

## **Chemical Engineer (Turkey)**

We are looking for a Chemical Engineer targeted at developing and designing chemical manufacturing processes. You will apply the principles of chemistry, biology, physics, and mathematics to solve problems that involve the production or use of FIPRON products.

### **Responsibilities**

You will help run experiments and tests to aid in the development of improved manufacturing procedures and processes. The task is to improve existing products for a particular client. To show improved performance as compared to existing or competitive products, performance of the product must be assessed in a quantitative way. Sometimes, new test methods need to be developed to get reproducible meaningful results.

### **Skills and experience**

The successful candidate will need to demonstrate strong knowledge in chemical manufacturing processes. As well as knowledge of technological processes and general understanding of technical disciplines.

### **Your profile:**

- Bachelor's degree in chemistry
- 1-2 years' experience
- Basic knowledge of the chemical composition, structure and properties of substances and of the chemical processes and transformations that they undergo
- Basic ability to analyze data and accurately document and record results
- Verbal and written communication skills, attention to detail, and problem-solving skills
- 1-2 professional references
- Basic organizational and time management skills

This position will offer you opportunities to show your professional skills in a young company and to grow up your career ladder fast.

### **The role includes:**

- Competitive salary and commission
- Highly collegiate team and supportive work environment
- Strong opportunities for career progression

As an employer we provide every employee with a positive working environment, continued professional development and equal opportunities.

If you are a talented professional, passionate about what you do, and want to work in a company that can support your growth, we want to hear from you.

At FIPRON we are passionate about our work, we believe that we can make the world a safer place. As a team, we believe in winning as one - collaborating to reach shared goals and developing through challenging and meaningful experiences.
