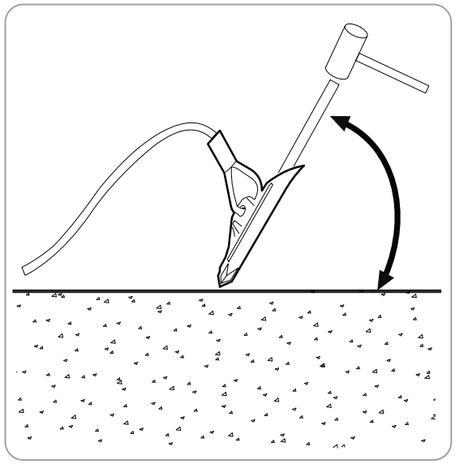
Monday-Friday 9:00am-5:00pm EST
Missing parts will be sent to you via courier.

DO NOT RETURN TO THE STORE!

30" Easy Hook Anchors

Please read instructions fully before beginning assembly.

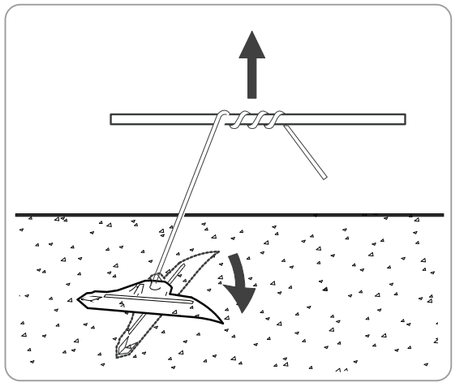


Step 1.

Using a sledgehammer (an electric rotary hammer may also be used) and with the provided steel rod drive each anchor into the ground leaving approximately 8 inches of cable exposed above the surface.

The anchors should be located at the four corners of the shelter, and the remaining should be spaced evenly on both sides.

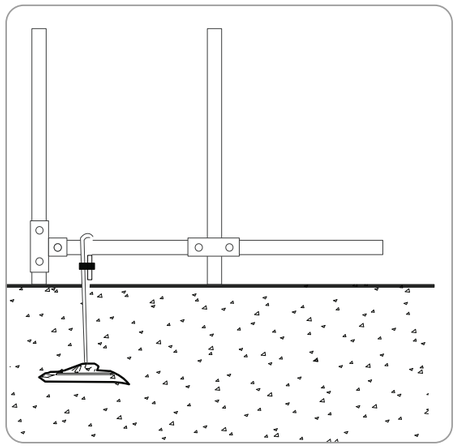
Drive the anchor into the ground on an angle!



Step 2.

Remove the driving rod. Wrap the cable around the rod and pull up to set the anchor.

Make sure the anchor is firmly set in the ground.



Step 3.

After the anchor is firmly set, wrap the cable around the shelter rail and clamp with the provided clamps.

BE SURE TO TIGHTEN THE SLACK FROM THE CABLE
