fees

If you are approved for naturalization into the genso faith, the following registration fees will apply:

- **US$12.00** This is a registration fee for naturalization into the genso religion for a single member with no supporting participants in fellowship.
