Steve Thomas Verified

It just works!

Been a long term user of Hat Saver, applying to every golf, hiking & collectable hat I own. You tend to sweat in AZ, and after tossing a few favored hats away due to salt/sweat stains I tried HS and not only do my hats last longer than one season (golfing 150+ rounds annually), I'm “saving” $$ as I buy fewer hats!

about Hat Saver

Jim Schwartz Verified

Long Time Satisfied User

Have been using Hat Saver for many years, has done a great job of protecting my many caps. Play a lot of golf in warm southern U.S. weather and have had only occasional minor staining of my caps at worst, often no staining at all. Have not had enough time to see how well the new liquid spray version works, but already prefer it over the previous aerosol spray cans and seems to be more efficient. Service from the company has always been great and very friendly. Am always a fan of privately owned & operated companies like this one.

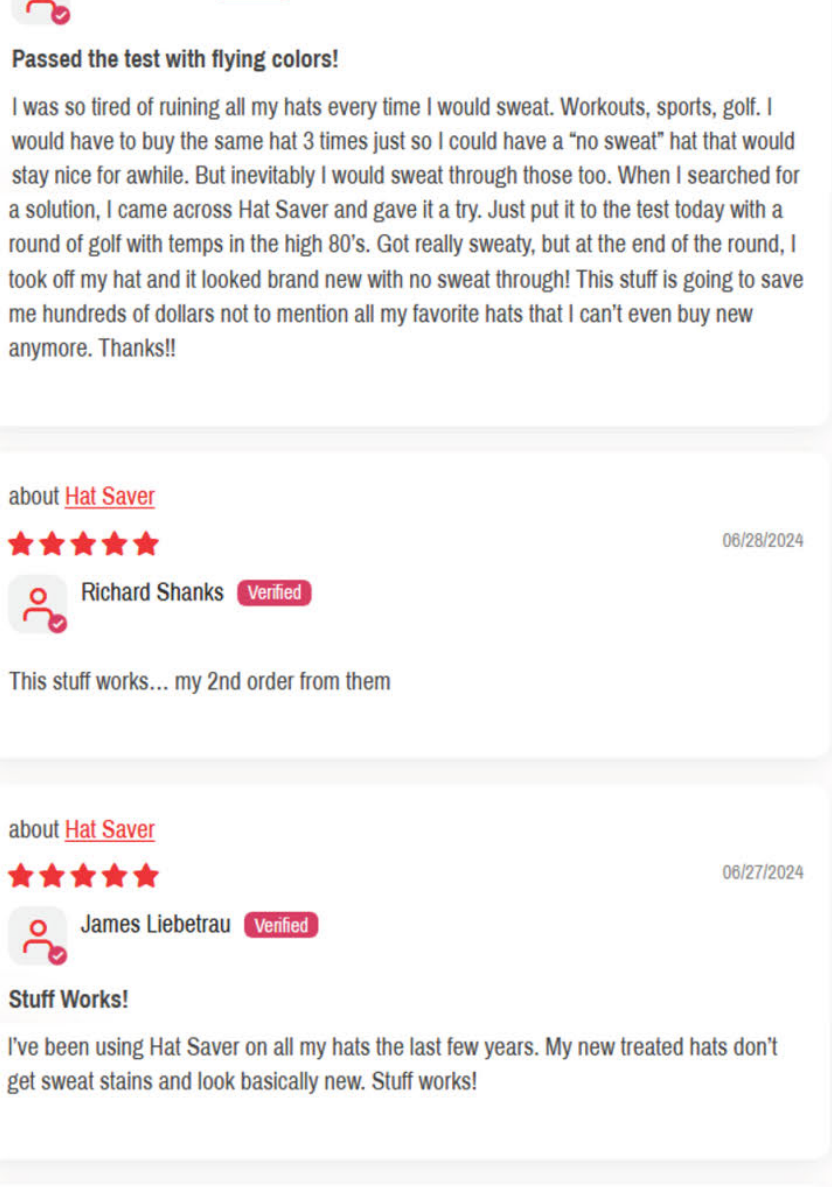
★★★★★ 06/29/2024

James Siwek Verified



Passed the test with flying colors!

I was so tired of ruining all my hats every time I would sweat. Workouts, sports, golf. I would have to buy the same hat 3 times just so I could have a “no sweat” hat that would stay nice for awhile. But inevitably I would sweat through those too. When I searched for a solution, I came across Hat Saver and gave it a try. Just put it to the test today with a round of golf with temps in the high 80’s. Got really sweaty, but at the end of the round, I took off my hat and it looked brand new with no sweat through! This stuff is going to save me hundreds of dollars not to mention all my favorite hats that I can’t even buy new anymore. Thanks!!

Zachary Jauvtis Verified

Seriously Excellent

This is my second round buying this product and I anticipate purchasing more. This is magic. It actually works, which was a pleasant surprise. It looked too good to be true, but it's real.

I buy blank hats, modify them, and sell them to raise money for charity, like ACIR.org. This product keeps the hats looking fresh, letting folks wear them in even the hottest days. It also keeps the glue from seeping through. I've protected >20 hats so far while I'm working my prototypes and am excited to get into production.
