MY PURPOSE

I am called to serve as Chieftess of Birth, Death & Forensics to help establish a system that honors the full human cycle — from intentional conception to sacred transition— by properly recording our people, protecting our lineage, and preserving our history within ARNA. A people cannot reclaim sovereignty while remaining disconnected from how their people enter this world, how they leave it and how their existence is remembered.

WHY THIS WORK MATTERS

Birth, death and lineage are the foundation of a Nation. When we know our origins and honor our ancestors, we strengthen our identity, protect our people and build a future rooted in truth. This department is not just about documents — it is about people, family, culture, sovereignty and the continuity of our existence as Indigenous People.

BIRTH ESTABLISHES LINEAGE.
DEATH ESTABLISHES ANCESTRY.
The record between them establishes history.

MY VISION

To create an organized, culturally grounded and stable Birth, Death & Forensics Department that ensures accurate documentation of our people, restores our ancestral practices, supports intentional conception and family creation, and collaborates with the Cosmology Department to develop structured approaches for psychological and behavioral analysis in forensic matters.

GUIDED BY THE ELDERS OF THE MOON

I hold this work with care, poise and a transcendence of emotion, like the Elders of the Moon. The wise women of our ancestry understood how to hold delicate matters while still delivering solutions. That is the energy I bring to this position.

LIFE
INTENTIONAL CREATION

Educate and support women and men in conscious conception, preparing the body, mind and environment to create healthy, strong and purposeful children. We evolve from mindless breeding into intentional creation of Gods.

LINEAGE
RECORD OUR PEOPLE

Establish a National Birth & Death Registry, collect and preserve vital records for current, future and past Nationals, and build a genealogical archive that strengthens our identity and secures our history.

ANCESTRY
HONOR OUR TRANSITION

Restore and teach Indigenous cultural practices for death and ancestral remembrance. Create protocols, ceremonies and guidance so our people are honored, supported and properly remembered.

EVIDENCE
INVESTIGATE WITH DISCERNMENT

Develop a forensic support framework that includes scientific investigation, evidence analysis, DNA and genetic services, and collaboration with the Cosmology Department for psychological and behavioral analysis.

REMEMBRANCE
PRESERVE THE HISTORY

Ensure that every generation is remembered. Build systems that protect our records, pass down our knowledge and keep our people's stories alive for generations to come.

A Nation that remembers its people can never be erased.
