Video Production Specialist

Location	Eglin AFB, FL
Work Arrangement	Full-Time, On-Site, 1/10's
Clearance	Secret

Grit Government Solutions LLC is currently seeking a talented Multimedia Video Production Specialist for one of our customers at Eglin Air Force Base, Florida.

Position Summary
The Multimedia Video Production Specialist will create high-quality multimedia content to support military training initiatives. This role combines technical expertise with creative storytelling to develop instructional videos, photography, graphics, and other digital media products that effectively communicate complex concepts.

Key Responsibilities
- Produce, shoot, and edit professional instructional videos, technical demonstrations, and multimedia training content.
- Utilize Adobe Creative Cloud, with an emphasis on Premiere Pro, After Effects, and Illustrator, to create polished video content, motion graphics, and visual assets.
- Capture high-quality footage in studio and field environments, including interviews, demonstrations, and supplemental B-roll.
- Apply professional cinematography techniques, including composition, lighting, camera movement, and audio recording.
- Incorporate motion graphics, animated titles, lower thirds, transitions, and other visual elements to enhance instructional content.
- Maintain consistency with established production standards, branding guidelines, and multimedia templates.
- Participate in production planning, storyboarding, post-production reviews, and quality assurance processes.
- Manage media assets, project files, and production workflows to ensure efficient collaboration and delivery.

Strong proficiency in Adobe Creative Cloud, particularly:
- Adobe Premiere Pro – Video editing and post-production.
- Adobe After Effects – Motion graphics, animation, and visual effects.
- Adobe Illustrator – Graphic design and development of video-ready visual assets.
- Ability to independently manage video projects from initial production through final delivery.
- Experience operating professional Sony and Blackmagic Design cinema and DSLR cameras.
- Experience capturing cinematic B-roll using gimbals, stabilizers, sliders, and other camera movement equipment.
- Familiarity with green screen production, chroma keying, color correction, and color grading.

Ideal Candidate:

- The successful candidate is a collaborative, detail-oriented visual storyteller who understands how to balance production quality with instructional effectiveness.
- We are looking for someone who brings creativity, technical expertise, and a continuous improvement mindset to the production process while helping elevate the overall quality, consistency, and efficiency of our multimedia training content.

Job Description:

- Required to provide on-site support for our JSF Training program and customers in Eglin, FL
- Develops and edits training videos and multimedia applications.
- Creates engaging videos and images using DSLR cameras, studio lighting, audio recording equipment and graphical images.
- Proven artistic and video design skills with strong attention to detail/aesthetics
- Performs other duties as assigned
