# The Full-Size Color Images

The color images contained in the online version of the manual are reproduced herein as large as possible on a standard page. Some of the images were only available in grayscale. You can use them simply for visual reference, for color prints on photographic paper, or for creating overhead projection transparencies.

In fact, you can use these, and any other images in the manual, for any educational purpose you see fit — all NASA images are in the public domain. You may not use them for any commercial purpose without special permission. You are required to retain the image credit (e.g., **SURVEYOR IMAGE COURTESY OF NASA**) in clear print visibly adjacent to the image.
