Notice of Public Meeting

To be held by CarbonFree Kynoch Ltd. (CarbonFree) regarding a Proposal to Engage in a Renewable Energy Project

Project Name: CarbonFree Kynoch Project
Dated at Toronto: December 16, 2026
REA Reference: 7588-DVUPDU

Project Location: Kynoch, Ontario, adjacent to Highway 554 in the unincorporated District of Algoma
Project Website: www.carbonfreekynoch.com

Purpose of this Meeting

CarbonFree previously held Public Meetings on this project in November 2025 and May 2026. Since then, the project's proposed point of connection to the provincial electricity grid has changed: the facility is now proposed to connect to the existing transmission line south of the project location, on Crown land. Because this modification affects the project layout and the lands needed for the connection, CarbonFree has updated the project proposal and the supporting environmental and engineering studies to assess it.

This third Public Meeting provides the community and other interested parties the opportunity to review the revised project reports, ask questions of the project team, and share their comments before the Renewable Energy Approval (REA) application is submitted.

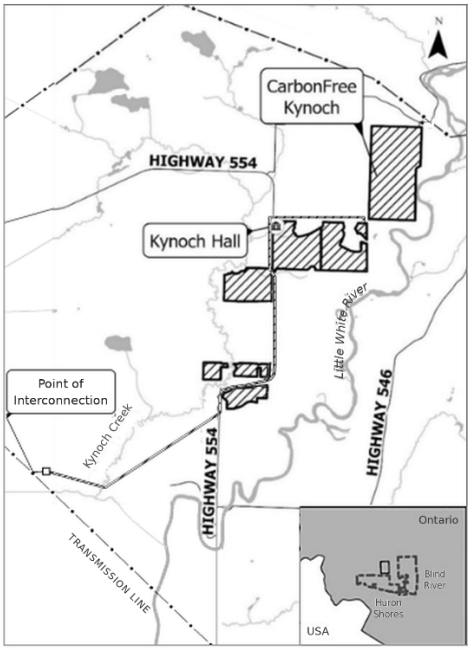
The project requires a REA and is subject to Part V.0.1 of the *Environmental Protection Act* (Act) and Ontario Regulation 359/09 (Regulation). This notice is distributed in accordance with section 15 of the Regulation, before an application is submitted to, and assessed for completeness by, the Ministry of the Environment, Conservation and Parks.

Meeting Details

Date: December 16, 2026
Time: 6:00 pm to 8:00 pm
Place: Kynoch Community Hall (Highway 554)

Project Description

Pursuant to the Act and Regulation, the facility is a utility-scale Class 3 solar facility. If approved, it would have a total maximum nameplate capacity of 154 MW (unchanged) and would connect to the provincial grid at the revised point of connection through a new switching station and project transmission line. The project location is shown on the map.



Documents for Public Inspection

The *CarbonFree Kynoch Project Modification Report* describes in detail the proposed modifications and how it has influenced the proposed project. The Modification Report includes updated mapping and a summary of updates made to supporting project reports as a result of the proposed change. Copies of the revised supporting project reports will be available for inspection, starting November 16, at the Iron Bridge Library, located at 10 Main Street, Iron Bridge (Huron Shores), ON P0R 1H0.
