The individual above has successfully completed the Rig Wranglers Supervisor Well Control Program.

a 40-hour supervisor-level course covering the principles, calculations, equipment, procedures and decision-making associated with well control across drilling, completion, workover and well-intervention operations.

The participant successfully completed the required course instruction, applied well-control exercises and program assessment established by Rig Wranglers, LLC.

The Rig Wranglers Supervisor Well Control Program is designed around recognized industry well-control principles and supervisor-level competencies applicable to drilling, completion, workover and well-intervention operations.

Program Competency Areas:

- ***Drilling Well Control***
- ***Workover & Completion Well Control***
- ***Coiled Tubing Well Control***
- ***Snubbing / Hydraulic Workover Operations***
- ***Wireline & Well Intervention***
- ***Surface Well Control Systems***
- ***Subsea Well Control Principles***
- ***Kick Prevention, Detection & Shut-In***
- ***Circulating & Non-Circulating Kill Methods***
- ***Barrier Management & Pressure-Control Equipment***
- ***Well-Control Calculations & Kill-Sheet Application***
- ***Supervisor Decision-Making & Emergency Response***
