TEAMING IN CARDIAC SURGERY
2027

We're excited to welcome you to the second **Teaming in Cardiac Surgery** conference in Burlington, Vermont, in 2027. Building on the success of our inaugural meeting, we look forward to bringing together professionals who share a commitment to advancing cardiac surgery through collaboration, innovation, and teamwork.

Cardiac surgery demands exceptional technical expertise across specialties, but the best outcomes depend on more than individual skill. From the earliest stages of patient care through the operating room, the ICU, and beyond, effective communication and collaboration are essential to delivering safe, high-quality care. This conference will continue to explore not only the latest innovations and lessons learned, but also the human connections and shared experiences that make exceptional teamwork possible.

We look forward to another inspiring meeting filled with meaningful discussions, new perspectives, and opportunities to strengthen the teams that care for our patients. We hope to see you and your teams there!

Sincerely,

Thor Sundt
