

This is the hardest thing I've ever done.

I am Melissa Seffens.

I need a kidney donor. Please read my story
and share it with others. Ask them to share
it with their friends and family.

The more people who are aware of my
need, the more likely it is that
someone will donate a
kidney so I can live.

In the meantime, I will continue
contributing to my community and helping
educate the public about the benefits of
kidney and organ donation.

Thank you.
