When you are home, once an hour, take your puppy outside on leash. Stand in one place without talking to your puppy waiting for your puppy to become bored of the smells and potty. Reward verbally, with treats, play and off leash time if in enclosed space.

Ignore accidents so it does not become scary to potty in front of you.

Keep a chart to recognize your puppies potty needs.

Keep aware, puppies bladders need to mature and frequent access to potty area on leash needs to occur for young puppies.
