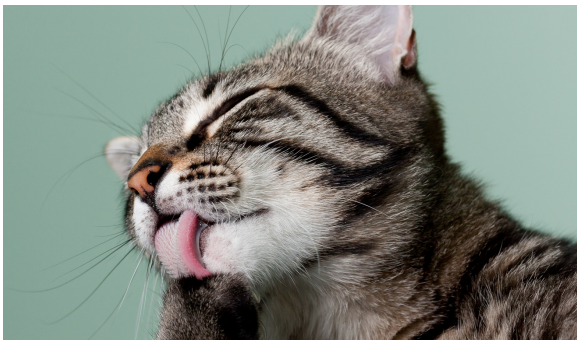
5 Tips for Grooming Your Cat



1.

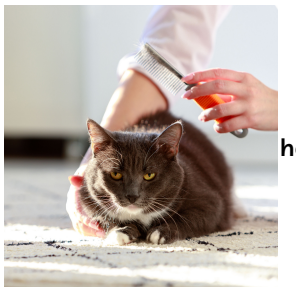
Using the right tools

The tools I most often use :

- a Zoom Groom brush by Kong
- a coarse comb (wide toothed comb)
- a moutling comb

2.

Being in the right position



Always have the pointy bits facing away from you!

- being positioned with the head facing away from you will help a lot
- picking a time your cat is relaxed and happy always helps too

3.

Using the right handling techniques

Using a towel will help with your cat if they are wriggly

- avoid scruffing
- be gentle and make it a loving activity you share

4.

Using the right movements

Brush in the direction the fur grows
- comb small portions
- if you feel a pull use a smaller section of fur
- hold behind any knots so you aren't pulling
- small strokes are best

5.

Using the right amount of time

Start with just a couple of minutes and build up from there

- just do one small section
- next time do a different section
- eventually you will work your way around the whole cat
- go back to favourite spots if the cat starts to get a bit wriggly
