Intense Pulsed Light
Hair Removal

IPL Hair Removal Treatments are a quick and easy solution to unwanted hair. IPL can be used successfully on the body and face. We recommend a course of 8-12 sessions to achieve optimal results.

Super Hair Removal (SHR)

SHR is the latest breakthrough innovation in IPL hair removal technology to launch into the ever-advancing beauty and aesthetics market.

Think IPL or laser hair removal but faster, easier and often more tolerable discomfort.

SHR technology is much like traditional IPL treatments but instead of delivering individual high-intensity shots to the treatment area, SHR scans the treatment zone, gradually heating the skin with repetitive low fluency pulses until the hair follicle is destroyed. *This results in stunted hair regrowth or complete elimination of the hair follicle.*

IPL treatments
