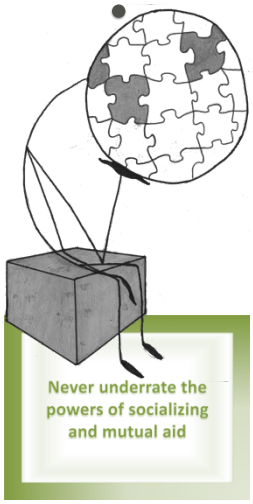
Let Us Help Each Other

Entraidons-nous

Team Funambulists



VISION

That people diagnosed with a neurological disease come out of isolation whilst recognizing that life does not end where a diagnosis starts.

With the intent to help improve our quality of life, neurologists repeatedly tell us to <u>stay active</u>

MISSION

Create a social therapy network for and by people diagnosed with a neurological disease (i.e. Parkinson) and their caretakers.

Our right choices will be ascertained by trial & experience

We aim to share our trials and experiences in the hopes that our peers feel encouraged to :

Embrace the empowerment they have on their lives;

Seek fortitude to confront their challenges;

Explore different options and ventures so that one may favor those that are the most stimulating.

Our right choices must consider our unique and individual limitations

Our right choices must be motivating for <u>*Us*</u>!

Living with Parkinson's disease and our need to take action
