AI in ECommerce
Compiled by: Rajashekar Tuppada
Document Reference Code: i3Q-SDTC-AIEC-0104

1. PURPOSE

The Purpose of this document is to provide; How AI is transforming online shopping and digital businesses

2. OVERVIEW

Artificial Intelligence (AI) enables computers and machines to perform tasks that normally require human intelligence. In e-commerce, AI helps make online shopping faster, smarter, safer, and more personalized.

3. HOW AI IS USED IN ECOMMERCE

3.1. Personalized Recommendations

AI studies what customers search for, view, and purchase. It can recommend products that a customer may be interested in. For example, someone searching for football shoes may receive recommendations for football jerseys, socks, or other sports products.

3.2. AI Chatbots

AI-powered chatbots can answer customer questions 24/7. They can help customers track orders, find products, and solve common problems.

3.3. Smart Search

AI can understand what customers are looking for even when they do not type the exact product name. This makes finding products easier and faster.

3.4. Fraud Detection

AI can identify unusual transactions and help online stores detect possible fraud or suspicious payments.

3.5. Inventory and Delivery

AI can predict which products are likely to be needed and help companies manage stock. It can also help businesses plan efficient delivery routes.

CONFIDENTIAL

4. BENEFITS OF AI IN ECOMMERCE

- Faster customer service
- Better product recommendations
- Improved shopping experience
- Reduced business costs
- Better inventory management
- Improved fraud detection
- Faster and more efficient deliveries

5. CHALLENGES OF AI IN ECOMMERCE

AI also has some challenges. It requires large amounts of data and can raise privacy concerns. Developing and maintaining advanced AI systems can be expensive. Businesses must use customer data responsibly and keep it secure.

6. FUTURE OF AI IN ECOMMERCE

In the future, AI could make online shopping even more interactive. Customers may use AI shopping assistants that understand their preferences, compare products, create shopping lists, and help them make purchasing decisions.
