RENYSON CULTIPACKER

High efficiency in land preparation

Advantages:

- *Streamline operations*
- *Breaks clods*
- *Eliminates air pockets*
- *Pushes down small stones*
- *Reduces soil compaction*
- *Improves soil-seed contact*
- *Prevents moisture lost*
- *Allows shallow seed placement*

Our Cultipacker is a heavy duty and versatile machine excellent for field preparation, thanks to its advanced design and to its efficient steel rings. The rings are made of the same steel used in disc blades, highly resistant to abrasion and flexible to impacts, they have a long crest sharp enough to penetrate into the soil, thus increasing traction to prevent them from dragging instead of rolling as it happens with cast rings, which also can break when hitting a solid object.

For more information visit www.renyson.com or contact us at info@renyson.com and 915-261-0796

Features

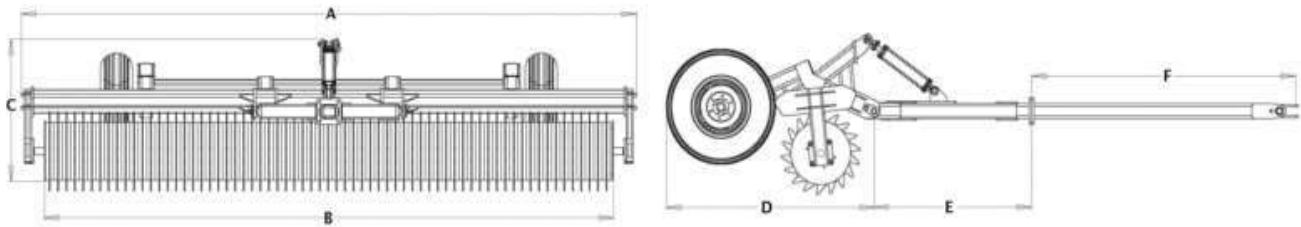

- High resistance and flexible boron steel rings
- Reinforced heavy-duty frame
- High-Tensile steel in bushings and pins
- Triple seal bearings
- Water filling option for more weight
- It can be attached directly to the three-point hitch if tongue is removed
