

## Ten Years Embroidered with Love for Posterity

Today, our country places a top priority to raising the children as masters of future, regarding them as kings and queens of the country.

In retrospect, children's palaces, camps, baby homes, children's homes, Okryu Children's Hospital and other edifices filled with love for posterity of the Workers' Party of Korea (WPK) were built in our country during the last ten years, and our children are now fulfilling their precious dreams and desires to their hearts' content and their sonorous laughter resounds throughout the country.

It does not stop here. Our state has formulated it as its policy to provide school-age children with new school uniforms and stationery. It, some time ago, has fixed it as a policy to provide all children across the country with dairy products instead of soya bean milk at state's expense despite all difficulties and hardships.

From the olden times, there is a saying that parents take a heavy load to raise one child.

But we have a parent for millions of children, not for one or two. And he regards it not as his trouble but happiness to take the heavy burdens of raising them.

He is none other than respected Comrade **Kim Jong Un**, whom millions of children follow as their own father.

Since the day when respected Comrade **Kim Jong Un** embraced all members of the Children's Union in his wide bosom, he raised them to be the supporting pillars of powerful Korea of the future with the tender care of their father. He also saw to it that the law on introducing the universal 12-year compulsory education was adopted for the future of the country even in the face of harsh challenges and difficulties.

To devote for children even as the condition becomes worse and to take dynamic steps forward towards the future of communism with the might of that love: condensed here is the love for posterity and future of respected Comrade **Kim Jong Un**.

The happy life of our children can hardly be imagined in the capitalist countries where children fall to victim of poverty, maltreatment and all kinds of social evils.

A short while ago, the "Global Times" of China revealed the true picture of various crimes including human trafficking and child labor in the U.S. It said that the U.S. has more than half a million child farmworkers who are suffering 10 hours of intense labor per day.

Children have no other way but to choose labor at school ages and cannot even bud their talents because they have no money. This is the real situation of the U.S., a so-called "beacon of human rights" and of other capitalist countries.

In our country, the issues relating to the children are discussed and decided as a first priority at the meetings discussing policies of the Party and state. This fact alone vividly shows what a great importance the WPK is attaching to the issues related to posterity.

Respected Comrade **Kim Jong Un** holds high the children as the masters of future who will shoulder the destiny of the country and he takes it as his pleasure to undergo all hardships for the posterity. Thanks to his outlook on the posterity and future, our children are now full of happiness and they sing happily the song “We are the happiest in the world.”

The future of the children of our country will be evermore bright and rosy.
