Secure. Modern. Mission Ready.

BAQ Solutions II, LLC is a Small Business (SMB) and Service-Disabled Veteran-Owned Small Business (SDVOSB) delivering secure information systems for federal agencies. BAQ II supports Category B (Enterprise-Wide Service Solutions), providing enterprise-level IT, communications, and audiovisual infrastructure support services, and Category C (IT Mission-Based Services). Core expertise spans security architecture, assessment and authorization, penetration testing, FedRAMP, SOC operations, DevSecOps, and continuous monitoring to support federal security compliance and protect mission-critical systems.

CORE COMPETENCIES

Cybersecurity

Protect mission critical systems through security architecture, risk management, and continuous threat detection.

Modernization & DevSecOps

Advance legacy environments with cloud-native architectures, automated delivery pipelines, and modern platform engineering.

IT Operations & Service Desk

Maintain enterprise IT availability through proactive system oversight, responsive user support, and operational maintenance.

Engineering & Program Management

Manage technical development and program execution from requirements analysis and trade studies through testing and fielding.
