

CAVITY MOUNT INSTRUCTIONS

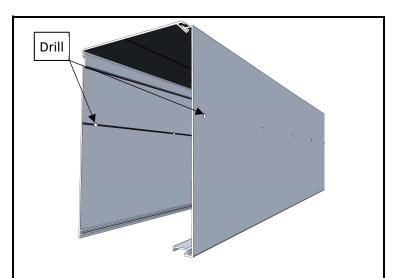

Step 1: Ensure cavity width is 7 3/4" and determine ceiling thickness.

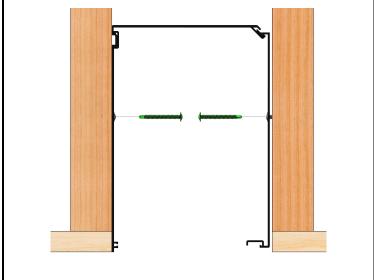

Step 2: Plumb U-channel and BuilderBrackets. Mark LVL on back side of BuilderBrackets on both ends of opening.

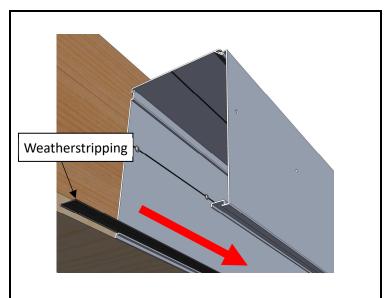

Step 3: Cut all pieces to width of marks. Snap top and back together. Some items omitted for clarity.

Step 4: Drill mounting holes in back and front of canister. Hinge front cover.

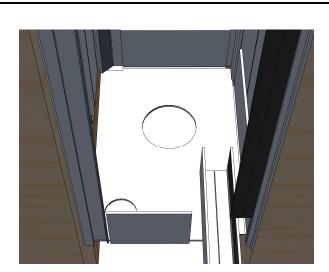

Step 5: Mount back, top and front of canister through drilled holes, flush with the ceiling.

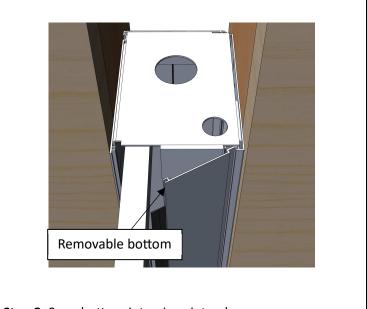

Step 6: Slide weatherstripping into back and bottom pieces. Some items omitted for clarity.

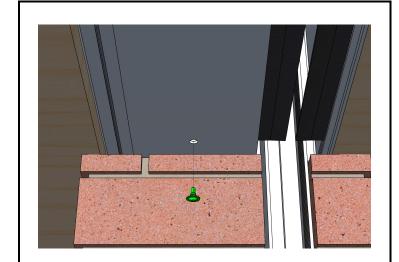

CAVITY MOUNT INSTRUCTIONS

Step 7: Plumb and mount BuilderBrackets and U-channel on both ends. Bracket may need to be rotated and slid into place.

Step 8: Snap bottom into piece into place.

Step 9: Secure bottom at both ends of cover with tek screw.
