Why Can't I Remember My Childhood?

You always thought it was normal. Like... I just have a bad memory. But memory doesn't just disappear for no reason. When your brain goes through too much stress too early, it doesn't store memories the same way. It protects you by blurring things out. So it's not that nothing happened. It's that your brain decided you didn't need to relive it.

And yeah...

THAT EXPLAINS MORE THAN YOU THINK
TAKE THE 3-MINUTE TEST AND SEE WHAT YOUR BRAIN HAS BEEN TRYING TO PROTECT YOU FROM
