

# A Value-Based Model to Empower Independent Primary Care Physicians

**Aledade offers a new model of primary care that puts physicians back where they should be: quarterbacking their patients' health care.**

Accountable Care Organizations (ACOs) are networks of doctors who band together to deliver coordinated care under a payment system that rewards for health outcomes, rather than services delivered. A national leader in value-based care, Aledade partners exclusively with independent primary care physicians to build and lead physician-led ACOs. In an age of consolidation, Aledade ACOs allow practices to stay independent, practice medicine like they've always wanted to, and thrive financially. Aledade's network of ACOs includes hundreds of physician-led practices providing high-quality, coordinated care to patients across the country in commercial and public payer arrangements.

**A physician-led ACO model** that allows your practice to maintain its independence and succeed in value-based health care.

**A true partner** that is 100 percent aligned with you, and a network of over 1,200 independent primary care physicians.

**Financial and technology investment**, clinical and business guidance, and administrative assistance from a team of experts.

**The Aledade Platform**, a cloud-based population health platform that integrates into practice EHRs and workflows.

**In-office practice support** to enhance workflows and optimize EHR and health IT.

**Practice transformation** to improve patient care and engagement, generate savings, and increase revenue.

**Help breaking down the complex and changing health care landscape**, including policy changes like MACRA and MIPS.

## The Aledade Advantage

- Proprietary technology platform and analytical tools that empower practices to manage the quality and total cost of patients' care. Aledade's technology gives practices visibility into their patients care beyond the four walls of the practice, across the full health care spectrum.
- Opportunities to participate in value-based programs across your patient population through unique risk-sharing agreements organized and managed by Aledade with commercial and public payers.

## National Expertise Delivered Locally

Aledade's team has been on the forefront of health care innovation for over two decades. Led by former National Coordinator for Health IT, Dr. Farzad Mostashari, the team brings an insider's perspective, providing unmatched data analytics, face-to-face support, practice and population health technology, and patient engagement expertise. Aledade's model is built around the simple, but radical, idea that Aledade only succeeds when practices deliver better care at a lower cost.
