# FUCC Telecommunications and Underground Interest Groups

## Combined Meeting Minutes

### Fall Meeting – November 3, 2021 @ 1:30 PM

Chairs: Telecommunications – Stephen Waidley, Frontier  
Underground – Brian Dean, Sunshine 811

- Self-Introductions
  - There were 70 in attendance between the two groups.
- Combined Meeting Format
  - Chairs Stephen Wadley and Brian Dean suggested during the Steering Committee Meeting that the Telecommunications and Underground Interest Groups meet in the same room. The two groups were, as is tradition, scheduled to meet concurrently in separate rooms. That requires attendees to choose which meeting to attend. Since the two groups have many of the same discussions, the combining of the two meetings makes logistical sense. The matter was discussed at the beginning of the combined meeting and was agreed to by the attendees from both groups.
    - If there are topics for discussion specific to each interest group, then breakout sessions can be arranged.
    - The two chairs/groups will still be responsible for arranging a workshop
      - Telecommunications in April
      - Underground in November
- Summer Meeting Recap
  - Chair Stephen Waidley gave a brief recap of the August meeting minutes
  - No Underground Interest Group minutes report due to failure to record web session
- Discussion Items
  - a. Telecommunications Chair Stephen Waidley open the meeting with a discussion of easements
    - i. STEPHEN – CAN YOU ELABORTE ON THIS?
  - b. Underground Chair Brian Dean provided the Sunshine 911 Update
    - i. Experiencing extremely high ticket volumes
      1. Likely to get worse with proposed transportation bill and fiber expansion
      2. Causing delays in locates and questionable positive responses
        - a. There was an extended discussion regarding solutions and responsibilities. The utility and not any contract locator is responsible for locates. If there are ongoing issues, reach out to the utility if the contract locator is not responsive.
  - c. Roundtable Discussion

- i. Governmental Issues – Lee-Ann Snipes, City of Orlando
  - 1. Insufficient SUE in design is resulting in damages during construction
  - 2. No focus on unforeseen or undocumented utilities
  - 3. What should be done when field markings do not match SUE investigation?
  - 4. Can locator notes include the distance to nearest feature?
- 2. Future Meetings
  - a. Prior to adjourning, the group was polled to see if the combined meeting format would work for future meetings. The group agreed and future meetings will be combined.
    - i. The group will be asked to provide suggested discussion items
    - ii. The two Chairs will work together on an agenda for future meetings.
- 3. Adjournment
  - a. The meeting adjourned at 2:30 PM.
