CCM

•BLAST FURNACE

•Gas Cleaning And Sulfuric Acid Marking System

•COKE OVEN

•SINTER PLANT

•EAF

•LF

Graphite Electrodes

•3500MT Vacuumized Oil Hydraulic Extrusion Forming Machine

•Packing and reinforcement for different transportation mode

•Inspection before despatch

•Main Size & Grade: ø350-600mm HP/UHP

COPPER MOULD

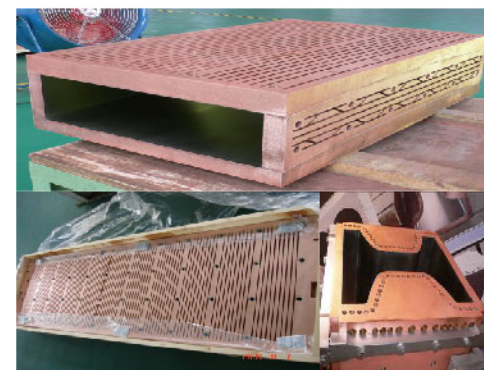

Supply Scope

•Square 50x50 – 650x650

•Rectangular 100x650 -500x650

•Round Φ110-Φ1500

•Beam Blank

•Copper Mould Plates

•Water Jacket & Mould Assembly

ROLLS

CIMM has its core competency in manufacturing cast rolls and forged rolls for Flat Products Mills (HSM work roll and back up roll), Medium & Heavy Section Mills and long products, Universal Beam Mills ect.,

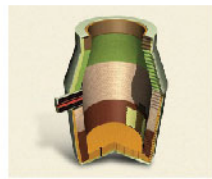

Max.roll diameter and length can be up to Ø1000mm and 4000mm.

Largest weight of the roll is up 60 tons single piece in finished weight.

Our key products

Building Integrated/Attached Photovoltaics

---BIPV/BAPV
BIPV/BAPV is to use PV panels installed on a building roof to generate power. It can make use of existing plant roofs to generate electricity, and supply to the plant. Due to different roof inclination, 1KW PV system will cover around 10M2 area.

Locomotive

A reliable and professional metallurgical locomotive provider, we can design and manufacture the locomotive as per client's requirement. A series of the latest world-level products such as 9600kW high power AC electric locomotive with independent IPR and other locomotives, wagons and diesel engines are available in railway transportation.
