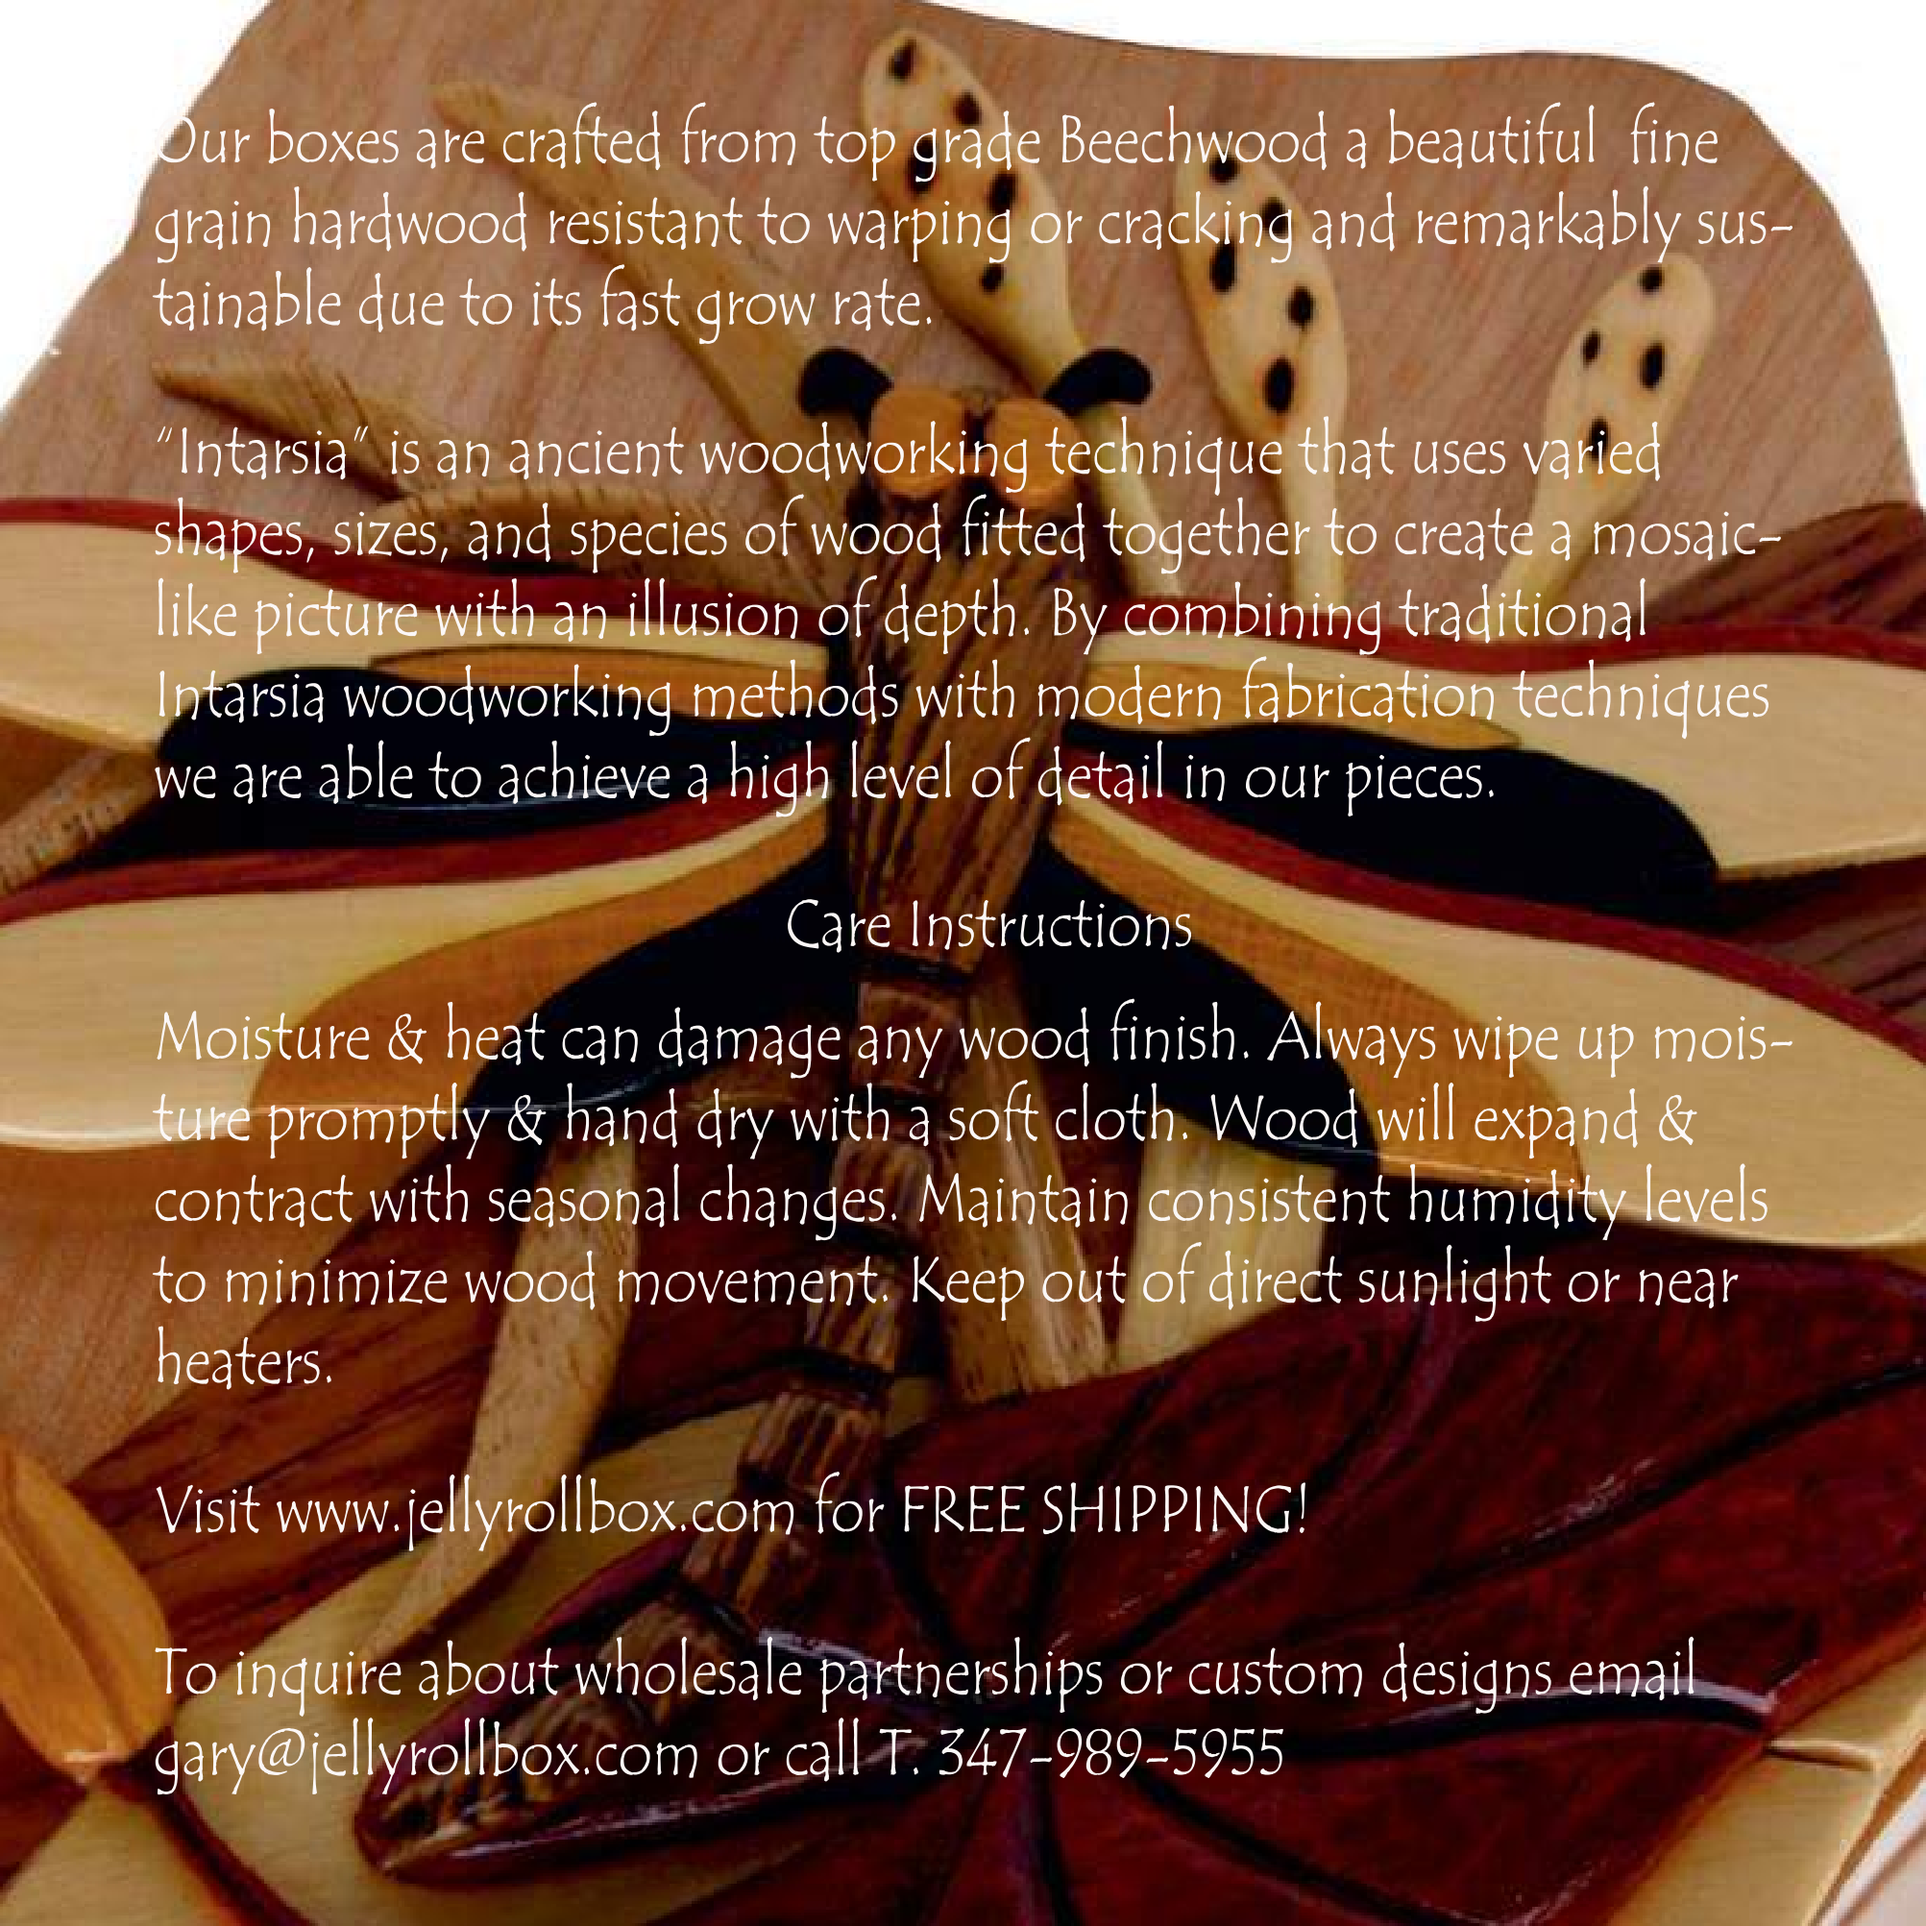
jelly roll box



Our boxes are crafted from top grade Beechwood a beautiful fine grain hardwood resistant to warping or cracking and remarkably sustainable due to its fast grow rate.

"Intarsia" is an ancient woodworking technique that uses varied shapes, sizes, and species of wood fitted together to create a mosaic-like picture with an illusion of depth. By combining traditional Intarsia woodworking methods with modern fabrication techniques we are able to achieve a high level of detail in our pieces.

Care Instructions

Moisture & heat can damage any wood finish. Always wipe up moisture promptly & hand dry with a soft cloth. Wood will expand & contract with seasonal changes. Maintain consistent humidity levels to minimize wood movement. Keep out of direct sunlight or near heaters.
