# of Participants attending HCCI Trainings	0		6		23		6	
YEAR END ONLY: % of special health care needs with a special needs care plan in place							96%	

YEAR END ONLY: % of programs receiving CCNC services that improve health and safety conditions in their early learning environments				53%
YEAR END ONLY: % of participants that report increased knowledge as a result of HCCI trainings				80%
Barriers Encountered	Continuing participation after signing agreement to work with CCNC. Trying to increase participation by offering activities that can be lead by CCNC. Filling out Surveys that enable CCNC to know what their needs are and if they are working with any special needs children. Trying electronic surveys and sending them with a message that it helps me be able to help them. Attendance at in person trainings. I am trying to increase attendance by offering trainings that providers have stated they would like to have.			
Success Stories	Training participant felt that everyone at the center where she worked should have Back to Sleep training and we arranged for all of the staff to be able to attend a training for just that center Conducted referral visit from HHS for Safe Sleep concerns. When I presented the one slide from Back to Sleep training that lists the infants in Iowa who passed away in one year due to unsafe sleep practices, she hung it on her wall so that the parents would all see it along with the safe sleep poster. Completed 7 skills assessments in the 4th quarter. 6 of those were from online medication administration training and 1 was a reassessment. Created and distributed exposure notification signs for providers to use in the event of an illness Completed Health Record Check for 30 children Completed Health and Safety Checklist for center working towards IQ4K Monthly newsletter created by state CCNC, personalized by this CCNC and sent out to Black Hawk County ECE providers each month Provided information on Reactive Attachment Disorder (RAD) Obtained and provided information on what to do during a breath-holding spell in a 1 year old
