## Shocking Curriculum in AZ Schools

TUCSON, AZ - Liberty Counsel represents concerned parents and residents against the implementation of a harmful curriculum under the guise of sex-ed in the Sunnyside Unified School District in Tucson. The material is not age appropriate, violates Arizona law, is not medically accurate and promotes harmful sexual behavior to K-12 grade children.

Advocates for Youth drafted the "Rights, Respect, Responsibility" curriculum, known as the 3Rs, and is featured prominently throughout the material as a "resource." A partner of Planned Parenthood, Advocates for Youth takes the following position regarding minor girls or young women and abortion: "Young women need the right to safe and legal abortion. But many states place barriers on young women's access by requiring parental notification or even consent...United States policies contribute to an anti-choice climate and limit young women's access to abortion. No young woman, anywhere, should be forced to seek out an illegal, dangerous procedure or carry a pregnancy she didn't want to term."

The 3Rs material contains graphic gynecological illustrations for kindergarten through second graders and for fifth graders; a wooden "condom demonstrator" for eighth graders; and the covers of multiple p-graphic and homosexual magazines for classroom discussion with 12th graders. This curriculum also violates Arizona law by promoting a same-sex lifestyle and suggesting there are safe methods of homosexual sexual activity. In addition, one of the learning goals for 12th graders, includes knowing how to use a condom. The material promotes condoms for anal sex, despite the fact there is not one approved by the FDA as being suitable for this sexual activity.

Numerous lessons involve virtual classroom excursions to Planned Parenthood's website, some involving small groups of self-supervised children. The material promotes abortion over childbirth and adoption and, beginning in the sixth grade with 11- and 12-year-olds, the 3Rs curriculum mentions or refers students to Planned Parenthood or its website more than 24 times. The Planned Parenthood website includes a "Glossary A-Z" that does not contain the words "adoption" or "pro-life," but contains "anti-choice" and "pro-choice." Planned Parenthood's glossary also contains many other obscene words and definitions, which are not suitable for children including "necrophilia," defined as "when a person is sexually aroused by dead bodies."

Liberty Counsel's Founder and Chairman Mat Staver said, "The Sunnyside Unified School District in Tucson has no business exposing innocent children to graphic and harmful material. The school board needs to stop this trash as it has no place in public schools. This harmful material is a violation of Arizona law. Tucson parents must let their voices be heard and protect their children. They should attend every school board meeting until this smut is permanently eradicated," said Staver.

### MANCHIN STATEMENT ON PRESIDENT TRUMP'S DECISION TO PULL OUT OF THE IRAN DEAL

Washington, D.C. - U.S. Senator Joe Manchin (D-WV) issued the following statement after President Trump's decision to pull out of the Iran nuclear deal. Senator Manchin was one of only four Democrats to vote against the Iran Deal in 2015.

"I opposed the Iran deal three years ago because we gave away too much upfront and got far too little in return. The deal I opposed gave Iran \$100 billion dollars on day one for a promise that they wouldn't pursue nuclear weapons for only 10 years, but it did nothing to limit their sponsorship of terrorism or development of the ballistic missiles that could reach the U.S. This was a bad deal then, and it is a bad deal today.

"That is why I support President Trump's decision to impose sanctions until the Iranians agree to permanently give up nuclear weapons and the missiles that deliver them, and end their support for terrorist organizations around the world. I believe that to be a super power, you must possess super diplomatic skills, and I believe that we can use these skills to negotiate a better deal."
