AEROTUB

The premier baggage tray for a smoother airport experience.

AEROTUBs are designed to meet the highest demands of quality and are specifically tailored for use in airports, with a focus on durability, long lifespan, and ease of handling. Made from a lightweight, durable material, **AEROTUBs** minimize the risk of damage to hands and fingers, and their design ensures a long lifetime with minimal maintenance. Additionally, they can be used in conjunction with baggage security systems, move quietly through airport transport systems, and are designed to meet the specific needs of each airport's systems in terms of color and shape.
