GUIDELINES FOR CALCULATING #SERVINGS

Glorious **Cakes** servings are generous! Not only does our standard tier include 3 layers of delectable cake (many bakeries offer 2 layers), the serving size is also generous, measuring 1" x 2-1/2" x 4-1/2" (others' servings are 1" x 2" x 3").

The following lists the typical number of servings per round or square tier.* **

Round	# Servings	Square	# Servings	Kitchen Cakes	# Servings
6"	11	6"	14	9" x 13"	46
8"	20	8"	25	10" x 15"	60
9"	25	9"	32		
10"	31	10"	40		
12"	45	12"	57		
14"	61	14"	78		

*Other shapes also available (e.g. hexagon, heart).

**Servings for novelty cakes or carved cakes are determined individually based upon the design of the cake.

Examples

#1: You and your fiancé have just set your wedding date! Congratulations! Now it's time to get down to cake!! You are inviting 125 guests, and you would like a tiered wedding cake to cut and serve during the reception. You prefer round tiers. Additionally, you would like an "anniversary tier", so that you can celebrate your first wedding anniversary.

> ***Glorious*** **Cakes** recommends a 4-tier design (3 tiers to cut and serve, and one tier for your first Anniversary). One 14", one 12" and one 8" tier will serve 126 guests, so you would be charged for 126 servings plus the anniversary tier. However, you would receive a 50% discount on the anniversary tier, because you are ordering a minimum of 75 servings.

#2: The University is holding a reception to honor the retirement of a beloved professor. Approximately 175 attendees are expected. The retiring professor happens to love golf, so they would like a golf-themed novelty cake for him to cut during a special presentation, but then have additional cakes to serve the attendees.

> ***Glorious*** **Cakes** recommends a 30-serving novelty cake design for the professor to cut (and take home to share), plus two 10" x 15" kitchen cakes and one 9" x 13" kitchen cake to cut and serve the guests.
