USHL partners with Drive Hockey Analytics for its Player Development Series...

Over 200 players participating in the Player Development Series were equipped with small, powerful sensors attached to their shoulder pads, allowing for unique performance data to be captured at a rate of over 3,000 data points per second. Coaches, players, scouts and media will be able to review player and team-level data across a variety of athletics, gameplay and tactical metrics.

Sioux Fall Stampede vs Dubuque Fighting Saints

Drive Hockey was at one the USHL premier annual tournament events to provide player tracking and analytics during highlight games between Sioux Falls and Dubuque. Players were tracked during pre-game skates and two marquee games in Dallas, TX.

"We are excited to partner with Drive Hockey Analytics for the USHL Player Development Series later this month. Drive Hockey is an industry leader in hockey tracking and player skill analytics and we're looking forward to working with them at this event."

- Frank Butler, USHL Director of Player Personnel
