

MCSBASE

# COMPANY PROFILE

***M**anufacturing. **C**reation. **S**ustainability. The **BASE** of Apparel.*

# CEO Statement

*“We lead with wisdom, build lasting relationships through trust, put people at the center of our decisions, move forward with courage in uncertainty, and act boldly to create real results.”*

**Mr. Mitchell - CEO**

# About Us

MCSBASE is a global production hub that provides competitive quality and pricing for yarn spinning, knitted fabric, and woven fabric to global buyers and customers through outsourcing in Vietnam, China, South Korea, and Indonesia.

MCSBASE aims to address the market challenges by creating a global production hub that offers a variety of items, competitive quality, and pricing to global buyers and suppliers.

# Vision

Empowering your business with quality fashion, textiles, and accessories from Global Production Hubs.

# Mission

We aim to satisfy buyers with both quality and price while targeting the international market.

# Management Phylosophy

1. **We Lead with Wisdom**
   We make decisions based on insight, data, and long-term perspective.

2. **We Build on Trust**
   We honor our commitments, and treat trust as our most valuable asset.

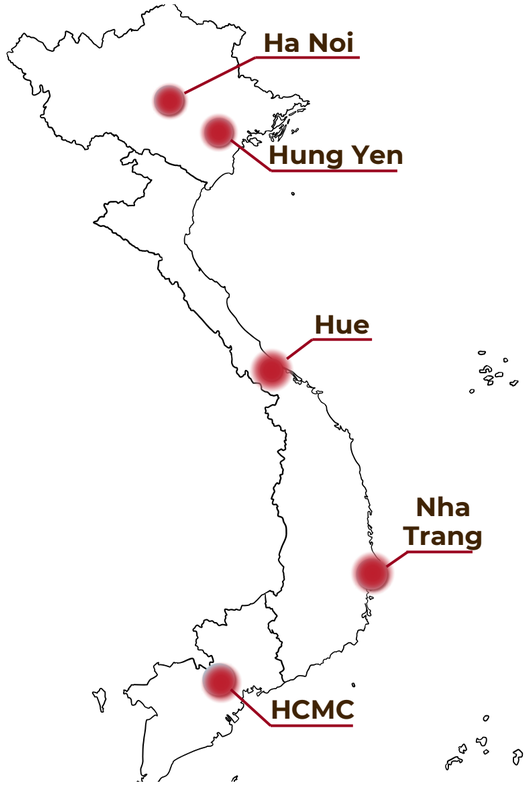
3. **We Value People**
   We respect our employees, partners, and customers, believing that sustainable success comes from growing together.

4. **We Decide with Courage**
   Once we determine what is right, we act decisively and turn strategy into results.

# Business Distribution

CONNECTING MARKETS • DELIVERY VALUE

## Vietnam



**GLOBAL REACH** | **STRONG PARTNERSHIPS** | **SUSTAINABLE GROWTH**

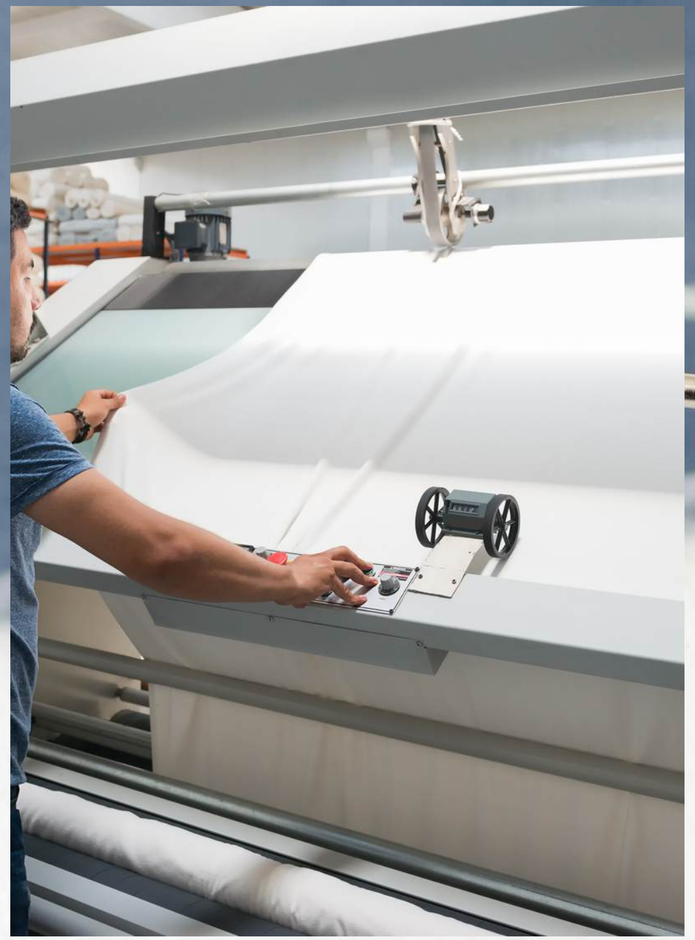
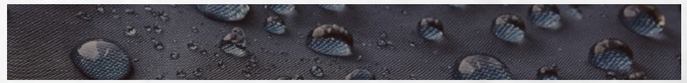
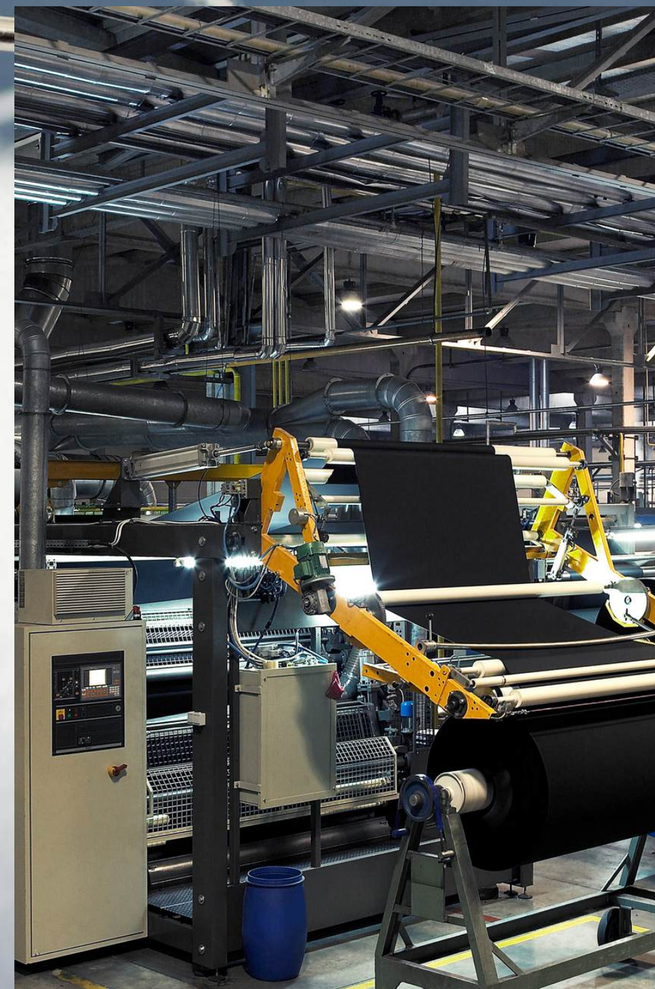
- Location: Da Nang
- Main product: Woven fabric 200-400 gsm
- We control the yarn throughout the supply chain. Fabric quality is controlled at the sub-contractor.







# Dyeing Capacity

We have 3 dyeing factories:

1. Hung Yen:
   - Specializes in cotton/cotton blend and spandex fabrics.
   - Capacity: 500 tons/month.
2. Nha Trang:
   - Produces high-end products, tubular and seamless 100% cotton fabrics.
   - Capacity: 200 tons/month.
3. Hue:
   - Specializes in synthetic and spandex production.
   - Capacity: 150 tons/month.

The lab meets standards for fulfilling orders from US/European/Japanese buyers.

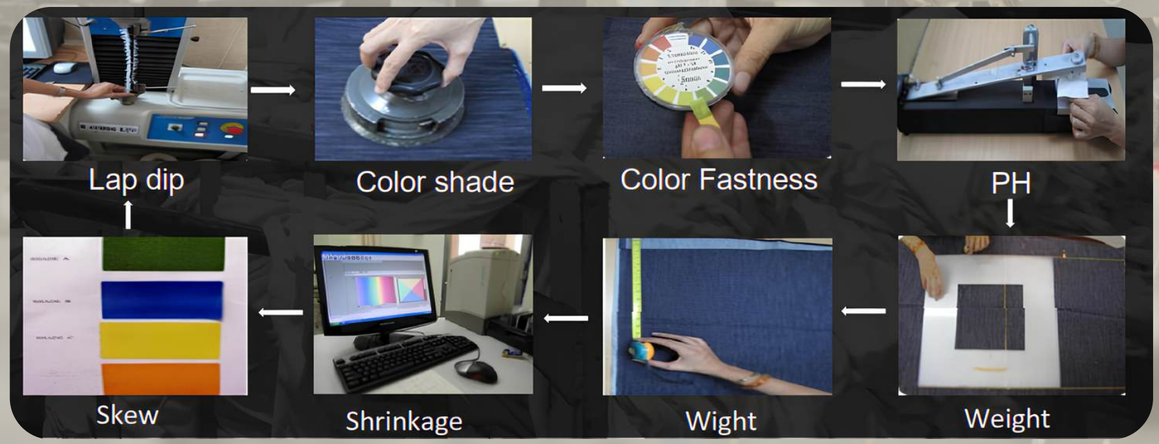
# LABORATORY

**Physical testing:**

-Dimensional stability
- Appearance after laundering
-Tensile strength grab
-Seamslippage strength test
-Tearing strength test
-Stretch ability & recoverytest
-Fabric construction test

**Chemical testing:**

-CFto Actual home Laundering
-CFto Washing: Accelerated
-CFto Crocking (Dry and Wet)
-CFto Perspiration
-CFto Water
-CFto Light
-CFto Chlorine Bleach (Spottest)



MCSBASE

THE LQC TEXTILE

# CLOSED-LOOP KNIT FABRIC PROGRAM

*Fabric Supply & Pre-Consumer Waste Take-Back*

NEXT

# WHAT WE DO

## Closing the Loop at Source

We supply knit fabrics and take responsibility for the pre-consumer waste generated from those fabrics during garment production.

## A Practical Program for Garment Factories

This program is designed for garment factories that need a clear, practical answer to buyer requirements on waste handling, circularity, and ESG — without disrupting production flow.

# RECYCLER PARTNER

## TFC VN

Capacity: 2.400 tons/month.
Multiple satellite warehouses.

## KAKKAR SPINING MILL

Capacity: 500 tons/month.
Yarn count: 2 – 40s
Recycled & Spinning

## RECOVER

Recover Vietnam has established a plant in Dong Nai with a capacity of 3500 tons/month.

## SYRE

Invest to VietNam and starting contruction 2027

# PROGRAM SCOPE

## Fabric types

- Single jersey
- Pique
- Fleece
- Interlock

## Fibers types

- Cotton
- CVC
- Cotton-Spandex (defined scope)

## Waste types

- Pre-consumer only (cutting waste, production defects)

# 7 STEPS

1. Knit Fabric Supply
2. Garment Cutting Process
3. Pre-Consumer Waste Generated (Cutting waste / Defects)
4. Basic Segregation at Factory (As per guideline)
5. Temporary Storage Area (Designated & labeled)
6. Scheduled Collection & Weighing
7. Recycling Processing

# WHAT GARMENT VENDORS GET

- Clear waste handling solution for buyer audits
- Official recycling partner instead of informal scrap sales
- Basic ESG data & documentation
- Participation in a closed-loop initiative without CAPEX
- This program functions as risk reduction, not operational burden.

# POSITIONING STATEMENT

“We don’t just supply fabric.
We take responsibility for its after-life.”

# SUSTAINABLE
