About us

We manage volume with value and we manage maintenance and construction with precision. How it's meant to be. With years of experience managing trade services across multiple industry channels, we offer the best delivery processes and match them with the best customer service. It's not just the infield services that matter - these are a given. Our client relationships, our people focus and our customer service driven business sets the culture of our business. This sets us apart in the world we live in.

Friends for life

We're not overly interested in one-off jobs. We're interested in long-term relationships with like-minded partners who value each other for who they are. Our ability to continue to offer value comes with providing ongoing support, service and data to your properties and assets. We collect data, maintain it and prepare servicing plans and maintenance change overs to suit the life cycle and budget of each asset. We then ensure that these plans are managed and delivered as promised. On time and on budget. That's just who we are.

Because why?

Because at Blended Services Group (BSG), our team use decades of experience to continue to refine the process of offering delivery and project innovation to clients no matter the industry. Delivering trade services to customers who know that service delivery is the critical part of their business value chain success. BSG offer technical excellence, capability, customer service and scale. Managing trades is the sweet spot of BSG, but the possibilities are endless.

Managing trades is the sweet spot of BSG, but the possibilities are endless.

Our ability to continue to offer value comes with providing ongoing support, service and data to your properties and assets.

Blended Plumbing

Blended Build

Vic Building Licence - CB-L 29654

Our project management team deliver high quality minor capital works in any industry channel. From council upgrade works to commercial fit outs, from external cladding to civil car park requirements, our experienced trade team manage your project through to completion working with you and your customers. Working with our partners and trusted sub-contractors, we keep them accountable throughout the entire build and provide updated reporting as and when you need it. Managing time, cost and quality. We stay focused on the goal.

Our internal team of qualified carpenters and skilled handymen offer a service others cannot. We have skilled tradespeople in our team completing the smallest or biggest jobs based on our customers requirements. The ability to deliver a high volume of jobs with low value is an in-house capability we are very proud of. We are licenced, qualified, skilled and customer focussed and we excel in ensuring building maintenance and handyman tasks are completed on time and on budget. Quality is a given.

Our office and commercial fit out team offers a turn key solution for hospitality and commercial fit outs. All joinery is manufactured in house and we can cater to any size fit out from start to finish.

Blended Build is a well-established company and we manage all fit out requirements, from mechanical and extraction works to the final professional clean at handover. We coordinate all trades and get the work done in an efficient and timely manner.

Managing time, cost and quality. We stay focused on the goal.
