ATTENTION: MILFOIL SEARCH ON CEDAR LAKE, June 8.

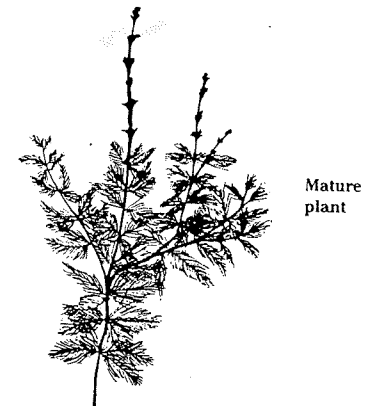

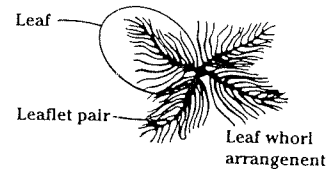

Don Badger and Jerry Bowdin, Coordinators will need volunteers to help the annual search for milfoil. You may call them if you would like to help or see them at the Annual Pot Luck Party on Friday, June 7.

Below is some information regarding Eurasian water milfoil. Please read it and memorize the differences. We must be aware that this weed is still a threat to our lake.

What Does it look like?

Eurasian water milfoil may be identified by:

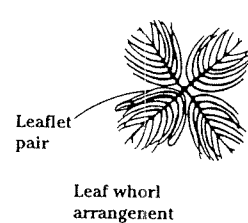

- long stems with feather-like leaves attached in whorls of four;
- leaves typically having nine to 21 pairs of leaflets;
- flowers appearing terminally on the stem above the water;
- formation of mats at the surface.

(*Myriophyllum spicatum*)

Confusing Look-alikes

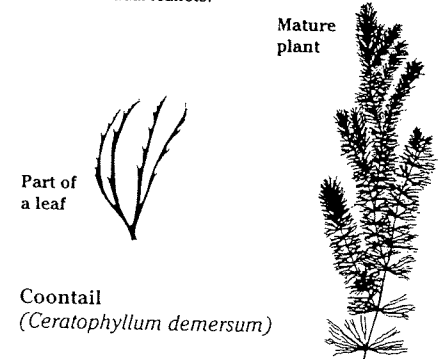

Northern water milfoil (*Myriophyllum exalbescens*) is very similar in appearance, but typically has seven pairs of leaflets and a maximum of 11 pairs.

Northern water milfoil
(*Myriophyllum exalbescens*)

Coontail (*Ceratophyllum demersum*) is also often mistaken for Eurasian water milfoil, but coontail doesn't have individual leaflets.

REMEMBER! (PFD) Personal Flotation Devices, Life
Jackets must be on board and **readily accessible**. You
will receive a warning, however, next year you will
receive a citation from the water patrol if you have
not complied with the new law.

This Federal regulation is now law and we all must have
wearable PFD's for each person on board. Cushions
will no longer be acceptable as a primary lifesaving
device. You should have a throwable cushion or ring
buoy for each craft.
