COLE'S COLLISION MEETING IS ON THURSDAY, NOVEMBER 12 7 P.M. AT QUEENSBURY ACTIVITY CENTER 742 BAY RD.

Cole's Collision meeting November 12!

Cole's Collision has not gone away, and they have not altered their plan for a 17,500 industrial structure with 110 parking spaces. The Cole's Car Collision project proposed at the corner of Glen Lake Rd and Route 9 poses serious environmental threats to the Critical Environmental Area of our inlet wetland and Glen Lake, and this very large, industrial business is completely out of character with our neighborhoods. We must keep up our pressure to oppose this project. We need to show up in large numbers to show the Town that this project is not right at that location. A Planning Board meeting for Cole's Car Collision is Thursday, November 12 at 7 p.m. at 742 Bay Rd. Queensbury NY. Be sure to arrive early and get a blue ribbon to show solidarity in our opposition to this project. We hope everyone can attend, but if you are unable to be there, please write an email or letter opposing the project to shaunab@queensburyny.gov or hand delivery to Shauna Baker, Office Specialist at 742 Bay Rd, downstairs at the Planning Office. Contact Paul Derby for additional information.

Water Level: That dam "Board" was lifted from the dam on October 14, per our bylaws. The water level has receded and is somewhat low for this point in the season, although this is the normal level over winter. The reason is obvious. It has been a very dry late summer and fall with rainfall totals 3.37 inches below normal. This post-season water drawdown is good for a couple of reasons. It will help control the weeds along our shorelines with the winter freeze, and it's a good time with the water low to go in and rake out along your shoreline to remove fallen leaves, debris, and unwanted plants.

Now some happy news. The GLPA CHRISTMAS PARTY is Monday, December 7 at the Docksider Restaurant. Buffet dinner will begin at 6:30. We'll be sending out a flyer soon with more information and an RSVP.

As always, if you have lake questions or want additional information on the Cole's project or lake matters, you can email me at glenlake@roadrunner.com or give me a call 518-761-7015. Thank you for being a GLPA member. If you are not a member, please join by downloading the application on our website at glenlakeny.org.

Respectfully, Paul Derby, PhD, President Glen Lake Protective Association
