SAFETY DATA SHEET

Nature Direct Shampoo | Prepared: 06/11/2026

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name: Nature Direct Shampoo

Recommended Use: Hair shampoo; rinse-off personal care product.

Supplier: Nature Direct

Address: 59 Jijaw St, Sumner, QLD 4074

Telephone: +61 407 127 820 (from supplied reference SDS; confirm)

Emergency advice: Australian Poisons Information Centre 13 11 26

2. HAZARDS IDENTIFICATION

GHS classification: This substance / preparation is classified as hazardous according to the GHS of Classification and Labelling of Chemicals, 7th Edition.

Signal word / pictograms / hazard statements: WARNING

Hazard statement: H319 Causes serious eye irritation.
Precautionary statements:
P264 Wash hands and face thoroughly after handling.
P280 Wear eye protection/face protection.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists: Get medical advice/attention.

Potential exposure considerations: Avoid eye contact. Shampoo may cause eye discomfort or irritation. Stop use if skin irritation develops.

Precautionary advice: If in eyes, rinse cautiously with water for several minutes; remove contact lenses if easy. Seek medical advice if irritation persists.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients transcribed from the supplied finished-product label, in label order. Concentrations and CAS identifiers were not supplied; obtain the formulation and supplier ingredient SDSs for verified composition and classification.

- Water
- Sodium Laureth Sulfate
- Cocamidopropyl Betaine
- Glycerin
- Dimethiconol
- Retinyl Palmitate (Vitamin A)
- Helianthus Annuus (Sunflower) Seed Oil
- Silk Amino Acids
- Tocopherol Acetate (Vitamin E)

- Guar Hydroxypropyltrimonium Chloride
- Cocamide MEA
- Sodium Chloride
- Citric Acid
- Sodium Hydroxide
- Potassium Sorbate
- Sodium Benzoate

4. FIRST AID MEASURES

Ingestion: Rinse mouth. Do not induce vomiting. Seek medical advice or contact Poisons Information Centre if unwell.

Eye: Rinse gently with clean water for at least 15 minutes. Seek medical attention if irritation persists.

Skin: Rinse with water; discontinue use if irritation occurs.

Inhalation: Not expected to be a significant exposure route under normal use. Move to fresh air if symptoms occur.

Advice to doctor: Treat symptomatically.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media: Use water spray, foam, dry powder or carbon dioxide appropriate to surrounding fire.

Specific hazards: Combustion or thermal decomposition may release irritating fumes; exact products not determined.

Protective equipment: Firefighters should use suitable protective clothing and self-contained breathing apparatus when required.

Hazchem code: Not determined.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Spilled shampoo can make floors slippery. Avoid eye contact.

Containment and clean-up: Contain spills; absorb with suitable inert material; collect for disposal. Wash residual material away with water while preventing uncontrolled release to drains.

Environmental precautions: Avoid large releases to waterways.

7. HANDLING AND STORAGE

Handling: Use as directed. Avoid eye contact. Maintain good hygiene when handling bulk product.

Storage: Store upright, tightly closed, in a cool dry area away from direct sunlight. Supplied product label states below 30°C.

Incompatibilities: To be confirmed; avoid strong oxidising agents as a general precaution.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure limits: Mixture-specific exposure limits not established in supplied materials; assess individual ingredients where relevant.

Engineering controls: Normal room ventilation generally suitable for consumer use.

Eyes: Eye protection recommended for bulk handling, manufacturing or spill clean-up.

Hands: Protective gloves for prolonged occupational handling or sensitive skin.

Respiratory: Not generally required for normal use; evaluate if mist or aerosol is generated.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Liquid Shampoo; colour – white, very viscose.

Odour: Essential Oils – Peppermint, Patchouli, Rosemary.

pH: approx. 4.9

Boiling point: Approx 100 degrees

Flash point: Not applicable.

Solubility: Completely soluable, at 20 degrees C, approx. 1.031 @ 20C

Density / specific gravity: Not supplied.

Viscosity: CPS @ 20C approx. 3500 cps

Flammability: Nil

10. STABILITY AND REACTIVITY

Stability: Expected to be stable under recommended storage conditions; confirm with stability testing.

Conditions to avoid: Excessive heat, freezing and direct sunlight.

Incompatible materials: Strong oxidising agents (precautionary).

Hazardous decomposition: Not established for the finished mixture.

11. TOXICOLOGICAL INFORMATION

Mixture test data: Not supplied. No numerical acute toxicity estimates or definitive GHS conclusions can be made from the label alone.

Eyes: The eye irritation Category 2/2A score has been determined to be > 1, so the product is considered by GHS to cause Category 2/2A eye irritation.
May cause serious irritation to the eyes, including redness and stinging.
The irritation will be reversible within 21 days.

Skin: The dermal ATE (Acute Toxicity Calculation) has been calculated to be > 5000 mg/kg, so the product is **not** considered to be acutely toxic (category 4) via skin contact according to GHS criteria.
The skin irritation Category 2 score has been determined to be < 1, so the product is considered by GHS **not** to be a Category 2 skin irritant.
This product is **not** classified to be a skin sensitiser.
Repeated or prolonged skin contact may lead to irritation.

Ingestion: May cause gastrointestinal discomfort.

Inhalation: Not expected to be a principal route during normal use.

Chronic effects / sensitisation: This product contains no ingredients considered by GHS to be Carcinogenic, mutagenic, toxic to reproduction or which may cause damage to organs through prolonged or repeated exposure.

12. ECOLOGICAL INFORMATION

Ecotoxicity: The product has not been tested for ecotoxicity, but the below statements have been derived from a summation of all substances with known ecotoxicities in the product based on the GHS criteria:
Hazardous to the aquatic environment - acute: Category 3
Not considered to be a chronic hazard to the environment.
Note that these hazard categories are exempt from classification under the current Safe Work Australia Regulations.
H402 Harmful to aquatic life.
P273 Avoid release to the environment.
P501 Dispose of contents in accordance with local regulations.
Persistence and **Degradability**- The surfactants contained in this product are classified as readily biodegradable when tested according to OECD methods.
Mobility No information available.

Precautions: Avoid uncontrolled discharge of bulk product into waterways.

13. DISPOSAL CONSIDERATIONS

Waste disposal: Dispose of bulk product and contaminated absorbents in accordance with applicable local regulations. Do not discharge large quantities to drains.

Packaging: Empty and recycle where accepted locally; follow local waste requirements.

14. TRANSPORT INFORMATION

ADG classification: NOT CLASSIFIED as dangerous goods.

UN number / shipping name / class / packing group: None

Marine pollutant: No.

15. REGULATORY INFORMATION

Australian regulations: Not scheduled.

AICIS inventory status: Not required

Poisons scheduling: Not required

Labelling: Not required

16. OTHER INFORMATION

Prepared: 06 November 2026

Emergency contacts: Australia Poisons Information Centre: 13 11 26; New Zealand National Poisons Centre: 0800 764 766.
