Connex Personnel is currently recruiting a Project Engineer – Civil Structural (Senior) for a utility client located in St. John's, NL.

Our client is seeking a Project Engineer for Civil Structural Engineering support. The individual will join the team in the execution of projects throughout Newfoundland and Labrador for the Project Execution Team (Non-Regulated). This is an approximately two-year engagement with potential for extension.

Key Responsibilities

- Provide professional structural and civil engineering design and construction oversight on various projects
- Project engineering support for structural steel and concrete construction and rehabilitation
- Perform engineering due diligence for project planning and delivery
- Facilitate and/or complete project risk management including risk identification and associated mitigation
- Perform project scope verifications, field verifications, engineering data gathering, and associated detailed project planning activities
- Review tender packages prepared by other consultants and contractors
- Review shop drawings prepared by contractors and vendors
- Prepare tender packages for contracts
- Prepare requests for proposals (RFPs)
- Provide technical input as a design team member for projects and other technical documentation
- Direct and supervise consultants and contractors during the completion of specific engagements
- Oversee quality planning and associated inspection plans for assigned work
- Review and approve reports prepared by consultants
- Attend Factory Acceptance Tests (FAT) as required
- Conduct regular travel to field/site locations to monitor construction activities, oversee testing, verify project progress, and provide support to site teams
- Facilitate effective communication across stakeholders
- Review and approve technical documentation, including commissioning
- Assist with project closeout activities, ensuring smooth transition of completed assets to operations
- Promote continual improvement through lessons learned, innovative approaches, and sharing best practices with other project teams
- Submit timesheets and documentation in accordance with the company's project management requirements
- Other duties as assigned

Education and Experience Required

- Bachelor's degree in engineering and registered as professional engineer (P. Eng) with the Professional Engineers and Geoscientists of Newfoundland and Labrador (PEGNL) association. Equivalent professional engineering (P. Eng) registration can be considered
- 10 or more years of experience performing structural engineering design and construction oversight work on industrial facilities (including stamping associated designs)
- Specific experience related to civil engineering design and project oversight within utilities and hydro power generation assets, dams and associated facilities is preferred
- Experience in project scope definition, engineering data gathering, and associated detailed project planning activities
- Experience leading project risk identifications and mitigations
- Experience with on site project monitoring at remote locations
- Experience in design, managing construction contracts and commissioning
- Experience in preparing project estimates
- Experience with project quality and inspection programs
- Proven and demonstrated communication skills
- Ability to thrive as a participant and/or leader within a multi-discipline team of both internal and external resources
- Excellent computer skills including a working knowledge of Microsoft Office
- Ability to adapt to dynamic work environments and changing project demands

Mandatory Requirements

- Valid Canadian driver's license with clear Government Issued Drivers Abstract
- No criminal record (criminal records check required)
- Fit-for-work to perform all duties of the job description
- Valid certifications in WHMIS 2015, Emergency First Aid, Defensive Driving, Powerline Hazards, Trenching and Excavating, Confined Space and Fall Protection (within 30 days of start date)

Working Conditions

• Office-based at the client's head office in St. John's, NL; a home office or hybrid arrangement may be required should space restrictions arise.
• Standard 37.5 hrs/week, Monday to Friday, 08:30 to 16:30.
• Regular travel to field/site locations, including periodic travel to Labrador and other site locations throughout the province (travel expenses covered).

Anticipated Start Date: 2026-12-15
Anticipated End Date: 2028-12-22
