Standing Committee Report was presented by Vice-Chairman Dick Hall. He reported on the committee's activities and accomplishments during the past year.

Mr. Curt Roane, Chairman of the Bike Path Committee, reported that the State has designed a new manual on Bike Paths. A 3 or 4 day seminar is being planned to explain the manual to municipal officers and engineers and to receive input from them. A seminar will be held in the Daytona area.

Mr. Dennis LaBelle, Chairman of the Committee to study the proposed changes in the Utility Procedures Manual No. 722-051, gave a report on these changes to the members. He requested that a representative be placed on this committee from the DOT for their input and explanation of these changes. Mr. Ernest Salley, Fla. DOT, explained the origin and a little of the background of the Utilities Procedures Manual. There are three manuals which need to be worked on at the same time.

Chairman Ted expressed his thanks to all of his committees for the past year.

As his last official action, the Chairman asked if anyone present knew for a fact that the first woman on earth was a white lady. The Bible does not have a reference to this. But he asked this question, "Has anyone ever heard of taking a rib from a black lady?"
